Science In The Streets Report Of The Twentieth Ce:

Reporting Science Jeffrey H. Goldstein, 2024-08-08 Originally published in 1986 this is a nonscientific book about science It is concerned with the relationships among social science journalism public information and public policy Reporting Science The Case of Aggression explores some of the obstacles and suggestions for overcoming them to the mutual exchange of information when that information concerns research and theory on a sensitive issue in this instance violence Among the issues explored are What is the social scientist s responsibility if any for the public dissemination of his or her work How accurate are mass media reports of scientific research on such socially sensitive issues as violence and the effects of mass media portrayals of sex and aggression How do science journalists select particular pieces of research for study How can interested scientists more effectively present their work to the public What are the ethical issues involved in greater scientist journalist cooperation

The End of the Experiment Stanley Rothman, 2017-09-08 The End of the Experiment ties together Stanley Rothman s theory of post industrialism and his four decades of research on American politics and society Rothman discusses the rise and fall of the New Left the sixties impact on America s cultural elites and the emergence of new post industrial humanistic values The first part of this book explains how cultural shifts in post industrial society increased the influence of intellectuals and redefined America s core values The second part examines how the shift in American social and cultural values led to a crisis of confidence in the American experiment And in a final section Rothman s contemporaries provide insight into his work reflecting on his continued influence and his devotion to traditional liberalism Rothman presents a quantitative study of personality differences between traditional American elites and new cultural elites Rothman argues that the experiment of America as a new nation rooted in democracy morality and civic virtue is being destroyed by a disaffected intellectual class opposed to traditional values

Observing Bioethics Renee C. Fox, Judith P. Swazey, 2008-07-23 Observing Bioethics examines the history of bioethics as a discipline related not only to modern biology medicine and biotechnology but also to the core values and beliefs of American society and its courts legislatures and media The book is written from the perspective of two social scientists a sociologist of medicine Renee C Fox and a historian of medicine Judith P Swazey who have participated in bioethics since the emergence of this multidisciplinary field more than 30 years ago Fox and Swazey draw on first hand observations and experiences in a variety of American bioethical settings face to face interviews with first and second generation figures in the genesis and early unfolding of bioethics a detailed examination of the theatrical media coverage of what was considered to be a banner event in the annals of bioethics the creation and birth of the cloned sheep Dolly case studies of how bioethics has internationally developed and a large corpus of primary documents and secondary source materials While recognizing the intellectual moral and sociological importance of American bioethics Fox and Swazey are critical of its characteristics Foremost among these are what they identify as the problems of thinking socially culturally and internationally in American bioethics the tenuous interdisciplinarity of the field

and the troubling extent to which the culture wars have penetrated bioethics This book will appeal to a wide range of doctors scientists and academics who are involved in the history and sociology of bioethics Science in the Streets Twentieth Century Fund. experiences of women throughout world history in a comprehensive 4 volume work Although there has been extensive
research on women in history by region no text or reference work has comprehensively covered the role women have played
throughout world history The past thirty years have seen an explosion of research and effort to present the experiences and
contributions of women not only in the Western world but across the globe Historians have investigated womens daily lives in
virtually every region and have researched the leadership roles women have filled across time and region They have found
and demonstrated that there is virtually no historical social or demographic change in which women have not been involved
and by which their lives have not been affected The Oxford Encyclopedia of Women in World History benefits greatly from
these efforts and experiences and illuminates how women worldwide have influenced and been influenced by these historical
