The Science of UFOs William Alschuler, 2002-08-03 The Scientific Investigation of the greatest challenge facing humanity What if UFOs are real Reports of UFO sightings and strange visitors from the sky go back as far as recorded human history But it was only in the twentieth century that technological innovation made them impossible to ignore We see reports on the evening news accompanied by videotapes of strange objects in the sky taken by eyewitnesses sometimes in broad daylight Astronomer and lecturer William R Alschuler sift through thousands of reports and identifies commonalties specific shapes of objects that have reportedly been observed around the world odd maneuvering in the atmosphere impossible shifts of altitude and acceleration Assuming that UFOs represent actual alien technology Alschuler investigates how they may be able to achieve some of the more astounding feats that have been reported His exploration takes readers through the possibilities of alternative types of travel fourth dimension wormholes and black holes teleportation antigravity and faster than light drives Alschuler also explores some of the historical sightings from human antiquity the phenomenon of alien abductions and the possible biochemistry of visiting aliens It s a fascinating tour through the wonderland of UFO sightings and mythos based on state of the art understanding of the laws of physics Newtonian Einsteinian and quantum and written in an accessible style for UFO fans and those interested in exploring frontiers of science

The Science of Aliens Jack Challoner, 2005 Are we alone The idea of life existing elsewhere in the Universe has been put forward by philosophers since the time of Ancient Egypt Today through science fiction literature films and television we have all had close encounters with aliens Now The Science of Aliens examines the possibilities of alien life in outer space as well as presenting a close up look at aliens on earth Based on an international interactive exhibition The Science of Aliens is a combination of imagination and ground breaking science in the quest for extraterrestrial life

The New Science of the Ufo Kenneth W. Behrendt, 2013-05-10 The New Science of the UFO now completes author and researcher Kenneth W Behrendts groundbreaking trilogy on the subject of UFOs It contains a complete scan of all 24 issues of a previously out of print privately published typescript UFO research journal titled Annals of Ufological Research Advances or AURA for short which was the basis for his first two volumes Secrets of UFO Technology and The How and Why of UFOs Practically every conceivable facet of the UFO enigma was explored in the pages of AURA at a level of scientific detail that was unprecedented in the field of ufology Those able to obtain some of the limited number of copies of each issue available to the public learned all about such exotic topics as the sources of the mysterious glows that envelope nocturnal UFOs why some malfunctioning UFOs must eject liquid metals in order to correct their propulsion system problems how alien crews tap our earthly electrical power grids to recharge their scout craft the nature of the mysterious angel hair and devil jelly residues left by hovering craft how alien paralysis weapons are used for their personal defense and how crews protect their mother ships from attack how alien telepathy works how the living space creatures known as zeroids can biologically duplicate UFO capabilities and much much more The material in AURA was intended for the most serious of ufologists seeking ultimate and satisfying answers to the mysteries that they were exploring Now for the first time in almost two decades these answers are again available for a new generation of researchers

Imbrogno, 2013-02-08 Over the course of his thirty years of investigation into UFOs including his own field research photographic evidence and meticulously compiled case studies Philip Imbrogno has provided fascinating new insight into paranormal phenomena In this book he reveals for the first time the detailed findings of prominent paranormal experts as well as his own firsthand experiences Using the latest quantum theories Imbrogno sheds new light on classic UFO cases government cover ups and the hidden connections between UFOs and other unexplained phenomena from crop circles and animal mutilations to angels and jinn or genies Imbrogno s insider knowledge spans the very early UFO reports to present day sightings He personally investigated four of the best known UFO flaps of the modern era Hudson Valley Phoenix lights the Belgium sightings and the Gulf Breeze Florida sightings and shares information never released before including photographic evidence that something very unusual is taking place on planet Earth

Flying Saucers and Science Stanton T. Friedman, 2008-06-15 The nuclear physicist and leading UFO researcher reveals the science behind interstellar travel and the US government s extraterrestrial cover up In this comprehensive look at the scientific data concerning flying saucers nuclear physicist Stanton T Friedman distills more

than forty years of research and explains it all in layman's terms. He shows how travel to nearby stars is possible without violating the laws of physics and examines data from a number of scientific UFO studies that nearly no one else has discussed in detail. Photographs of little-known advanced propulsion systems, some of which he worked on himself, are included as well. Beyond his presentation of the scientific data, Friedman demonstrates that the United States government's disinformation policy regarding UFOs amounts to nothing less than a Cosmic Watergate. He reveals the reasons for this cover-up, possible reasons for aliens to come to Earth, and their reasons for not landing on the White House lawn. In this book, readers will discover: What type of energy and technologies could provide travel between the stars? The most likely regions of the universe to cultivate alien life? Why the aliens have come to Earth? Who believes in the flying saucer phenomenon?

The Science of Extraterrestrials Eric Julien, 2006 Finally here is the breakthrough work that solves the mystery of UFOs and paranormal phenomena. After more than a half century of investigation, Eric Julien offers a global and scientific solution to one of the greatest challenges known to science. For Julien, the fractal nature of time and its three dimensions led to the emergence of a revolutionary global theory: Absolute Relativity. Even though this work is of a scientific nature, the general public can easily understand it. The precise explanations in this book will highlight the mistakes of science and will furthermore offer insight into extraterrestrial technology, which the author calls Extratemporal Diagrams. Included: The Science of Extraterrestrials explains anti-gravitation, propulsion of UFOs, alien abductions, formation of crop circles, strange luminous phenomena, poltergeists, ghosts, postmortem survival, and time travel. All these phenomena are explained by this single, unique concept. This book will undoubtedly create a philosophical revolution. Publisher's description

The UFO Phenomenon Robert Davis, 2015-02-28 A comprehensive perspective of evidence and future directions associated with the UFO phenomenon. Includes review and analysis of studies, evidence, theories, and research needs involving UFO topics. Extensive scientific endnotes.

Aliens Jim Al-Khalili, 2017-05-09 In these lively and fascinating essays, edited by theoretical physicist Jim Al-Khalili, scientists from around the world weigh in on the latest advances in the search for intelligent life in the universe and discuss just what that might look like. Since 2000, science has seen a surge in data and interest on several fronts related to ET: extraterrestrials, AI (artificial intelligence), and SETI (search for extraterrestrial intelligence). The debate has intensified over whether life exists outside our solar system, what that life would look like, and whether we'll ever make contact. Included here are essays from a broad spectrum of the scientific community: cosmologists, astrophysicists, NASA planetary scientists, and geneticists, to name just a few, discussing the latest research and theories relating to alien life. Some of the topics include: If life exists somewhere in space, what are the odds that it evolves into something we would recognize as intelligent? What will space travel look like in the future, and will it all be done by cyborg technology? How long until we are ruled by robot overlords? This is actually a serious consideration: Are we simply a simulation in the mind of some supreme being acting out a virtual reality game? For those who have ever wondered, "Is there anybody out there?" here are the latest theories and evidence.
