Naval Research Reviews ,1966 The Sounding of the Whale D. Graham Burnett,2012-01-09 This wonderful book documents the interplays among science conservation and politics in the evolving career of the whale over the last century William Perrin Senior Scientist for Marine Mammals at the Southwest Fisheries Science Center NOAA Fisheries Service From biblical times whales have breached in the human imagination as looming figures of terror power confusion and mystery In the twentieth century however our understanding of and relationship to these superlatives of creation underwent some astonishing changes and with The Sounding of the Whale D Graham Burnett tells the fascinating story of the transformation of cetaceans from grotesque monsters useful only as wallowing kegs of fat and fertilizer to playful friends of humanity bellwethers of environmental devastation and finally totems of the counterculture in the Age of Aquarius When Burnett opens his story ignorance reigns even Nature was misclassifying whales at the turn of the century and the only biological study of the species was happening in gruesome Arctic slaughterhouses But in the aftermath of World War I an international effort to bring rational regulations to the whaling industry led to an explosion of global research and regulations that while well meaning were quashed or widely flouted by whaling nations the first shot in a battle that continues to this day The book closes with a look at the remarkable shift in public attitudes toward whales that began in the 1960s as environmental concerns and new discoveries about whale behavior combined to make whales an object of sentimental concern and public adulation A sweeping history grounded in nearly a decade of research The Sounding of the Whale tells a remarkable story of how science politics and simple human wonder intertwined to transform the way we see these behemoths from below **Scientific American** ,1888 **Discovery** , Rescue by Discovery Beatrice Cowan,2025-03-06 In late November 1935 the American explorer Lincoln Ellsworth left Dundee Island at the north of the Antarctic Peninsula With his pilot Hubert Hollick Kenyon his intention was to cross the Antarctic and reach the abandoned American base at Little America Soon the Americans lost contact with the rest of the world and when no word came from them the Commonwealth Government of Australia called on the government of the United Kingdom to send a ship to effect a rescue Britain s response was considered a last flourish of empire as much political as humanitarian This book now describes often for the first time the plans and counter plans the conflicts and the challenges which lay behind the remarkable way in which the research ship RRS Discovery II a ship outwardly unsuited to the task interrupted a carefully planned programme of scientific research to find the Americans and aided by outstanding airmen from the RAAF bring them back to the waiting world **"Discovery" Expedition** Great Britain "Discovery" Committee,1927 **The Coral Reef Era: From Discovery to Decline** James Bowen,2015-01-06 On 4 June 1629 the Batavia pride of the Dutch East India Company Fleet was wrecked on her maiden voyage in a seemingly empty expanse of the Indian Ocean The question how did this happen led to 300 years of investigation by those curious to solve the enigma what are corals and how are coral reefs formed Relying heavily on primary

source material Part 1 traces the sequential evolution of scientific thought and practice as the author explores the way this evolution is reflected in the search for understanding corals At each stage answers lead to fresh questions that challenge investigators to solve the riddle and new branches of science emerge Then with the first enigma finally understood a new enigma arose Why are Reefs dying Part 2 traces the range of problems that have emerged in the past 50 years as marine ecological reef and climate scientists attempt to put the pieces of the jigsaw together Is there a new canary in the coal mine warning of the fate of the world as we know it if man's impact on his environment continues unchecked Outlook, 1913

New Outlook, 1913 **The Outlook**, 1913 Voyages of Discovery and Research Within the Arctic Regions Sir John Barrow, 1855 Scientific and Religious Habits of Mind Ron Good, 2005 The open inquiring nature of science is fundamentally incompatible with the closed authoritarian nature of most religious training Reasons for rejection of personal god concepts by Charles Darwin Albert Einstein and Bertrand Russell are used by this author to underline this incompatibility and to show how each of these important scientists came to reject organized religion Conflicts between scientific and religious habits of mind are described and ideas for education are offered Common assumptions about our natural environment and human nature are shown to be obstacles to scientific literacy and to a sound liberal education Research on the nature of the relationship between scientific and religious habits of mind is proposed recognizing the potential incompatibilities between these important influences in society **Oceanographic History** Keith Rodney Benson, Philip F. Rehbock, 2002 From a study of knowledge of the sea among indigenous cultures in the South Seas to inquiries into the subject of sea monsters from studies of Pacific currents to descriptions of ocean going research vessels the sixty three essays presented here reflect the scientific complexity and richness of social relationships that characterize oceanographic history Based on papers presented at the Fifth International Congress on the History of Oceanography held at the Scripps Institution of Oceanography the first ICHO meeting following the cessation of the Cold War the volume features an unusual breadth of contributions Oceanography itself involves the full spectrum of physical biological and earth sciences in their formal empirical and applied manifestations The contributors to Oceanographic History The Pacific and Beyond undertake the interdisciplinary task of telling the story of oceanography's past drawing on diverse methodologies Their essays explore the concepts techniques and technologies of oceanography as well as the social economic and institutional determinants of oceanographic history Although focused on the Pacific the geographic range of subjects is global and includes Micronesia East Africa and Antarctica the bathymetric range comprises inshore fisheries coral reefs and the azoic zone The seventy one contributors represent every continent of the globe except Antarctica bringing together material on the history of oceanography never before published **Science, Empire and the European Exploration of the Pacific** Tony Ballantyne, 2018-10-24 This collection of essays assesses the interrelationship between exploration empire building and science in the opening up of the Pacific Ocean by Europeans between the early 16th and mid 19th century It explores both

the role of various sciences in enabling European imperial projects in the region and how the exploration of the Pacific in turn shaped emergent scientific disciplines and their claims to authority within Europe Drawing on a range of disciplines from the history of science to geography imperial history to literary criticism this volume examines the place of science in cross cultural encounters the history of cartography in Oceania shifting understandings of race and cultural difference in the Pacific and the place of ships books and instruments in the culture of science It reveals the exchanges and networks that connected British French Spanish and Russian scientific traditions even in the midst of imperial competition and the ways in which findings in diverse fields from cartography to zoology botany to anthropology were disseminated and crafted into an increasingly coherent image of the Pacific its resources peoples and histories This is a significant body of scholarship that offers many important insights for anthropologists and geographers as well as for historians of science and European imperialism

Discovery ,1963 Spaces of Global Knowledge Diarmid A. Finnegan,Jonathan Jeffrey Wright,2016-03-09

Global knowledge was constructed communicated and contested during the long nineteenth century in numerous ways and places This book focuses on the life geographies material practices and varied contributions to knowledge be they medical or botanical cartographic or cultural of actors whose lives crisscrossed an increasingly connected world Integrating detailed archival research with broader thematic and conceptual reflection the individual case studies use local specificity to shed light on global structures and processes revealing the latter to be lived and experienced phenomena rather than abstract historiographical categories This volume makes an original and compelling contribution to a growing body of scholarship on the global history of knowledge Given its wide geographic disciplinary and thematic range this book will appeal to a broad readership including historical geographers and specialists in history of science and medicine imperial history museum studies and book history
