## **Science And Medicine In Twentiethcentury China Research And Education:**

**Science and Medicine in Twentieth-century China** John Z. Bowers, J. William Hess, Nathan Sivin, 1988 The first part of this volume is devoted to synoptical and analytical examinations by historians of attempts to root modern science in China during the Republican period The second contains reports by scientists who have been involved in China's recent efforts to modernize Topics include genetic research taxonomy contraception food policy and schistosomiasis With an introduction by Nathan Sivin

**Biology and Revolution in Twentieth-Century China** Laurence Schneider, 2005-10 Using the field of genetics as a case study this book follows the troubled development of modern natural science in China from the 1920s through Mao's China to the present post socialist era Through detailed portraits of key scientists and institutions basic dilemmas are

***China's Scientific Elite*** Cong Cao, 2004-07-31 China's Scientific Elite is a study of those scientists holding China's highest academic honour membership of the Chinese Academy of Sciences Having carried out extensive systematic data collection of CAS members Cao examines the social stratification system of the Chinese science community and the way in which politics and political interference has effected the stratification The book then goes on to compare the Chinese system to the stratification of the US scientific elite The conclusions are fascinating not least because one national elite resides in a democratic liberal social system and the other in an authoritarian social system

**Science and Technology in Modern China, 1880s-1940s**, 2014-02-20 The first of its kind this collection of critical essays opens up new venues in the comparative study of science and culture by focusing on the formative decades of modern China in the late nineteenth and first half of the twentieth century It provides a wide ranging examination of the cultural and intellectual history of science and technology in modern China From anti imperialism to the technology of Chinese writing the commodification of novelties to the rise of the modern professional scientist new lexica and appropriations of the past the contributors map out a transregional and global circuitry of modern knowledge and practical know how nationalism and the amalgamation of new social practices Contributors include Iwo Amelung Fa ti Fan Shen Guwei Danian Hu Joachim Kurtz Eugenia Lean Thomas S Mullaney Hugh Shapiro Grace Shen and Jing Tsu

**Historical Dictionary of Science and Technology in Modern China** Lawrence R. Sullivan, Nancy Liu-Sullivan, 2015-03-19 The Historical Dictionary of Science and Technology in Modern China provides the most up to date information on science and technology in China from the late nineteenth century to the present Special attention is given to the historical factors scientists and historical figures behind each scientific development In particular this book pays attention to the scientists who were persecuted to death or tortured during the Cultural Revolution 1966 1976 and whose scientific research was therefore tragically cut short The historical dictionary provides information on science and technology in China from the late nineteenth century to the present including a chronology introduction extensive bibliography over 700 cross referenced dictionary entries on major scientific and technological fields and sub fields entries on western scholars and educators who also impacted scientific achievements in China This book is an

excellent access point for students researchers and anyone wanting to know more about the science and technology in China

*Historical Dictionary of the People's Republic of China* Lawrence R. Sullivan, 2007-05-23 When the Chinese Communist Party CCP seized power in October 1949 China was one of the poorest nations in the world In fact it was so weak it had been conquered by Japan a country one tenth its size a decade earlier Now more than fifty years later the People's Republic of China PRC is an emerging economic political and military superpower with the world's fastest growing economy and largest population 1.3 billion in 2005 A member of the United Nations Security Council since the early 1970s and a nuclear power China wields enormous influence in the world community The second edition of the *Historical Dictionary of the People's Republic of China* contains more than 400 cross referenced dictionary entries on individual topics spanning China's political economic and social system along with short biographies on important figures—from politicians to writers and movie directors—who have shaped Chinese history during the period of Communist rule from 1949 to 2006 Supplementing the entries are a chronology an introduction charts outlining the structure of the Chinese government and a bibliography of works in English making this a superb resource for college and high school students needing a quick reference on contemporary China

*The Politics of Innovation* Mark Zachary Taylor, 2016-05-04 Why are some countries better than others at science and technology S T Written in an approachable style *The Politics of Innovation* provides readers from all backgrounds and levels of expertise a comprehensive introduction to the debates over national S T competitiveness It synthesizes over fifty years of theory and research on national innovation rates bringing together the current political and economic wisdom and latest findings about how nations become S T leaders Many experts mistakenly believe that domestic institutions and policies determine national innovation rates However after decades of research there is still no agreement on precisely how this happens exactly which institutions matter and little aggregate evidence has been produced to support any particular explanation Yet despite these problems a core faith in a relationship between domestic institutions and national innovation rates remains widely held and little challenged *The Politics of Innovation* confronts head on this contradiction between theory evidence and the popularity of the institutions innovation hypothesis It presents extensive evidence to show that domestic institutions and policies do not determine innovation rates Instead it argues that social networks are as important as institutions in determining national innovation rates *The Politics of Innovation* also introduces a new theory of creative insecurity which explains how institutions policies and networks are all subservient to politics It argues that ultimately each country's balance of domestic rivalries vs external threats and the ensuing political fights are what drive S T competitiveness In making its case *The Politics of Innovation* draws upon statistical analysis and comparative case studies of the United States Japan South Korea China Taiwan Thailand the Philippines Argentina Brazil Mexico Canada Turkey Israel Russia and a dozen countries across Western Europe

F. Bynum, 2006-03-20 This book first published in 2006 is an authoritative description of the important changes in Western medicine over the past two centuries     *The Origins of the Developmental State in Taiwan* J. Megan Greene, 2008-04-30 The rapid growth of Taiwan s postwar miracle economy is most frequently credited to the leading role of the state in promoting economic development Megan Greene challenges this standard interpretation in the first in depth examination of the origins of Taiwan s developmental state Greene examines the ways in which the Guomindang state planned and promoted scientific and technical development both in mainland China between 1927 and 1949 and on Taiwan after 1949 Using industrial science policy as a lens she shows that the state even during its most authoritarian periods did not function as a monolithic entity State planners were concerned with maximizing the use of Taiwan s limited resources for industrial development Political leaders on the other hand were most concerned with the state s political survival The developmental state emerged gradually as a result of the combined efforts of technocrats and outsiders including academicians and foreign advisors Only when the political leadership put its authority and weight behind the vision of these early planners did Taiwan s developmental state fully come into being In Taiwan s combination of technocratic expertise and political authoritarianism lie implications for our understanding of changes taking place in mainland China today     *Traditional Chinese Medicine and Species Endangerment* Konrad von Moltke, Frank Spaninks, 2000     Bibliography of the History of Medicine , 1985     National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1990     **A Cultural History of Modern Science in China** Benjamin A. Elman, 2009-07-01 In *A Cultural History of Modern Science in China* Elman has retold the story of the Jesuit impact on late imperial China circa 1600 1800 and the Protestant era in early modern China from the 1840s to 1900 in a concise and accessible form ideal for the classroom     *Current Catalog* National Library of Medicine (U.S.), 1982 First multi year cumulation covers six years 1965 70     Philosophy and Conceptual History of Science in Taiwan Cheng-Hun Lin, Daiwie

Fu,2012-12-06 Scholarly studies of mathematics and the sciences carried out by philosophers and historians in Taiwan in recent years have two main goals first positive and critical participation in the logical analysis of scientific theories and scientific explanation and second conceptual clarification joined with faithful historical investigation of the sciences of traditional and modern China In this book Professors Cheng hung Lin and Daiwie Fu have gathered fine representative essays from both endeavors Their two introductory discussions guide the reader in three ways First we have insightful remarks concerning the development of science studies in Taiwan during the past three decades Then we see the place of such studies particularly those in the logic and methodology of science in the philosophy of science as that discipline has evolved in the West in recent years Finally we have an account of the changes that have occurred among philosophers and historians of Chinese science as they have turned away from an assumption of Western definitions of scientific achievement a turn that is common to Taiwanese Chinese Japanese and Western scholars      *Knowledge Production in Mao-Era China* Rui

Kunze,Marc Andre Matten,2021-10-15 This book traces and analyzes the transformation of the public discourse of science and technology in Mao era China Based on extensive primary sources such as science dissemination materials and technical handbooks as well as mass media products of the Great Leap Forward and the Cultural Revolution periods this book delineates the emergence of a pragmatic approach to knowledge in society To achieve the goal of fast modernization with limited financial human and material resources the party state accommodated Western and local modern and traditional knowledges in the fields of agricultural mechanization steel production and Chinese veterinary medicine The case studies demonstrate that scientific knowledge production in the Mao era included various social groups and was entangled with political and cultural issues This reveals and explains the continuity of scientific thinking across the historical divides of 1949 and 1978 which has hitherto been underestimated      **On Their Own Terms** Benjamin A. Elman,2009-07-01 Since the mid

19th century imperial reformers Republicans Guomindang party cadres and Communists have all prioritized science and technology Elman offers an account of the evolution of native Chinese science over four centuries under the influence of missionaries In the end he argues the Chinese produced modern science on their own terms      **Science and Technology in World History** William E.
