Science And The Business Of Living:

Routledge Revivals: John Phillips and the Business of Victorian Science (2005) Jack Morrell, 2016-10-04 First published in 2005 this book represents the first full length biography of John Phillips one of the most remarkable and important scientists of the Victorian period Adopting a broad chronological approach this book not only traces the development of Phillips career but clarifies and highlights his role within Victorian culture shedding light on many wider themes It explores how Phillips love of science was inseparable from his need to earn a living and develop a career which could sustain him Hence questions of power authority reputation and patronage were central to Phillips career and scientific work Drawing on a wealth of primary sources and a rich body of recent writings on Victorian science this biography brings together his personal story with the scientific theories and developments of the day and fixes them firmly within the context of wider society The Real Business of Living James Hayden Tufts, 1918 This Business of Living Cesare Pavese, Alma Elizabeth Murch, 1949 On June 23rd 1950 Pavese Italy's greatest modern writer received the coveted Strega Award for his novel *Among Women Only* On August 26th in a small hotel in his home town of Turin he took his own life Shortly before his death he methodically destroyed all his private papers His diary is all that remains and for this the contemporary reader can be grateful Contemporary speculation attributed this tragedy to either an unhappy love affair with the American film star Constance Dawling or his growing disillusionment with the Italian Communist Party His Diaries however reveal a man whose art was his only means of repressing the specter of suicide which had haunted him since childhood an obsession that finally overwhelmed him As John Taylor notes he possessed something much more precious than a political theory a natural sensitivity to the plight and dignity of common people be they bums priests grape pickers gas station attendants office workers or anonymous girls picked up on the street though to women the author could as he admitted be as misogynous as he was affectionate Bitter and incisive *This Business of Living* is both moving and painful to read and stands with James Joyce's *Letters* and Andre Gide's *Journals* as one of the great literary testaments of the twentieth century Cesare Pavese 1908-1950 was educated in Turin In 1930 he began to contribute essays on American literature to *La Cultura* of which he later became editor In 1935 he was imprisoned for anti fascist activities This experience formed the basis of *The Political Prisoner* Between 1936 and 1940 nine of his books were published in Italy these included novels short stories poetry and essays His books have been filmed and dramatized and translated into many languages John Taylor a frequent contributor to the *Times Literary Supplement* *Context* the *Yale Review* the *Antioch Review* the *Michigan Quarterly Review* and *Chelsea* has introduced numerous European writers and poets to English readers often for the first time Some of his works include *The Apocalypse* *Tapestries* *Paths to Contemporary French Literature* Volumes 1 and 2 and *Into the Heart of European Poetry* John Phillips and the Business of Victorian Science Jack Morrell, 2017-11-28 John Phillips was one of the most remarkable and important scientists of the Victorian period Orphaned at the age of seven and brought up by his uncle he rose to hold a

number of highly prestigious posts within the British academic and scientific community despite lacking a university education By the time of his death in 1874 he was widely regarded as one of the pioneers and champions of the science of geology yet until now there has been no full length biography of Phillips In rectifying this lacuna Jack Morrell has produced a meticulous and magisterial piece of scholarship that does justice to the achievements and legacy of John Phillips Adopting a broadly chronological approach the book not only traces the development of Phillips s career but clarifies and highlights his role within Victorian culture shedding light on many wider themes It explores how Phillips love of science was inseparable from his need to earn a living and develop a career which could sustain him Hence questions of power authority reputation and patronage were central to Phillips s career and scientific work Drawing on a wealth of primary sources and a rich body of recent writings on Victorian science this biography provides a fascinating and compelling account of John Phillips and his legacy Pulling together his personal story with the scientific theories and developments of the day and fixing them firmly within the context of wider society this biography will be vital reading for anyone with an interest in the history of British and nineteenth century science

Science Progress, 1922 The Emergence of Christian Science in American Religious Life Stephen Gottschalk, 2024-07-26 Christian Science is one of only two indigenous American religions the other being Mormonism Yet it has not always been examined seriously within the context of the history of religious ideas and the development of American religious life Stephen Gottschalk fills this void with an examination of Christian Science's root concepts the informing vision and the distinctive mission as formulated by its founder Mary Baker Eddy Concentrating on the quarter century preceding Eddy's death a period of phenomenal growth for Christian Science Gottschalk challenges the conventional academic view of the movement as a fringe sect He finds instead a serious and distinctive though radical religious teaching that began to flower just as orthodox Protestantism began to fade He gives a clear and detailed account of the rancorous controversies between Christian Science and the various mind cure and occult movements with which it is often associated and contends that Christian Science appealed to disenchanted Protestants because of its pragmatic quality a quality that relates it to the mainstream of American culture This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1973
