Science, Life and Christian Belief Malcolm A. Jeeves, Robert James Berry, 1998 Science Life and Christian Belief is an overview of the two books of God nature and Scripture showing they give complementary descriptions of one single reality

SCM Core Text: Christianity and Science John D. Weaver, 2013-02-11 The SCM Core Text Christianity Science provides an advanced introduction to the lively debate between the relative truth claims made by science and the absolute truth claims made by religions and Christianity in particular The author examines the interaction between science and the Christian faith and explores the place of faith in an age of science John Weaver himself a scientist explores the responses of the Christian faith to scientific advances particularly as they impinge upon an understanding of God and human nature Contemporary issues such as cloning stem cell research GM crops global climate change and ecological destruction new research on the origins of life and the issue of suffering brought about by natural evil such as the Boxing Day tsunami are covered in this accessible and student friendly textbook It is designed to communicate information clearly and accessibly using chapter summaries diagrams and questions for further reading as well as suggestions for further reading at the close of chapters

Psychological Science and Christian Faith Malcolm A. Jeeves, Thomas E. Ludwig, 2018-04-20 Is it possible to integrate scientific psychology with a Christian understanding of human nature Are science and religion locked in an inevitable conflict or is there an underlying harmony between these two sources of knowledge about humans This book goes to the heart of the past and present dialogue between Christianity and psychology comparing three models that have been used to describe the relationship between them Because Christianity and psychology deal with different levels of truth and speak vastly different languages efforts to unify them often create more problems than they solve What is needed is a better way to think about the relationship an approach that does justice to the emerging insights from psychological science and biblical scholarship and that can enrich our understanding of both In this volume two accomplished psychologists show how this complementary dialogue can unfold giving us a broader deeper understanding of ourselves our relationships and our place in the cosmos

After the Monkey Trial Christopher M. Rios, 2014-08-28 In the well known Scopes Monkey Trial of 1925 famously portrayed in the film and play *Inherit the Wind* William Jennings Bryan s fundamentalist fervor clashed with defense attorney Clarence Darrow s aggressive agnosticism illustrating what current scholars call the conflict thesis It appeared regardless of the actual legal question of the trial that Christianity and science were at war with each other Decades later a new generation of evangelical scientists struggled to restore peace After the Monkey Trial is the compelling history of those evangelical scientists in Britain and America who unlike their fundamentalist cousins supported mainstream scientific conclusions of the world and resisted the anti science impulses of the era This book focuses on two organizations the American Scientific Affiliation and the Research Scientists Christian Fellowship today Christians in Science who for more than six decades have worked to reshape the evangelical engagement with science and redefine what it means to be a creationist

Perspectives on Science and Christian Faith, 2002

Divine Action and Modern Science Nicholas Saunders, 2002-10-31 Divine Action and Modern Science considers the relationship between the natural sciences and the concept of God acting in the world Nicholas Saunders examines the Biblical motivations for asserting a continuing notion of divine action and identifies several different theological approaches to the problem He considers their theoretical relationships with the laws of nature indeterminism and probabilistic causation His book then embarks on a radical critique of current attempts to reconcile special divine action with quantum theory chaos theory and quantum chaos As well as considering the implications of these problems for common interpretations of divine action Saunders also surveys and codifies the many different theological philosophical and scientific responses to divine action The conclusion reached is that we are still far from a satisfactory account of how God might act in a manner that is consonant with modern science despite the copious recent scholarship in this area

Genetic Turning Points James C.

Peterson, 2001 *Genetic Turning Points* is an outstanding study of the problem of genetic engineering and related ethical issues. It addresses difficult and sometimes technical matters in a style that is both clear and scholarly and it provides valuable insights into issues that are being thrust to the fore by scientific progress. Genes store the directions for all life on earth. If you want to know where we might be going, read this book. It is a road map that can save you from many ill-fated journeys. William R. Shea **Marriage, Family and Relationships** Thomas A. Noble, Sarah K. Whittle, Philip S.

Johnston, 2017-06-15 Family life has undergone revolutionary changes in Western society in the last sixty years, posing both theological and ethical challenges for the contemporary church. This book responds with wide-ranging essays on sexuality, marriage, family life, singleness, same-sex relationships, violence against women, anthropology, gender, and culture. These chapters are essential reading for anyone concerned with Christian teaching on marriage and the family. They balance a clear loyalty to the church's historic and biblical teaching with a recognition that all doctrine is contextualized. There is a growing gap between the ethics of many Christians and those of wider society. So Christians have to be counter-cultural. But the church also has to be self-critical, differentiating between biblical revelation and cultural development. And it must know how to present unchanging Christian convictions to a constantly changing society. The contributors are Andy Angel, Daniel Block, Rosalind Clarke, Barry Danylak, Andrew Goddard, Stephen Holmes, David Instone-Brewer, A. T. B. McGowan, Nicholas Moore, Onesimus Ngundu, Oliver O'Donovan, Ian Paul, Andrew Sloane, Katy Smith, Elaine Storkey, and Sarah Whittle **Living in the Lamblight** Hans Boersma, 2001-01-08 In recent decades many fundamental Christian assumptions about the nature of God and the world have come under attack. No longer can one assume even in many church circles that historic Christian beliefs about the Trinity and providence are generally accepted or understood. Scientific knowledge and new technologies have also presented challenges for the church. How, for example, should Christians understand the ecological crisis? And how should the opening chapters of Genesis be understood in an age of genetic research and evolutionary science? This collection of essays attempts to chart a faithful path for postmodern Christians, exploring the foundational ideas and concepts of a Christian worldview and suggesting their implications for Christian living today. Contributors: Hans Boersma, John Cooper, Marva J. Dawn, Michael W. Goheen, Christopher D. Marshall, Arnold E. Sikkema, John G. Stackhouse Jr., Rikki E. Watts, John R. Wood.

Beyond Determinism and Reductionism Mark L. Y. Chan, Roland Chia, 2003 This new volume in ATF Press's Science and Theology series assesses the impact of genetic science and stem cell research on the Christian understanding of the human person. **Some Have Babies; Others, Regrets!** Philip P. Eapen, 2010-03-20 *Some Have Babies Others Regrets* examines the relevance of the creation mandate for human beings to multiply and fill the earth in today's world. It evaluates popular notions about the world being overpopulated in the light of available scientific evidence.

The Gender Conversation Edwina Murphy, David Ian Starling, 2016-05-13 Conversations about gender both inside and outside the church can frequently degenerate into stale and rancorous disputes in which predictable arguments are traded back and forth or fade awkwardly.

away into the tense silences of mutual misunderstanding But the issue is an important one and calls for a better conversation than either of those alternatives In September 2015 Morling College hosted a one day symposium entitled The Gender Conversation A rich and diverse mix of contributors met to discuss issues of gender theology and Christian living within a shared framework of evangelical conviction Our aim in hosting the symposium was to deepen mutual understanding and respect highlight common ground clarify points of difference and unite us all in a quest to learn from the Scriptures and live in the light of the gospel This book brings together the papers presented at the symposium and the contributors responses to one another as a resource for further reflection and discussion

Macroevolution, Contingency, and Divine Activity

Bradford McCall, 2023-10-27 What are the things that God values in the creative process How does one define God's activity in such a world How is God's involvement different from a contingent what this author labels contingentist instance Why do we need a God idea at all Herein Bradford McCall addresses how divine amorepotent love works with and within a contingentist i e radically contingent evolutionary theory and worldview Within the course of this project he reaches a via media between the somewhat radical formalist position of Simon Conway Morris and the veritably radical contingent position of Stephen Jay Gould But how is the contingentist amorepotent and uncontrolling love of God understood as purposeful McCall argues in detail that there in fact is some sort of purposiveness that is nevertheless working in a chastened Gouldian position and he distinguishes between contingency and veritable divine involvement He contends that God does not insist upon a particular outcome but merely allows propensities to work themselves out God amorepotently loves the population of the natural world into greater forms of complexity relationality and beauty in varied and multifarious forms along with the extension of diversity

Godly Love Matthew T. Lee, Amos Yong, 2012-01-01 *Godly Love Impediments and Possibilities* examines the theory of Godly Love understood as including a vertical axis denoting the love of God and a horizontal axis involving the love of others is at the core of a new field of research that studies how divine love influences the love of others and vice versa It is a multidisciplinary research program into the benevolent expressions of the Great Commandment of the Christian tradition involving the theological and social sciences Theological and social scientific essays that ask why there is not more Godly Love in this world and what might be done to change the situation This book focuses on the problems confronting challenging prohibiting and perhaps even resisting the concrete expression of Godly Love in the world utilizing a range of theological and especially social scientific methodologies

Trinity After Pentecost

William P Atkinson, 2014-07-31 *Trinity After Pentecost* considers the triune God from a Pentecostal viewpoint In so doing it offers a fresh articulation of the theology of the Trinity taking the Holy Spirit as its starting point It concludes that the Trinity cannot be adequately appreciated using any single model whether social modal or psychological Instead it presents three models relational instrumental and substantial that must be held in paradoxical tension with one another to gain insight into the Trinity Of these the relational model is the foremost Pentecost offers rich potential for seeing the relations between the

Father the Son and the Spirit as a dynamic reciprocal dance in which each Person empties their self in order to exalt the others

The Body God Gives Robert S. Smith, 2025-02-19 What is the relationship between sex and gender Understand society's shifts in thinking and talking about sex and gender Discover how biological sex guides gender Recognize how the Bible speaks to gender and transgender Respond to affirming interpretations of Scripture Answer gender confusion with clarity and compassion In *The Body God Gives: A Biblical Response to Transgender Theory* Robert S. Smith argues that God intends a person's gender to be grounded in the reality of his or her biological sex the body God has given In making his case Smith critiques the central claim of transgender theory that the sexed body does not determine the gendered self He also evaluates contemporary changes in thought and speech about sex and gender responding to modern confusion with biblical conviction and compassion God speaks clearly both in his word and in his world
