Future Science Opportunities in Antarctica and the Southern Ocean National Research Council, Division on Earth and Life Studies, Polar Research Board, Committee on Future Science Opportunities in Antarctica and the Southern Ocean, 2011-12-28 Antarctica and the surrounding Southern Ocean remains one of the world's last frontiers Covering nearly 14 million km² an area approximately 1.4 times the size of the United States Antarctica is the coldest driest highest and windiest continent on Earth While it is challenging to live and work in this extreme environment this region offers many opportunities for scientific research Ever since the first humans set foot on Antarctica a little more than a century ago the discoveries made there have advanced our scientific knowledge of the region the world and the Universe but there is still much more to learn However conducting scientific research in the harsh environmental conditions of Antarctica is profoundly challenging Substantial resources are needed to establish and maintain the infrastructure needed to provide heat light transportation and drinking water while at the same time minimizing pollution of the environment and ensuring the safety of researchers Future Science Opportunities in Antarctica and the Southern Ocean suggests actions for the United States to achieve success for the next generation of Antarctic and Southern Ocean science The report highlights important areas of research by encapsulating each into a single overarching question The questions fall into two broad themes 1 those related to global change and 2 those related to fundamental discoveries In addition the report identified key science questions that will drive research in Antarctica and the Southern Ocean in coming decades and highlighted opportunities to be leveraged to sustain and improve the U.S. research efforts in the region *Science Into Policy* Paul Arthur Berkman, 2002 CD ROM contains The Antarctic Treaty Searchable Database 1959-1999 a replica of the web site <http://webhost.nvi.net/aspire>
