Literature, Writing, and the Natural World James Guignard, T. P. Murphy, 2020-06-12 The English Association of Pennsylvania State Universities held its annual meeting in 2006 at Mansfield University in Pennsylvania The conference theme was Literature Writing and the Natural World This collection grows out of the conference and indicates the desire to understand all aspects of our relationship with the natural world the function of literature in clarifying that relationship in ways science and politics cannot and the role of the literature teacher scholar wanting to respond to pressures of environmental change In these times interpretation is a vital task not only for the way it educates us about our attitudes toward nature but because it develops the crucial skills of looking closely engaging reflecting and responding One could argue that as a culture Americans are behind the curve in understanding the ways we depend upon a healthy relationship with nature and one way among many depends upon examining it through texts and textual representation When the writers here dig into The Main Woods Jayber Crow the poetry of Pablo Guevara or the movie Crash they are contributing to our understanding of the ways in which we view nature and how that view plays a role in the way we relate to nature These days many disciplines engage global warming and other environmental issues routinely and the literature classroom should be no different Just as we read a book and address fundamental themes such as What does it mean to love or How do we develop identity we should also be asking What is my responsibility when I decide what resources to use If we understand literature as equipment for living in a warming world we may be able to help students make some sense out of their world and some decisions about how to act

Love Story D. A. Fletcher, 2012-06-20 Being a Christian does not mean never having to say you're sorry that's ridiculous In fact we American Christians may have so much to apologize for before we can begin to mount an apologetic we seem to have lost our voice with the lost and all credibility for the Gospel In each our own individual act of idolatry we have each chosen our own Jesus to match our beliefs rather than choosing our beliefs to match Jesus We have recreated God in our own image and we have lost our way Love Story isolates on some large vitally important ways that we have drifted from our faith making it much more American than Godly we have become idolators of individualism freedom democracy capitalism and even idolators of America

itself We have little understanding of suffering little to say about the meaning of life and we've missed entirely the spectacular nature of the universe and life We have much to unlearn before we can dare to speak of our faith *God's Action in Nature's World* Nathan Hallanger, 2016-04-22 In 1981 Robert John Russell founded what would become the leading center of research at the interface of science and religion the Center for Theology and the Natural Sciences Throughout its twenty five year history CTNS under Russell's leadership has continued to guide and further the dialogue between science and theology Russell has been an articulate spokesperson in calling for creative mutual interaction between the two fields *God's Action in Nature's World* brings together sixteen internationally recognized scholars to assess Robert Russell's impact on the discipline of science and religion Focusing on three areas of Russell's work methodology cosmology and divine action in quantum physics this book celebrates Robert John Russell's contribution to the interdisciplinary engagement between the natural sciences and theology *Park Science* ,1994 **Remythologizing Theology** Kevin J. Vanhoozer, 2010-01-14 The rise of modern science and the proclaimed death of God in the nineteenth century led to a radical questioning of divine action and authorship Bultmann's celebrated demythologizing Remythologizing Theology moves in another direction that begins by taking seriously the biblical accounts of God's speaking It establishes divine communicative action as the formal and material principle of theology and suggests that interpersonal dialogue rather than impersonal causality is the keystone of God's relationship with the world This original contribution to the theology of divine action and authorship develops a fresh vision of Christian theism It also revisits several long standing controversies such as the relations of God's sovereignty to human freedom time to eternity and suffering to love Groundbreaking and thought provoking it brings theology into fruitful dialogue with philosophy literary theory and biblical studies **Reinventing Eden** Carolyn Merchant, 2013 Visionary quests to return to the Garden of Eden have shaped Western culture from Columbus voyages to today's tropical island retreats Few narratives are so powerful and as Carolyn Merchant shows so misguided and destructive as the dream of recapturing a lost paradise A sweeping account of these quixotic endeavors by one of America's leading environmentalists Reinventing Eden traces the idea of rebuilding the primeval garden from its origins to its latest incarnations in shopping malls theme parks and gated communities With eloquence and insight Merchant shows how the drive to conquer nature and to explore and settle the globe springs from this utopian pastoral impulse throughout Western history Time and again human manipulation of the environment is our downfall Eden is achieved by fencing off pristine beauty in national parks and wildlife preserves while leaving the majority of the earth in ruins Challenging both narratives Merchant argues that the green veneer of city park conservation has become a cover for the corruption of the earth and the neglect of its environment Reinventing Eden is a bold new way to think about the earth that includes green political parties sustainable development and a partnership between humans and earth that is nothing short of an ecological revolution *The Design of Science, Evolution, the Environment, and Redemption* Jim Keck, 2022-07-18 Don't send your kids off to college without this book especially if they

will be engaged in the sciences or philosophy The Design of Science Evolution the Environment and Redemption will clarify the differences scientific basis and logical foundation for the two most dominating and competing worldviews we have adopted in western society nowadays namely science and religion After reading this book you will be able to better understand articulate and defend what you believe and why As a society in general we need to understand the basis of our morality and culture and how science and religion each have a role to play Just a few of the types of questions answered are Is there really competition and conflict between science and religion What is the technological and philosophical scope of science How does our worldview affect the development of morality and virtue both individually and collectively Do we really need to be concerned about global environmental changes Which type of worldview does the best job of providing answers to the tough questions on origin purpose environmental issues morality government and eternity Is a belief in God and the Bible part of the evolutionary process Written by a mechanical engineer with more than thirty years of design and R D experience The Design of Science Evolution the Environment and Redemption lays out in a clear concise easy to read and entertaining manner much of the science logic and data used by academia and the media to answer life s toughest questions as compared to the biblical Judeo Christian tradition This book explores how we can measure the truthfulness accuracy and scope of these worldviews and how they can affect us personally spiritually and culturally The answers are logically spiritually and technically robust as well as just plain surprising in many ways

Cultural Politics of Targeted Killing Kyle

Grayson,2016-07-15 The deployment of remotely piloted air platforms RPAs or drones has become a defining feature of contemporary counter insurgency operations Scholarly analysis and public debate has primarily focused on two issues the legality of targeted killing and whether the practice is effective at disrupting insurgency networks and the intensive media and activist scrutiny of the policy processes through which targeted killing decisions have been made While contributing to these ongoing discussions this book aims to determine how targeted killing has become possible in contemporary counter insurgency operations undertaken by liberal regimes Each chapter is oriented around a problematisation that has shaped the cultural politics of the targeted killing assemblage Grayson argues that in order to understand how specific forms of violence become prevalent it is important to determine how problematisations that enable them are shaped by a politico cultural system in which culture operates in conjunction with technological economic governmental and geostrategic elements The book also demonstrates that the actors involved what they may be attempting to achieve through the deployment of this form of violence how they attempt to achieve it and where they attempt to achieve it are also shaped by culture The book demonstrates how the current social relations prevalent in liberal societies contain the potential for targeted killing as a normal rather than extraordinary practice It will be of great use for academic specialists and graduate students in international studies geography sociology cultural studies and legal studies

The Postmodern Adventure Steven

Best,Douglas Kellner,2020-12-18 This compelling book explores the challenges to theory politics and human identity that we

face on the threshold of the third millennium It follows on the successor of Best and Kellner's two previous books *Postmodern Theory* acclaimed as the best critical introduction to the field and *The Postmodern Turn* which provides a powerful mapping of postmodern developments in the arts politics science and theory In *The Postmodern Adventure* Best and Kellner analyze a broad array of literary cultural and political phenomena from fiction film science and the Internet to globalization and the rise of a transnational image culture

Darwin's Nemesis William A. Dembski, 2006-02-22 Eighteen essays review and celebrate the life and thought of Phillip Johnson the Cal Berkeley legal scholar who became a leading figure in the intelligent design movement

God After Darwin John F. Haught, 2018-05-04 In *God After Darwin* eminent theologian John F. Haught argues that the ongoing debate between Darwinian evolutionists and Christian apologists is fundamentally misdirected Both sides persist in focusing on an explanation of underlying design and order in the universe Haught suggests that what is lacking in both of these competing ideologies is the notion of novelty a necessary component of evolution and the essence of the unfolding of the divine mystery He argues that Darwin's disturbing picture of life instead of being hostile to religion as scientific skeptics and many believers have thought it to be actually provides a most fertile setting for mature reflection on the idea of God Solidly grounded in scholarship Haught's explanation of the relationship between theology and evolution is both accessible and engaging The second edition of *God After Darwin* features an entirely new chapter on the ongoing controversial debate between intelligent design and evolution including an assessment of Haught's experience as an expert witness in the landmark case of *Kitzmiller v Dover Area School District* on teaching evolution and intelligent design in schools

Reframing Providence Simon Maria Kopf, 2023 The doctrine of providence which states that God guides his creation has been widely conceived in action terms in recent theological scholarship Instead of recalibrating the much discussed non interventionist objective divine action NIODA approaches Simon Maria Kopf advocates a reframing of providence in terms of the virtue of prudence

Rethinking Environmental Law Laitos, Jan G., 2021-08-27 Challenging historic assumptions about human relationships with nature Jan G. Laitos examines how environmental laws have addressed environmental problems in the past and the reasons for the laws inability to successfully prevent environmental contamination and alterations of critical environmental systems This forward thinking book offers a creative and organic alternative to traditional but ultimately unsuccessful environmental rules It explains the need for a new generation of environmental laws grounded in the universal laws of nature which might succeed where past and current approaches have largely failed

Visions of Nonlinear Science in the 21st Century Jose L. Huertas, Wai-Kai Chen, Rabinder N. Madan, 1999 Authoritative and visionary this festschrift features 12 highly readable expositions of virtually all currently active aspects of nonlinear science It has been painstakingly researched and written by leading scientists and eminent expositors including L. Shilnikov, R. Seydel, I. Prigogine, W. Porod, C. Mira, M. Lakshmanan, W. Lauterborn, A. Holden, H. Haken, C. Grebogi, E. Doedel, and L. Chua each chapter addresses a current and intensively researched area of nonlinear science and chaos including nonlinear

dynamics mathematics numerics and technology Handsomely produced with high resolution color graphics for enhanced readability this book has been carefully written at a high level of exposition and is somewhat self contained Each chapter includes a tutorial and background information as well as a survey of each area s main results and state of the art Of special interest to both beginners and seasoned researchers is the identification of future trends and challenging yet tractable problems that are likely to be solved before the end of the 21st century The visionary and provocative nature of this book makes it a valuable and lasting reference

Children's Books in Print, 1993

Russian Studies and Comparative Politics Frederic J. Fleron Jr., 2016-12-27 This book brings together several of the author s empirical studies that demonstrate the strength and utility of sociologist Robert Merton s classic middle range theory for understanding aspects of both Soviet and post Soviet Russian politics Some of those studies demonstrate that testing middle range social science theory could take place even in the Soviet era when there were significant limitations of access to empirical data and meaningful field research in the USSR was all but impossible In the introductory chapter the author explains the need for and advantages of studying Russian and Soviet politics from the perspective of middle range social science theory Then follow three chapters analyzing methodological issues in Soviet post Soviet studies The author presents his six empirical studies employing middle range social science theories to explore in Russia USSR dimensions of organizations ideology and decisionmaking technology transfer and cultural diffusion political culture public opinion and democratization and congruence of authority patterns in state society relations The book concludes with a chapter arguing the advantages of thinking theoretically about Russian and Soviet politics with the establishment of a new epistemic community organized around studies employing middle range theory This book presents examples of solutions to long standing debates between area studies and the academic disciplines and between idiographic and nomothetic approaches to knowledge in the social sciences In contrast to the tradition of Carnivals and Cockfights in Russian Soviet area studies since the mid 20th Century the book offers a new way of approaching the study of Russian politics for the 21st Century

Knowing Capitalism Nigel Thrift, 2005-01-26 This is an ambitious original and complex

treatment of key aspects of contemporary capitalism It makes a major contribution because it profoundly destabilizes the scholarship on globalization the so called new economy information technology distinct contemporary business cultures and practices Saskia Sassen author of Globalization and its Discontents Nigel Thrift offers us the sort of cultural analysis of global capitalism that has long been needed one that emphasizes the innovative energy of global capitalism The book avoids stale denouncements and offers instead a view of capitalism as a form of practice Karin Knorr Cetina Professor of Sociology University of Konstanz Germany Capitalism is well known for producing a form of existence where everything solid melts into air But what happens when capitalism develops theories about itself Are we moving into a condition in which capitalism can be said to possess a brain These questions are pursued in this sparkling and thought provoking book Thrift looks at what he calls the cultural circuit of capitalism the mechanism for generating new theories of capitalism The book traces the rise of this circuit back to the 1960s when a series of institutions locked together to interrogate capitalism to the present day when these institutions are moving out to the Pacific basin and beyond What have these theories produced How have they been implicated in the speculative bubbles that characterized the late twentieth century What part have they played in developing our understanding of human relations Building on an inter disciplinary approach which embraces the core social sciences Thrift outlines an exciting new theory for understanding capitalism His book is of interest to readers in geography social theory anthropology and cultural economics
