## **Science In Context Readings In The Sociology Of Science:**

*Science in Context* Barry Barnes, David O. Edge, 1982 This collection of eighteen readings provides a basic text for undergraduates taking sociology of science courses A general survey of articles published between 1961 and 1981 the book is also a useful overview for students taking courses in social and political studies of science science technology and society and social issues components of courses in the environmental sciences geography philosophy and history of science The editors have organized the book around the relationship between the subculture of science and the wider culture which surrounds it Looked at from this perspective science is primarily a source of knowledge and competence Thus to stress its interaction with its context not only highlights these aspects of science which most people find of overriding pragmatic interest but also raises important basic issues concerning credibility the distribution of authority in society and the nature of the interaction between different forms of culture Essays are grouped in five sections The Organization of Academic Science Communication and Control The Culture of Science The Interaction of Science and Technology The Interaction of Science and Society Science as Expertise The editors have added a general introduction part introductions bibliographical notes and a lengthy bibliography Barry Barnes is Lecturer at the Science Studies Unit University of Edinburgh and editor of an earlier version of this book *The Sociology of Science* published in the Penguin Sociology Readings series and now out of print David Edge is Director of The Science Studies Unit at the University of Edinburgh and a joint editor of the journal *Social Studies of Science*

**The Pharmaceutical Studies Reader** Sergio Sismondo, Jeremy A. Greene, 2015-05-11 The Pharmaceutical Studies Reader is an engaging survey of the field that brings together provocative multi disciplinary scholarship examining the interplay of medical science clinical practice consumerism and the healthcare marketplace Draws on anthropological historical and sociological approaches to explore the social life of pharmaceuticals with special emphasis on their production circulation and consumption Covers topics such as the role of drugs in shaping taxonomies of disease the evolution of prescribing habits ethical dimensions of pharmaceuticals clinical trials and drug research and marketing in the age of globalization Offers a compelling contextually rich treatment of the topic that exposes readers to a variety of approaches ideas and frameworks Provides an accessible introduction for readers with no previous background in this area The Practice Turn in Contemporary Theory Karin Knorr Cetina, Theodore R. Schatzki, Eike von Savigny, 2005-06-20 This book provides an exciting and diverse philosophical exploration of the role of practice and practices in human activity It contains original essays and critiques of this philosophical and sociological attempt to move beyond current problematic ways of thinking in the humanities and social sciences It will be useful across many disciplines including philosophy sociology science cultural theory history and anthropology Scientific Rationality: The Sociological Turn J.R. Brown, 2013-11-11

Knowledge Capitalism Nico Stehr, 2022-06-01 In his newest book Stehr builds on his classic book *Knowledge Societies* 1994 to expand the concept toward one of knowledge capitalism for a now much changed era It is not only because of the

onset of the Covid 19 pandemic that we are living in a new epoch it is the idea that modern societies increasingly constitute comprehensive knowledge societies under intensive capitalism whereby the legal encoding of knowledge through national and international law is the lever that enables the transformation of the knowledge society into knowledge capitalism The Trade Related Aspects of Intellectual Property Rights agreement negotiated between 1986 and 1994 as part of the World Trade Organization is the backbone of the modern society and marks a clear historical demarcation and although knowledge capitalism is primarily an economic development the digital giants who are in the driver s seat have significant effects on the social structure and culture of modern society *Handbook of Research methods and Applications in Environmental Studies* Matthias Ruth,2015-08-28 This Handbook presents methods to advance the understanding of interdependencies between the well being of human societies and the performance of their biophysical environment It showcases applications to material and energy use urbanization and tech Strategies of Expertise in Technical Controversies Frederick Frankena,1992 This work discusses the development of wood for electric power in response to the energy crisis Frankena studies the role and impact of technical expertise using an in depth case study and a comparative review of wood fired power plant controversies in the United States *Narrative Research in Health and Illness* Brian Hurwitz,Trisha Greenhalgh,Vieda Skultans,2008-04-15 This comprehensive book celebrates the coming of age of narrative in health care It uses narrative to go beyond the patient s story and address social cultural ethical psychological organizational and linguistic issues This book has been written to help health professionals and social scientists to use narrative more effectively in their everyday work and writing The book is split into three comprehensive sections Narratives Counter narratives and Meta narratives **Changing Order** Harry Collins,1992-06-15 This fascinating study in the sociology of science explores the way scientists conduct and draw conclusions from their experiments The book is organized around three case studies replication of the TEA laser detecting gravitational rotation and some experiments in the paranormal In his superb book Collins shows why the quest for certainty is disappointed He shows that standards of replication are of course social and that there is consequently no outside standard no Archimedean point beyond society from which we can lever the intellects of our fellows Donald M McCloskey *Journal of Economic Psychology* Collins is one of the genuine innovators of the sociology of scientific knowledge *Changing Order* is a rich and entertaining book Isis The book gives a vivid sense of the contingent nature of research and is generally a good read Augustine Brannigan *Nature* This provocative book is a review of Collins s work and an attempt to explain how scientists fit experimental results into pictures of the world A promising start for new explorations of our image of science too often presented as infallibly authoritative Jon Turney *New Scientist* **Splicing Life?** Peter Glasner,Harry Rothman,2017-07-05 This unique exploratory volume discusses the ethical cultural and philosophical issues surrounding the search for the book of life focusing in particular on the mapping of the human genome in Britain the USA and Europe *Towards an Environment Research Agenda* A. Winnett,2002-12-13 This is the second volume of papers in the topical area

of environmental management Arising from work done by the International Centre for the Environment at the University of Bath the papers address inter disciplinary environmental themes particularly from a business and management perspective

Museum Volunteers Sinclair Goodlad, Stephanie McIvor, 2005-08-08 Museum Volunteers is a practical handbook on the use of volunteers as interpreters within museums Drawing on key examples of outstanding practice from the UK and North America this book forms a unique resource on volunteerism This book reviews research on the changing priorities of museums examines a form of volunteering that has provided benefits to all participants in an activity similar to museum interpretation student tutoring describes and analyses the strengths of five exceptional volunteer programmes in Canada and the USA reports the finding of five volunteer programmes set up and managed by the authors in the Science Museum London examines the development process of the pilot studies and the consequent establishment of a permanent volunteer programme in the Science Museum London discusses the mutual benefits that volunteer programmes can bring to museums and volunteers offers suggestions on the practical day to day management and administration of volunteers This book is essential reading for anyone involved with the management and administration of a museum or is thinking of offering their services to a museum as a volunteer **Theories of Informetrics and Scholarly Communication** Cassidy R.

Sugimoto, 2016-02-22 Scientometrics have become an essential element in the practice and evaluation of science and research including both the evaluation of individuals and national assessment exercises Yet researchers and practitioners in this field have lacked clear theories to guide their work As early as 1981 then doctoral student Blaise Cronin published The need for a theory of citing a call to arms for the fledgling scientometric community to produce foundational theories upon which the work of the field could be based More than three decades later the time has come to reach out the field again and ask how they have responded to this call This book compiles the foundational theories that guide informetrics and scholarly communication research It is a much needed compilation by leading scholars in the field that gathers together the theories that guide our understanding of authorship citing and impact Realism and Anti-Realism Stuart Brock, Edwin

Mares, 2014-12-18 There are a bewildering variety of ways the terms realism and anti realism have been used in philosophy and furthermore the different uses of these terms are only loosely connected with one another Rather than give a piecemeal map of this very diverse landscape the authors focus on what they see as the core concept realism about a particular domain is the view that there are facts or entities distinctive of that domain and their existence and nature is in some important sense objective and mind independent The authors carefully set out and explain the different realist and anti realist positions and arguments that occur in five key domains science ethics mathematics modality and fictional objects For each area the authors examine the various styles of argument in support of and against realism and anti realism show how these different positions and arguments arise in very different domains evaluate their success within these fields and draw general conclusions about these assorted strategies Error theory fictionalism non cognitivism relativism and response dependence

are taken as the most important positions in opposition to the realist and these are explored in depth Suitable for advanced level undergraduates the book offers readers a clear introduction to a subject central to much contemporary work in metaphysics epistemology and philosophy of language **Freedom, Power and Political Morality** I. Carter, M.

Ricciardi, 2001-03-13 This collection of new essays on political and legal theory concentrates on themes dealt with in the work of Felix Oppenheim including fundamental political and legal concepts and their implications for the scope of morality in politics and international relations Among the issues addressed are the relationship between empirical and normative definitions of freedom power and interests whether governments are free to act against the national interest and whether they can ever be morally obliged to do so **Re-crafting Rationalization** Simon Locke, 2016-03-23 Re crafting

Rationalization contributes to debates relating to the public understanding of science regarding the conceptualization of the relationship between science and the public It challenges the prevailing science centred or top down framework that currently informs notions of public engagement and knowledge transfer offering an alternative that remains firmly grounded in the discourse of classical social theory By proposing an alternative version of rationalization to the standard interpretation of Weber's disenchantment thesis this book establishes the public understanding of science as a matter of fundamental sociological concern As such it redefines this field to emphasize public meanings of science engaging with a range of topics of major interest to the public and popular meaning of science including science and religion science fiction and fantasy fringe science and media representations of science Combining rhetorical analysis with ethnomethodology and membership categorization analysis the book outlines the basis of a new approach to the sociology of knowledge in the light of which Weber's rationalization thesis is radically re crafted in relation to studies of scientists discourse the rhetoric of science popularization and public usages of science This re crafted rationalization is applied in a series of detailed empirical studies of enchanted science creationism and intelligent design Scientology and reflexive spirituality superhero comics and mundane mysteries Fortean discourse conspiracy theory and media representations of the scientist in the case of Jack the Ripper Re crafting Rationalization therefore redresses a significant shortcoming in contemporary social theory which currently overlooks or misrepresents important public meanings of science whilst excluding popular culture from attention With profound implications for the ways in which we make sense of developments involving science this book will be of interest not only to sociologists and social theorists but also to those interested in popular culture and subcultures and the history philosophy and sociology of science **Human Institutions** Jonathan H. Turner, 2004-09-01 In recent years the New

Institutionalism has focused more on organizations in their social and cultural environments than on societal level institutional systems Thus missing from these studies has been a larger sociological analysis of institutions per se In his newest book leading social theorist Jonathan H Turner offers a creative richly grounded reinterpretation of social evolution He resurrects a level of analysis undertaken by earlier functionalist theorists but with a new found emphasis that of

discovering the larger forces driving the formation of human institutional systems Only by exploring the larger macro dynamics can the institutions of economy kinship religion polity law and education be fully understood as Turner persuasively shows in this magisterial explication of twenty millenia of human social life     *The Work in the World* Michael R. Curry, 1996 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible to scholars students researchers and general readers Rich with historical and cultural value these works are published unaltered from the original University of Minnesota Press editions The books offered through Minnesota Archive Editions are produced in limited quantities according to customer demand and are available through select distribution partners     *Nano Meets Macro* Kamilla Kjolberg, Fern Elizabeth Wickson, 2019-10-10 This book explores the enormous diversity in social perspectives on the emergence of nanoscale sciences and technologies It points to four nodes of interest where nano meets macro in the making in the public eye in the big questions and in the tough decisions Each node draws attention to important lines of research and pertinent issues The book is designed for interdisciplinary teaching but the richness of issues and perspectives makes it of interest to all researchers practitioners and non academics wanting an introduction to social perspectives on nanoscale sciences and technologies     *New Directions in Economic Methodology* Roger Backhouse, 1994 In recent years there has been a flowering of work on economic methodology However there is no longer any consensus about which direction this should take or indeed even what the role and content of economic methodology should be This book reflects this diversity Its contributors are responsible for the major developments in this field and together they give an account of all the major positions which currently prevail in economic methodology These include attempts to rehabilitate the falsification of Kuhn Lakatos and Popper sociology of knowledge approaches different forms of realism contributions from the rhetoric project and other perspectives which view the economy as a text
