## **Science And Liberation:**

Science and Liberation Gerben J. Stavenga, 1991 This study is an inquiry into the foundations of science evoked especially by contemporary crises Its methodological approach is determined by the fact that there are indications that basic and general assumptions underlying current research traditions should be questioned An analysis of modern physics and of elementary particle tracks in particular gives rise to the suspicion that scientific research has a fundamental blind spot characterized by a new subject object relation We encounter the same subject object relation and a corresponding concept of reality in a research programme deviating from the regular sciences viz the theology of Karl Barth Used as a means of contrast this programme can draw science's attention to a new concept of knowledge and reality possible in principle Furthermore the present inquiry brings to light that there are altogether four different subject object relations with their concomitant basic structures of reality The blind spot pointed out by the means of contrast is one of these four structures the most fundamental one to be precise Freedom and liberation prove to be essential features of this new structure Hence these features will characterize science once it develops itself further by focussing on this new structure of reality The reality then dealt with by science will turn science into liberation science

One of the significant advantages of Science And Liberation books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Science And Liberation versions, you eliminate the need to spend money on physical copies.
