scientific discourse and beyond it He demonstrates that the imaginative component of string theory is both integral and indispensable to it as a scientific discourse While mathematical arguments provide precise prompts for physical intervention in the world the imaginary that supplements mathematical argument within string theory technical discourse allows theorists to imagine themselves interacting with the cosmos as an abstract space in such a way that strings and branes as phenomena become substantiated and legitimized And it is precisely this sort of imaginary which Miller calls a scientific imaginary duly substantiated and acculturated that survives the move from string theory technical discourse to popularizations and ultimately to popular and literary discourses In effect a string theory imaginary legitimizes the science itself and helps to facilitate a virtual domestication of a cosmos that was heretofore remote alien and incomprehensible **Encyclopedia of**

[Feminism's Queer Temporalities](#) Sam McBean,2015-07-16 Despite feminism s uneven movements it has been predominantly understood through metaphors of generations or waves Feminism s Queer Temporalities builds on critiques of the limitations of this linear model to explore alternative ways of imagining feminism s timing It finds in feminism s literary and cultural archive narratives of temporality that might now be diagnosed as queer where queer designates modes of being historical that exceed the linear and the generational Few theorists have looked to popular feminist figures literature and culture to theorize feminism s timing Through methodologically creative readings McBean explores non generational anti linear and asynchronous time in the figure of Antigone Marge Piercy s Woman on the Edge of Time the film Ladies and Gentlemen The Fabulous Stains Valerie Solanas and SCUM Manifesto and Alison Bechdel s Fun Home The first to substantially bring together the ways in which time has come to matter in both feminist and queer disciplines this book will appeal to students and scholars of feminist queer and gender studies cultural studies and literary studies

The Poetry of Erasmus Darwin Martin Priestman,2016-02-24 While historians of science have focused significant attention on Erasmus Darwin s scientific ideas and milieu relatively little attention has been paid to Darwin as a literary writer In The Poetry of Erasmus Darwin Enlightened Spaces Romantic Times Martin Priestman situates Darwin s three major poems The Loves of the Plants 1789 The Economy of Vegetation 1791 and The Temple of Nature 1803 and Darwin himself within a large polymathic late Enlightenment network of other scientists writers thinkers and social movers and shakers Interpreting Darwin s poetry in terms of Darwin s broader sense of the poetic text as a material space he posits a significant shift from the Enlightenment s emphases on conceptual spaces to the Romantic period s emphases on historical time He shows how Darwin s poetry illuminates his stance toward all the major physical sciences and his well formulated theories of evolution and materially based psychology Priestman s study also offers the first substantial accounts of Darwin s mythological theories and their links to Enlightenment Rosicrucianism and Freemasonry and of the reading of history that emerges from the fragment poem The Progress of Society a first ever printed edition of which is included in an appendix Ultimately Priestman s book offers readers a sustained account of Darwin s polymathic Enlightenment worldview and cognate poetics in a period when texts are too often judged by their adherence to a retrospectively constructed Romanticism
