Science and Technology Andrew G Van Melsen,2012-03-01 **Beyond Behaviorism** Vicki L. Lee,2016-07-15 Originally published in 1988 this title explores and contrasts means and ends psychology with conventional psychology that of stimuli and response The author develops this comparison by exploring the general nature of psychological phenomena and clarifying many persistent doubts about psychology She contrasts conventional psychology stimuli and responses involving reductionistic organocentric and mechanistic metatheory with alternative psychology means and ends that is autonomous contextual and evolutionary **Catalog of Copyright Entries. McLean,1967 **Science as Social Existence** Jeff Kochan,2017-12-18 In this bold and original study Jeff Kochan constructively combines the sociology of scientific knowledge SSK with Martin Heidegger s early existential conception of science Kochan shows convincingly that these apparently quite different approaches to science are in fact largely compatible even mutually reinforcing By combining Heidegger with SSK Kochan argues we can explicate elaborate and empirically ground Heidegger s philosophy of science in a way that makes it more accessible and useful for social scientists and historians of science Likewise incorporating Heideggerian phenomenology into SSK renders SKK a more robust and attractive methodology for use by scholars in the interdisciplinary field of Science and Technology Studies STS Kochan s ground breaking reinterpretation of Heidegger also enables STS scholars to sustain a principled analytical focus on scientific subjectivity without running afoul of the orthodox subject object distinction they often reject Science as Social Existence is the first book of its kind unfurling its argument through a range of topics relevant to contemporary STS research These include the epistemology and metaphysics of scientific practice as well as the methods of explanation appropriate to social scientific and historical studies of science Science as Social Existence puts concentrated emphasis on the compatibility of Heidegger s existential conception of science with the historical sociology of scientific knowledge pursuing this combination at both macro and micro historical levels Beautifully written and accessible Science as Social Existence puts new and powerful tools into the hands of sociologists and historians of science cultural theorists of science Heidegger scholars and pluralist philosophers of science *Prophets of the Posthuman* Christina Bieber Lake,2013-09-30 *Prophets of the Posthuman* provides a fresh and original reading of fictional narratives that raise the

question of what it means to be human in the face of rapidly developing bioenhancement technologies Christina Bieber Lake argues that works by Nathaniel Hawthorne Walker Percy Flannery O Connor Toni Morrison George Saunders Marilynne Robinson Raymond Carver James Tiptree Jr and Margaret Atwood must be reevaluated in light of their contributions to larger ethical questions Drawing on a wide range of sources in philosophical and theological ethics Lake claims that these writers share a commitment to maintaining a category of personhood more meaningful than that allowed by utilitarian ethics Prophets of the Posthuman insists that because technology can never ask whether we should do something that we have the power to do literature must step into that role Each of the chapters of this interdisciplinary study sets up a typical ethical scenario regarding human enhancement technology and then illustrates how a work of fiction uniquely speaks to that scenario exposing a realm of human motivations that might otherwise be overlooked or simplified Through the vision of the writers she discusses Lake uncovers a deep critique of the ascendancy of personal autonomy as America s most cherished value This ascendancy coupled with technology s glamorous promises of happiness helps to shape a utilitarian view of persons that makes responsible ethical behavior toward one another almost impossible Prophets of the Posthuman charts the essential role that literature must play in the continuing conversation of what it means to be human in a posthuman world

on which current interpretive theory has supported relative truth as the philosophical grounding for rhetoric premises she argues that have led to constraints on our notion of truth that divorce it from human experience She then shows how phenomenological philosophy might guide the theory and practice of rhetoric reanimating its role in the human enterprise of seeking a shared truth She proposes profession and altruism as two guiding metaphors for the phenomenological activity of truth seeking through interaction Among the contemporary rhetoricians and philosophers who influence Couture are Pierre Teilhard de Chardin Martin Buber Charles Altieri Charles Taylor Alasdair MacIntyre and Jürgen Habermas Biology and medicine; training, education, and information; Plowshare; isotopes development; physical research; communities; and AEC administrative programs United States.
