Systems National Science Foundation, Science Curriculum Improvement Study, Christina Kageyama, 1966 Primary Science Curriculum Guide John Stringer, 2013-06-17 This guide provides trainee teachers with an insight into the nature and teaching of primary science. It aims to introduce you to the ways in which children learn science and to the science itself. Each Unit can be studied independently or used to support preparation for school experiences. You will be directed towards additional reading which will develop or confirm the subject knowledge you will need to achieve QTS. The curriculum guide is up to date, revised to take account of Curriculum 2000 and accepted good practice in primary science teaching and learning. It is also flexible; many of the Units are stand alone. They can be undertaken in any order at your own pace to complement school experiences. The Units are practical and feasible; the activities suggested can be undertaken by the non-specialist in many cases without specialized equipment or access to large numbers of pupils. The guide is comprehensive, covering all the primary science elements in Curriculum 2000 and giving background information into other aspects of primary science teaching. It is also supportive; the guide suggests further texts to support trainees' own understanding of the scientific and pedagogical concepts involved. Additional reading draws on the TTA's list of approved key texts. The original text was piloted by students following a distance learning PGCE course. It has been revised and updated in line with their comments and to meet Curriculum 2000 and Curriculum Guidance for the Foundation Stage. The text was initially developed as a core text for the part-time distance learning course at Liverpool Hope and is designed for trainee teachers on distance learning and flexible routes, returning, converting or overseas teachers.
