Communities of Science in Nineteenth-Century Ireland Juliana Adelman, 2016-09-12 The nineteenth century was an important period for both the proliferation of popular science and for the demarcation of a group of professionals that we now term scientists Of course for Ireland largely in contrast to the rest of Britain the prominence of Catholicism posed various philosophical questions regarding research Adelman's study examines the practical educational impact of the growth of science in these communities and the impact of this on the country's economy the role of museums and exhibitions in spreading scientific knowledge and the role that science had to play in Ireland's turbulent political context Adelman challenges historians to reassess the relationship between science and society showing that the unique situation in Victorian Ireland can nonetheless have important implications for wider European interpretations of the development of this relationship during a period of significant change

Science, Culture, and Modern State Formation Patrick Carroll,2006-10-02 Publisher description

Science and Empire in the Nineteenth Century Catherine Delmas,Christine Vandamme,2010-10-12 The issue at stake in this volume is the role of science as a way to fulfil a quest for knowledge a tool in the exploration of foreign lands a central paradigm in the discourse on and representations of Otherness The interweaving of scientific and ideological discourses is not limited to the geopolitical frame of the British empire in the nineteenth and early twentieth centuries but extends to the rise of the American empire as well The fields of research tackled are human and social sciences anthropology ethnography cartography phrenology which thrived during the period of imperial expansion racial theories couched in pseudo scientific discourse natural sciences as they are presented in specialised or popularised works in the press in travel narratives at the crossroads of science and literature in essays but also in literary texts Contributors examine such issues as the plurality of scientific discourses their historicity the alienating dangers of reduction fragmentation and reification of the Other the interaction between scientific

discourse and literary discourse the way certain texts use scientific discourse to serve their imperialist views or conversely deconstruct and question them Such approaches allow for the analysis of the link between knowledge and power as well as of the paradox of a scientific discourse which claims to seek the truth while at the same time both masking and revealing the political and economic stakes of Anglo saxon imperialism The analysis of various types of discourse and or representation highlights the tension between science and ideology between scientific objectivity and propaganda and stresses the limits of an imperialist epistemology which has sometimes been questioned in more ambiguous or subversive texts *Alice Munro* Mirosława Buchholtz,2016-01-20 The book offers a new approach to the study of Alice Munro s fiction Its innovative quality consists in juxtaposing a variety of literary analyses of selected stories with two other ways of looking at her fiction the perspectives of film adaptation and of pedagogy The book is divided into three parts which mirror the key words in the title understanding adapting and teaching Part One consists of four articles on various aspects of Munro s short fiction from a literary perspective Part Two four essays addresses editing and film adaptations of Munro s stories both television and feature films Part Three consists of an essay on didactic aspects of Munro s fiction and of several interviews with teachers of Canadian literature who have included stories by Munro in their syllabi **The Routledge Companion to Literature and Class** Gloria McMillan,2021-09-01 The Routledge Companion to Literature and Class offers a comprehensive and fresh assessment of the cultural impact of class in literature analyzing various innovative interdisciplinary approaches of textual analysis and intersections of literature including class subjectivities mental health gender and queer studies critical race theory quantitative and scientific methods and transnational perspectives in literary analysis Utilizing these new methods and interdisciplinary maps from field defining essayists students will become aware of ways to bring these elusive texts into their own writing as one of the parallel perspectives through which to view literature This volume will provide students with an insight into the history of the intersections of class theory of class and invisibility in literature and new trends in exploring class in literature These multidimensional approaches to literature will be a crucial resource for undergraduate and graduate students becoming familiar with class analysis and will offer seasoned scholars the most significant critical approaches in class studies Toward a Global Science Susantha Goonatilake,1998 Asian science such as mathematics Chinese printing gunpowder and the compass all contributed to the development of European science During the last few centuries however scientific contributions with Asian roots have diminished and been marginalized and deligitimised Yet the center of the world economy today is shifting to Asia with shifts in science and technology bound to follow Toward a Global Science is driven by the proposition that pre Renaissance acquisition of Asian knowledge did not exhaust Asian civilization s potential contribution There are many useful elements to modern science still lying hidden in Asian civilizational stores waiting to be mined The author gives details of recent contributions from South Asian medicine mathematics and psychology and explores how South Asian inputs can be useful in navigating the philosophical and ethical problems raised by two dominant

technologies of the future namely biotechnology and information technology As an illustrative example it describes how a fruitful marriage of one technology virtual reality with South Asian philosophy can enliven both the technology as well as philosophy It also examines how Asian positions could be used to feed some key contemporary philosophical discussions on science Using a model of the civilizational construction of science the book views science without Eurocentric blinders It documents how science was built initially by transfers from non European civilizations and why the given historiography of science has to be rethought Throughout the book the author gives examples of parallels and antecedents between East and West in science and estimates the potential reservoir of Asian knowledge in each field The book also deals with the many knotty problems in recovering science from past traditions The author distinguishes between his secular efforts from religious and other attempts that claim the equivalence of all knowledge systems

Alimi, 2019-10-07 Dedicated to the memory of Gregory M Maney Bringing Down Divides engages with and continues Maney's work on international conflicts peace and justice movements and community based research to explore three types of divides attributional divides ideological divides and epistemological divides

Outrageous Fortune Joe Cleary, 2007 Did Ireland produce a more radical and ambitious literature in the straitened circumstances of the first half of the twentieth century than it has managed to do since it began to modernize and become more affluent from the 1960s onwards Has Irish modernism ceded place to a prevailing naturalism that seems gritty and tough minded but that is aesthetically conservative and politically self thwarted Does the fixation with de Valera's Ireland in recent narrative represent a necessary settling of accounts with a dark abusive history or is it indicative of a worrying inability on the part of Irish artists and intellectuals to respond to the very different predicaments of the post Cold War world These are some of the questions addressed in Outrageous Fortune Scanning literature theatre film and music Joe Cleary probes the connections between capital culture and criticism in modern Ireland He includes readings of James Joyce and the Irish modernists the naturalists Patrick Kavanagh John McGahern and Edna O'Brien and comments too on what he terms the neo naturalism of Marina Carr Patrick McCabe and Martin McDonagh He concludes with a provocative analysis of the cultural achievement of the Pogues

Rethinking Northern Ireland David Miller, 2014-09-25 Rethinking Northern Ireland provides a coherent and critical account of the Northern Ireland conflict Most writing on Northern Ireland is informed by British propaganda unionist ideology or currently popular ethnic conflict paradigm which allows analysts to wallow in a fascination with tribal loyalty Rethinking Northern Ireland sets the record straight by reembedding the conflict in Ireland in the history of an literature on imperialism and colonialism Written by Irish Scottish and English women and men it includes material on neglected topics such as the role of Britain gender culture and sectarianism It presents a formidable challenge to the shibboleths of contemporary debate on Northern Ireland A just and lasting peace necessitates thorough re evaluation and Rethinking Northern Ireland provides a stimulus to that urgent task
