## Science Plus Pupil:

Aspects of Teaching and Learning in Secondary Schools Hilary Bourdillon, Anne Storey, 2013-07-04 This textbook heads the Open University's flexible PGCE Perspectives on Practice series which provides a practical illustration of skills knowledge and understanding required to teach in the secondary classroom. As well as describing concepts and ideas, the book provides a critical examination of some of the key issues and will encourage the reader to engage with the ideas and consider their views and beliefs. This book accompanies each of the subject-specific books in the series, providing a valuable link between disciplines. The series complements our other OU series Teaching in the Secondary School which addresses theoretical issues relating to teaching. Together, these two series provide a complete resource for students. Content-Based Instruction in

Foreign Language Education Stephen B. Stryker, Betty Lou Leaver, 1997-09-01 This book offers concrete and practical ideas for implementing content-based instruction using subject matter rather than grammar through eleven case studies of cutting-edge models in a broad variety of languages, academic settings, and levels of proficiency. The highly innovative models illustrate content-based instruction programs for both commonly and less commonly taught languages: Arabic, Croatian, French, German, Indonesian, Italian, Russian, Serbian, and Spanish, and for proficiency levels ranging from beginners to fluent speakers. They include single teacher and multi teacher contexts and such settings as typical language department classrooms, specialty schools, intensive language programs, and university programs in foreign languages across the curriculum. All of the contributors are pioneers and practitioners of content-based instruction, and the methods they present are based on actual classroom experiences. Each describes the rationale, curriculum design, materials, and evaluation procedures used in an actual curriculum and discusses the implications of the approach for adult language acquisition.
