Science and Common Sense in Working with Men Walter Dill Scott,Mary Holmes Stevens Hayes,1921 *The Philosophy of Person* Józef Tischner,Józef Życiński,George F. McLean,1994 Behavioralism in Political Science Richard J. Gelles,2017-09-08 Changes in the thinking of science are usually accompanied by lively intellectual conflicts between opposing or divergent points of view The clash of ideas is a major ingredient in the stimulation of the life of the mind in human culture Such arguments and counter arguments of proofs and disproofs permit changes in the arts and sciences to take place Political science is not exempt from these conflicts Since the middle of the twentieth century the study of politics has been rocked by disagreements over its scope theories and methods These disagreements were somewhat less frequent than in most sciences natural or behavioral but they have been at times bitter and persuasive The subject matter of political science politics and all that is involved in politics has a halo effect The stakes of politics make people fight and sometimes die for what they claim as their due Political scientists seem to confuse academic with political stakes behaving as if the victories and defeats on the battleground of the intellect resemble those on the battleground of political life Three issues seem critical to political science at the time this volume first appeared in the 1960s First disagreement over the nature of the knowledge of political things is a science of politics possible or is the study of politics a matter of philosophy Second controversy over the place of values in the study of politics a controversy that makes for a great deal of confusion Third disagreements over

the basic units of analysis in the study of politics should the political scientist study individual and collective behavior or limit the work to the study of institutions and large scale processes This collection brings together the most persuasive writings on these topics in the mid 1960s

Rationality in Science R. Hilpinen, 2012-12-06 The present volume is a product of an international research program Foundations of Science and Ethics launched in 1976 by the Inter University Centre of Post Graduate Studies Dubrovnik Yugoslavia with the financial support of the Volkswagen Foundation According to the outline of the program formulated in 1976 by a committee consisting of Professors Dagfinn Føllesdal Rudolf Haller coordinator Lorenz Krüger Karel Lambert Keith Lehrer Kuno Lorenz Gunther Patzig Ivan Supek and Paul Weingartner its general purpose was to investigate the interplay of various internal and external factors in the development of science Generous financial support from the Volkswagen Foundation made it possible to plan four annual conferences the first of which was held in Dubrovnik on March 6-12 1978 This volume contains the majority of the papers presented in the first Dubrovnik conference the main theme of this conference was Rationality in Science and Ethics Some of the papers appear here in a thoroughly revised form Further results of the research program will be discussed in three other conferences to be held in Dubrovnik in 1979 1981 the papers presented in these conferences will be published separately Professor Rudolf Haller of the University of Graz assumed the burden of the practical planning and organization of the first conference as well as that of the other three conferences I wish to thank Professor Haller on behalf of all participants for carrying out this demanding and time consuming task
