The Relation Between Religion and Science

Angus Stewart Woodburne,1920

The Scientific Revolution in National Context Roy Porter,1992-09-25

The scientific revolution of the sixteenth and seventeenth century continues to command attention in historical debate Controversy still rages about the extent to which it was essentially a revolution of the mind or how far it must also be explained by wider considerations In this volume leading scholars of early modern science argue the importance of specifically national contexts for understanding the transformation in natural philosophy between Copernicus and Newton Distinct political religious cultural and linguistic formations shaped scientific interests and concerns differently in each European state and explain different levels of scientific intensity Questions of institutional development and of the transmission of scientific ideas are also addressed The emphasis upon national determinants makes this volume an interesting contribution to the study of the Scientific Revolution

Science and Sound in Nineteenth-Century Britain Edward J. Gillin,2023-12-22

Sound and Science in Nineteenth Century Britain is a four volume set of primary sources which seeks to define our historical understanding of the relationship between British scientific knowledge and sound between 1815 and 1900 In the context of rapid urbanization and industrialization as well as a growing overseas empire Britain was home to a rich scientific culture in which the ear was as valuable an organ as the eye for examining nature Experiments on how sound behaved informed new understandings of how a diverse array of natural phenomena operated notably those of heat light and electro magnetism In nineteenth century Britain sound was not just a phenomenon to be studied but central to the practice of science itself and broader understandings over nature and the universe This collection accompanied by extensive editorial commentary will be of great interest to students and scholars of the History of Science
