Abreu,2023-10-07 This book constitutes the proceedings of the 26th International Conference on Discovery Science DS 2023 which took place in Porto Portugal in October 2023 The 37 full papers and 10 short papers presented in this volume were carefully reviewed and selected from 133 submissions They were organized in topical sections as follows Machine learning methods and applications natural language processing and social media analysis interpretability and explainability in AI data analysis and optimization fairness privacy and security in AI control and spatio temporal modeling graph theory and network analysis time series and forecasting healthcare and biological data analysis anomaly outlier and novelty detection *Machine Learning and Knowledge Discovery in Databases: Applied Data Science and Demo Track* Gianmarco De Francisci Morales,Claudia Perlich,Natali Ruchansky,Nicolas Kourtellis,Elena Baralis,Francesco Bonchi,2023-09-16 The multi volume set LNAI 14169 until 14175 constitutes the refereed proceedings of the European Conference on Machine Learning and Knowledge Discovery in Databases ECML PKDD 2023 which took place in Turin Italy in September 2023 The 196 papers were selected from the 829 submissions for the Research Track and 58 papers were selected from the 239 submissions for the Applied Data Science Track The volumes are organized in topical sections as follows Part I Active Learning Adversarial Machine Learning Anomaly Detection Applications Bayesian Methods Causality Clustering Part II Computer Vision Deep Learning Fairness Federated Learning Few shot learning Generative Models Graph Contrastive Learning Part III Graph Neural Networks Graphs Interpretability Knowledge Graphs Large scale Learning Part IV Natural Language Processing Neuro Symbolic Learning Optimization Recommender Systems Reinforcement Learning Representation Learning Part V Robustness Time Series Transfer and Multitask Learning Part VI Applied Machine Learning Computational Social Sciences Finance Hardware and Systems Healthcare Human Computer Interaction Recommendation and Information Retrieval Part VII Sustainability Climate and Environment Transportation Urban Planning Demo **Protein Allostery in Drug Discovery** Jian Zhang,Ruth Nussinov,2019-11-09 The book focuses on protein allostery in drug discovery Allosteric regulation the second secret of life fine tunes virtually most biological processes and controls physiological activities Allostery can both cause human diseases and contribute to development of new therapeutics Allosteric drugs exhibit unparalleled advantages compared to conventional orthosteric drugs rendering the development of allosteric modulators as an appealing strategy to improve selectivity and pharmacodynamic properties in drug leads The Series delineates the immense significance of protein allostery as demonstrated by recent advances in the repertoires of the concept its mechanistic mechanisms and networks characteristics of allosteric proteins modulators and sites development of computational and experimental methods to predict allosteric sites small molecule allosteric modulators of protein kinases and G protein coupled receptors engineering allostery and the underlying role of allostery in precise medicine

Comprehensive understanding of protein allostery is expected to guide the rational design of allosteric drugs for the treatment of human diseases The book would be useful for scientists and students in the field of protein science and Pharmacology etc

Knowledge Discovery in Big Data from Astronomy and Earth Observation Petr

Skoda,Fathalrahman Adam,2020-04-09 Knowledge Discovery in Big Data from Astronomy and Earth Observation

Astrogeoinformatics bridges the gap between astronomy and geoscience in the context of applications techniques and key principles of big data Machine learning and parallel computing are increasingly becoming cross disciplinary as the phenomena of Big Data is becoming common place This book provides insight into the common workflows and data science tools used for big data in astronomy and geoscience After establishing similarity in data gathering pre processing and handling the data science aspects are illustrated in the context of both fields Software hardware and algorithms of big data are addressed Finally the book offers insight into the emerging science which combines data and expertise from both fields in studying the effect of cosmos on the earth and its inhabitants

Selected Works of E. L. Lehmann Javier Rojo,2012-01-16 These volumes present a selection of Erich L Lehmann s monumental contributions to Statistics These works are multifaceted His early work included fundamental contributions to hypothesis testing theory of point estimation and more generally to decision theory His work in Nonparametric Statistics was groundbreaking His fundamental contributions in this area include results that came to assuage the anxiety of statisticians that were skeptical of nonparametric methodologies and his work on concepts of dependence has created a large literature The two volumes are divided into chapters of related works Invited contributors have critiqued the papers in each chapter and the reprinted group of papers follows each commentary A complete bibliography that contains links to recorded talks by Erich Lehmann and which are freely accessible to the public and a list of Ph D students are also included These volumes belong in every statistician s personal collection and are a required holding for any institutional library

Esposito,2005-06-16 Intelligent systems are those which produce intelligent o springs AI researchers have been focusing on developing and employing strong methods that are capable of solving complex real life problems The 18th International Conference on Industrial Engineering Applications of Arti cial Intelligence Expert Systems IEA AIE 2005 held in Bari Italy presented such work performed by many scientists worldwide The Program Committee selected long papers from contributions presenting more complete work and posters from those reporting ongoing research The Committee enforced the rule that only original and unpublished work could be considered for inclusion in these proceedings The Program Committee selected 116 contributions from the 271 subm ted papers which cover the following topics arti cial systems search engines intelligent interfaces knowledge discovery knowledge based technologies na ral language processing machine learning applications reasoning technologies uncertainty management applied data mining and technologies for knowledge management The contributions oriented to the technological aspects of AI and the quality of the papers are witness to a

research activity clearly aimed at consolidating the theoretical results that have already been achieved The conference program also included two invited lectures by Katharina Morik and Roberto Pieraccini Many people contributed in different ways to the success of the conference and to this volume The authors who continue to show their enthusiastic interest in applied intelligence research are a very important part of our success We highly appreciate the contribution of the members of the Program Committee as well as others who reviewed all the submitted papers with efficiency and dedication

Computational Intelligence Applications in Modeling and Control Ahmad Taher Azar, Sundarapandian Vaidyanathan, 2014-12-26 The development of computational intelligence CI systems was inspired by observable and imitable aspects of intelligent activity of human being and nature The essence of the systems based on computational intelligence is to process and interpret data of various nature so that that CI is strictly connected with the increase of available data as well as capabilities of their processing mutually supportive factors Developed theories

of computational intelligence were quickly applied in many fields of engineering data analysis forecasting biomedicine and others They are used in images and sounds processing and identifying signals processing multidimensional data visualization steering of objects analysis of lexicographic data requesting systems in banking diagnostic systems expert systems and many other practical implementations This book consists of 16 contributed chapters by subject experts who are specialized in the various topics addressed in this book The special chapters have been brought out in the broad areas of Control Systems Power Electronics Computer Science Information Technology modeling and engineering applications Special importance was given to chapters offering practical solutions and novel methods for the recent research problems in the main areas of this book viz Control Systems Modeling Computer Science IT and engineering applications This book will serve as a reference book for graduate students and researchers with a basic knowledge of control theory computer science and soft computing techniques The resulting design procedures are emphasized using Matlab Simulink software

Climate Science, Solutions and Services for Net Zero, Climate-Resilient Food Systems Pete Falloon,Aled Jones,Siemen Van Berkum,Stefan Kepinski,Mike Rivington,2024-05-06 Food systems are both a major contributor to global greenhouse gas emissions and are strongly impacted by climate change and weather extremes Solutions to deliver net zero food systems therefore need to take climate impacts adaptation and resilience into account in order to ensure they are appropriate in a changing climate and do not conflict with adaptation goals In a similar way adaptation options for the food system must consider potential trade offs consequences and synergies with net zero and other objectives such as the Sustainable Development Goals Solutions for net zero climate resilient food systems will therefore require systematic interdisciplinary approaches across academia governments business NGOs and the public
