Science Experiments

Jacob Strickling

Science Experiments:

Make Science Fun: Experiments Jacob Strickling, 2017-11-06 Make Science Fun 2 intended for an older more serious age group of 8-15 is designed for children to do actual science experiments not just science activities at home. Most science experiment books aren't experiment books at all. They mostly contain fun science activities which are fun to do, help learn science, but a fun science activity isn't always an experiment. A science experiment sets out to answer a question or solve a problem using a fair and controlled test. To count as a science experiment, you need to take measurements, make observations, and control variables. With space to write hypotheses, record results, make observations, and draw graphs required. Make Science Experiments is a strong foundation on which to build student awareness of the importance of science in everyday lives.

SELLING POINTS Science experiments for the kitchen, garage, or workshop, bathroom, and garden. Bonus projects perfect for a science fair or school project. Projects using only basic products that can be found in every home kitchen or bathroom. Make Science Fun banishes the science is boring stereotype through fun experiments that children can do alone or with friends or parents. The author's YouTube channel *101 Great Science Experiments* Neil Ardley, 2014-12-15. Forget about mad scientists and messy laboratories. This incredible interactive guide for children showcases 101 absolutely awesome experiments you can do at home. Find out how to make a rainbow, build a buzzer, see sound, construct a circuit, bend light, play with shadows, measure the wind, weigh air, and create an underwater volcano. The astonishing variety of experiments are all very easy and entirely safe, with step-by-step text and everyday ingredients. Biology, chemistry, and physics are brought to life, showing budding young scientists that science is all around us all the time. As you have fun trying out experiments with friends and family, core scientific principles are presented in the most memorable way. With chapters covering important topics such as color, magnets, light, senses, electricity, and motion, the laws of science are introduced in crystal clear text alongside specially commissioned full-color photography for children to understand. Follow in the footsteps of Albert Einstein, Marie Curie, and all the other great minds with 101 Great Science Experiments and learn the secrets of science you'll never forget.

Smithsonian 10-Minute Science Experiments Media Lab Books, Steve Spangler, 2019-10-01. Smithsonian 10 Minute Science Experiments gives curious young readers dozens of colorful, exciting projects designed to teach them about the basics of science, physics, and chemistry. They'll learn about critical thinking, how to conduct an experiment, and how to measure results, all while enjoying themselves in a screen-free setting. Sidebars for each experiment feature additional insights, facts, and commentary.

FEATURES Full-color photos and illustrations. More than 50 fantastic experiments vetted by the scientists at the Smithsonian Institute. Sidebars of additional information, trivia, and fun facts.

365 Weird & Wonderful Science Experiments Elizabeth Snoke Harris, 2017-11-07. This fact and fun-filled book contains hundreds of simple, kid-tested science experiments, all of which can be done with items from around the house and require little to no supervision. Each experiment features safety precautions, materials needed, step-by-step instructions with illustrations, fun facts, and further
