## **Science And Technology In Armenia Toward A Knowledge Based Econo:**

Science and Technology in Armenia, 2004      **Science and Technology in Armenia** National Research Council, Policy and Global Affairs, Development, Security, and Cooperation, Office for Central Europe and Eurasia, Committee on Science and Technology in Armenia, 2004-11-23 An NRC ad hoc committee analyzed the current status and future development potential of Armenia's science and technology base including human and infrastructural resources and research and educational capabilities. The committee identified those fields and institutions offering promising opportunities for contributing to economic and social development and particularly institutions having unique and important capabilities worthy of support from international financial institutions, private investment sources and the Armenian and U.S. governments. The scope of the study included both pure and applied research as well as education in science related fields. The committee's report addresses the existing capacity of state and private research institutions, higher education capabilities and trends, scientific funding sources, innovative investment models, relevant success stories, factors hindering development of the science sector, potential domestic Armenian customers for scientific results and products and opportunities for regional scientific collaboration. An Armenian language version of the report is also available.      The Fundamental Role of Science and Technology in International Development National Research Council, Policy and Global Affairs, Development, Security, and Cooperation, Office for Central Europe and Eurasia, Committee on Science and Technology in Foreign Assistance, 2006-06-24 In October 2003 the U.S. Agency for International Development (USAID) and the National Research Council (NRC) entered into a cooperative agreement. The agreement called for the NRC to examine selected aspects of U.S. foreign assistance activities, primarily the programs of the USAID that have benefited or could benefit from access to strong science, technology and medical capabilities in the United States or elsewhere. After considering the many aspects of the role of science and technology (S/T) in foreign assistance, the study led to the publication of *The Fundamental Role of Science and Technology in International Development*. In the book, special attention is devoted to partnerships that involve the USAID together with international, regional, U.S. governmental and private sector organizations in fields such as health care, agriculture and nutrition, education and job creation and energy and the environment. This book explores specific programmatic, organizational and personnel reforms that would increase the effective use of S/T to meet the USAID's goals while supporting larger U.S. foreign policy objectives.      **Historical Dictionary of Armenia** Rouben Paul Adalian, 2010-05-13 There are two Armenias: the current Republic of Armenia and historic Armenia. The modern state dates from the early 20th century. Historic Armenia was part of the ancient world and expired in the Middle Ages. Its people, however, survived and from its residue recreated a new country. The history of the Armenians is the story of how an ancient people endured into modern times and how its culture evolved from one conceived under the influence of Mesopotamia to one redefined by the civilization of Europe. The second edition of the *Historical Dictionary of Armenia* relates the turbulent past of this persistent country through a

chronology an introductory essay a bibliography and over 200 cross referenced dictionary entries on significant persons events places organizations and other aspects of Armenian history from the earliest times to the present

**The Role of Science, Technology, Innovation, and Partnerships in the Future of USAID** National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Development, Security, and Cooperation, Committee on the Review of Science, Technology, Innovation, and Partnerships (STIP) for Development and Implications for the Future of USAID, 2017-03-03 The United States has long recognized that the nation's prosperity and security depend on how we address challenges of disasters poverty famine and disease around the world The U S Agency for International Development USAID has played a vital role in promoting U S national and international interests by advancing strategies for employing science technology and innovation to respond to global challenges The focus by USAID on science technology and innovation is critical to improve development outcomes At the core of this progress is the engagement of science institutions and other innovative enterprises and their commitment to work in partnership with USAID to research test and scale solutions The Role of Science Technology Innovation and Partnerships in the Future of USAID provides an assessment and advice on the current and future role for science technology and innovation in assistance programs at USAID and on the role of partnerships in the public and private sectors to expand impact This report examines challenges and opportunities for USAID in expanding the utilization of science technology and innovation in development assistance assesses how USAID has deployed science technology and innovation and recommends priority areas for improvement going forward in partnership with others

The Worldwide Transformation of Higher Education David P. Baker, Alexander W. Wiseman, 2008-05-19 Enrollment in institutions of higher education around the world is growing Some scholars have suggested that one reason for this expansion is that the role of higher education has shifted over the last 50 years from an elite to a mass institution This book discusses the worldwide transformation of higher education from multiple perspectives

25 Years of Transformations of Higher Education Systems in Post-Soviet Countries Jeroen Huisman, Anna Smolentseva, Isak Froumin, 2018-04-24 This book is open access under a CC BY 4.0 license This open access book is a result of the first ever study of the transformations of the higher education institutional landscape in fifteen former USSR countries after the dissolution of the Soviet Union in 1991 It explores how the single Soviet model that developed across the vast and diverse territory of the Soviet Union over several decades has evolved into fifteen unique national systems systems that have responded to national and global developments while still bearing some traces of the past The book is distinctive as it presents a comprehensive analysis of the reforms and transformations in the region in the last 25 years and it focuses on institutional landscape through the evolution of the institutional types established and developed in Pre Soviet Soviet and Post Soviet time It also embraces all fifteen countries of the former USSR and provides a comparative analysis of transformations of institutional landscape across Post Soviet systems It will be highly relevant for students and researchers in the fields of higher education and sociology particularly

UNESCO, 2015-11-09 There are fewer grounds today than in the past to deplore a North South divide in research and innovation This is one of the key findings of the UNESCO Science Report towards 2030 A large number of countries are now incorporating science technology and innovation in their national development agenda in order to make their economies less reliant on raw materials and more rooted in knowledge Most research and development R D is taking place in high income countries but innovation of some kind is now occurring across the full spectrum of income levels according to the first survey of manufacturing companies in 65 countries conducted by the UNESCO Institute for Statistics and summarized in this report For many lower income countries sustainable development has become an integral part of their national development plans for the next 10 20 years Among higher income countries a firm commitment to sustainable development is often coupled with the desire to maintain competitiveness in global markets that are increasingly leaning towards green technologies The quest for clean energy and greater energy efficiency now figures among the research priorities of numerous countries Written by more than 50 experts who are each covering the country or region from which they hail the UNESCO Science Report towards 2030 provides more country level information than ever before The trends and developments in science technology and innovation policy and governance between 2009 and mid 2015 described here provide essential baseline information on the concerns and priorities of countries that could orient the implementation and drive the assessment of the 2030 Agenda for Sustainable Development in the years to come      Igniting Innovation Itzhak Goldberg, John Gabriel Goddard, Smita

Kuriakose, Jean-Louis Racine, 2011-09-22 Innovation and technology absorption are now firmly recognized as one of the main sources of economic growth for emerging and advanced economies alike International R D collaboration and FDI are critical and require government support programs specially financial ones      **Book Power in Communication, Sociology and**
