Science Since 1500 A Short History Of Ma:

A History of Antarctic Science G. E. Fogg, 1992-09-24 This is the first book to draw together a history of science in Antarctica

Short History of the Dominion of Canada, from 1500 to 1878 Charles Richard Tuttle, 1878

Main Currents of Scientific Thought Stephen Finney Mason, 1956

Animals and Science Niall Shanks, 2002-06-21 Animals and Science examines the debates from the Renaissance to the present surrounding issues of animal rights consciousness and self awareness Animals and Science examines what science has and has not taught us about the nature of nonhuman animals and explores the moral religious social and scientific implications of those teachings It shows how the scientific study of animals especially their cognitive abilities has transformed our understanding of them Animals and Science traces our evolving understanding of animal pain and considers its moral relevance to humans It discusses Darwin s belief shattering notion that species differences are not absolute then traces its impact to the present day Ultimately Animals and Science is about the nature of science the kinds of questions science can and cannot answer and the role of theory in shaping the interpretation of evidence

The Nature of Health Michael Fine, James Peters, 2018-04-19 This pioneering work addresses a key issue that confronts all industrialised nations How do we organise healthcare services in accordance with fundamental human rights whilst competing with scientific and technological advances powerful commercial interests and widespread public ignorance The Nature of Health presents a coherent affordable and logical way to build a healthcare system It argues against a health system fixated on the pursuit of longevity and suggests an alternative where the ability of an individual to function in worthwhile relationships is a better more human goal By reviewing the etymology sociology and anthropology of health this controversial guide examines the meaning of health and proves how a community centred healthcare system improves local economy creates social capital and is affordable rational personal and just This is badly needed nourishment for a medical

system glutted on technology individualism profit and the pursuit of longevity Read and be fed Christopher Koller Health Insurance Commissioner The State of Rhode Island USA Unique Surprising A real eye opener Just about everyone who doesn't have a vested financial interest in maintaining the status quo will agree that U S healthcare is badly broken This book is making it possible for us to refocus from how to provide healthcare to how to achieve health Their description of health as successful functioning in community rather than as a measure of longevity is a definition that can make a reader feel healthier as they take gradually appreciate the power of the concept On this foundation it is not as hard as one might think to outline a healthcare system that is equitable affordable and achievable Alexander Blount EdD Professor of Family Medicine University of Massachusetts Medical Center *History of Psychiatry and Medical Psychology* Edwin R. Wallace, John Gach, 2010-04-13 Most of the prefatory issues are extensively elaborated upon in the Prolegomenon which also contains the complete references to the texts and authors discussed below Nevertheless the Preface would be grossly incomplete without touching on some of these issues books and scholars Too many of this book's chapters e.g. Mora's Marx's D.B. Weiner's examine and reference important earlier as well as contemporary general histories of psychiatry and specialized monographs in German French Italian and Spanish Also in his 1968 Short History of Psychiatry discussed below Ackerknecht pp xi xii references important nineteenth and earlier twentieth century psychiatric histories in English French and German Such citations will of course not be repeated here Finally thanks to several publishers re editions of dozens of classical psychiatric texts one can consult their bibliographies as well See Prolegomenon for references to these splendid series In a rough and ready sense medical history began in classical Greece for example On Ancient Medicine While traditionally included in the Hippocratic corpus this text seems more likely to have been written by a non or even anti Hippocratic doctor Moreover the Hippocratic and other schools were hardly as secular as we now suppose On Epilepsy for example does not so much declare the prevalent denotation of it as the sacred disease erroneous as it does that it is no more nor less sacred than any other disease **The Journal of Education**, 1894 **HISTORY AND PHILOSOPHY OF SCIENCE AND TECHNOLOGY**

-Volume II Pablo Lorenzano, Hans-Jörg Rheinberger, Eduardo Ortiz and Carlos Delfino Galles, 2010-09-27 History and Philosophy of Science and Technology is a component of Encyclopedia of Physical Sciences Engineering and Technology Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on History and Philosophy of Science and Technology in four volumes covers several topics such as Introduction to the Philosophy of Science The Nature and Structure of Scientific Theories Natural Science A Short History of Molecular Biology The Structure of the Darwinian Argument In The Origin of Species History of Measurement Theory Episodes of XX Century Cosmology A Historical Approach Philosophy of Economics Social Sciences Historical And Philosophical Overview of Methods And Goals Introduction to Ethics of Science and Technology The Ethics of Science and Technology The Control of Nature and the Origins of The Dichotomy Between Fact And Value Science and Empires The Geo

Yadavendu,2013-12-09 This transdisciplinary volume outlines the development of public health paradigms across the ages in a global context and argues that public health has seemingly lost its raison d'être that is a population perspective The older philosophical approach in public health involved a holistic population based understanding that emphasized historicity and interrelatedness to study health and disease in their larger socio economic and political moorings A newer tradition which developed in the late 19th century following the acceptance of the germ theory in medicine created positivist transitions in epidemiology In the form of risk factors a reductionist model of health and disease became pervasive in clinical and molecular epidemiology The author shows how positivism and the concept of individualism removed from public health thinking the consideration of historical social and economic influences that shape disease occurrence and the interventions chosen for a population He states that the neglect of the multifactorial approach in contemporary public health thought has led to growing health inequalities in both the developed and the developing world He further suggests that the concept of social capital in public health which is being hailed as a resurgence of holism is in reality a sophisticated and extended version of individualism The author presents the negative public policy consequences and implications of adopting methodological individualism through a discussion on AIDS policies The book strongly argues for a holistic understanding and the incorporation of a rights perspective in public health to bring elements of social justice and fairness in policy formulations

The Ideas That Made America: A Brief History Jennifer Ratner-Rosenhagen,2019-01-03 Long before the United States was a nation it was a set of ideas projected onto the New World by European explorers with centuries of belief and thought in tow From this foundation of expectation and experience America and American thought grew in turn enriched by the bounties of the Enlightenment the philosophies of liberty and individuality the tenets of religion and the doctrines of republicanism and democracy Crucial to this development were the thinkers who nurtured it from Thomas Jefferson to Ralph Waldo Emerson W E B DuBois to Jane Addams and Betty Friedan to Richard Rorty The Ideas That Made America A Brief History traces how Americans have addressed the issues and events of their time and place whether the Civil War the Great Depression or the culture wars of today Spanning a variety of disciplines from religion philosophy and political thought to cultural criticism social theory and the arts Jennifer Ratner Rosenhagen shows how ideas have been major forces in American history driving movements such as transcendentalism Social Darwinism conservatism and postmodernism In engaging and

accessible prose this introduction to American thought considers how notions about freedom and belonging the market and morality and even truth have commanded generations of Americans and been the cause of fierce debate **The Routledge Companion to the Professions and Professionalism** Mike Dent, Swethaa S. Ballakrishnen, Jean-Louis Denis, Tracey Adams, 2016-07-01 The Routledge Companion to the Professions and Professionalism is a state of the art reference work which maps out the current developments and debates around the sociology of the professions and how they relate to management and organizations Supported by an international contributor team specializing in the disciplines of organizational studies and sociology the collection provides extensive coverage of this field of research It brings together the core concepts and issues and has chapters on all the key aspects of professions in both the public and private sectors including issues of governance and regulation The volume closes with a set of international case studies which provide valuable practical insights into the subject This Companion will be an indispensable reference source for students scholars and educators within the social sciences especially within management organizational studies and sociology It will also be highly relevant for those working and studying in the area of professional education **A Man's Place** John Tosh, 2008-10-01 Domesticity is generally treated as an aspect of women's history In this fascinating study of the nineteenth century middle class John Tosh shows how profoundly men's lives were conditioned by the Victorian ideal and how they negotiated its many contradictions Tosh begins by looking at the experience of boyhood married life sex and fatherhood in the early decades of the nineteenth century illustrated by case studies representing a variety of backgrounds and then contrasts this with the lives of the late Victorian generation He finds that the first group of men placed a new value on the home as a reaction to the disorienting experience of urbanization and as a response to the teachings of Evangelical Christianity Domesticity still proved problematic in practice however because most men were likely to be absent from home for most of the day and the role of father began to acquire its modern indeterminacy By the 1870s men were becoming less enchanted with the pleasures of home Once the rights of wives were extended by law and society marriage seemed less attractive and the bachelor world of clubland flourished as never before The Victorians declared that to be fully human and fully masculine men must be active participants in domestic life In exposing the contradictions in this ideal they defined the climate for gender politics in the next century DIV Animal Ecology W.H. Dowdeswell, 1961 *A History of Modern Psychology in Context* Wade Pickren, Alexandra Rutherford, 2010-02-19 In *A History of Modern Psychology in Context* the authors resist the traditional storylines of great achievements by eminent people or schools of thought that rise and fall in the wake of scientific progress Instead psychology is portrayed as a network of scientific and professional practices embedded in specific contexts The narrative is informed by three key concepts indigenization reflexivity and social constructionism and by the fascinating interplay between disciplinary Psychology and everyday psychology **Readings in Philosophy of Science** Philip Paul Wiener, 1953
