Inside the College Gates Jenny M. Stuber,2011-07-16 To date scholars in higher education have examined the ways in which students experiences in the classroom and the human capital they attain impact social class inequalities In this book Jenny Stuber argues that the experiential core of college life the social and extra curricular worlds of higher education operates as a setting in which social class inequalities manifest and get reproduced As college students form friendships and get involved in activities like Greek life study abroad and student government they acquire the social and cultural resources that give them access to valuable social and occupational opportunities beyond the college gates Yet students social class backgrounds also impact how they experience the experiential core of college life structuring their abilities to navigate their campus s social and extra curricular worlds Stuber shows that upper middle class students typically arrive on campus with sophisticated maps and navigational devices to guide their journeys while working class students are typically less well equipped for the journey She demonstrates as well that students social interactions friendships and extra curricular involvements also shape and are shaped by their social class worldviews the ideas they have about their own and others class identities and their beliefs about where they and others fit within the class system By focusing on student social class worldviews this book provides insight into how identities and consciousness are shaped within educational settings Ultimately this examination of what happens inside the college gates shows how which higher education serves as an avenue for social reproduction while also providing opportunities for the contestation of class inequalities

Handbook of Race-Ethnicity and Gender in Psychology Marie L. Miville,Angela D. Ferguson,2014-02-06 Multicultural aspects of

psychology have received some attention in the literature in the last decade. A number of texts currently address these significant concerns for example *Counseling the Culturally Different* Sue Handbook of Multicultural Counseling Poterotto et al 2009 and *Handbook of Multicultural Counseling Competencies* Pope Davis Coleman 2005. In their most recent editions several of these books address more nuanced complexities of diversity for example the intersections of gender or social class with race ethnicity. Meanwhile other texts have addressed gender issues in psychology *Handbook of Counseling Women* *Counseling Men* with some attention paid to racial ethnic and other diversity concerns. Clearly the progression of scholarship in this field reflects the importance of incorporating multiple aspects of diversity within psychology. However no book currently exists that fully addresses the complexities of race ethnicity and gender together. Better understanding of the dual impact of race ethnicity and gender on psychological functioning may lead to more effective conceptualizations of a number of mental health issues such as domestic violence addictions health related behaviors and achievement. Exploring the impact of race ethnicity and gender also may provide a broader understanding of self in community as this affects individuals families and other social groups and work and career development. Topics of interest may include identity development worldviews and belief systems parenting styles interventions for promoting resilience and persistence and strategies for enhancing more accurate diagnostic and treatment modalities. Today's world is comprised of multiple and intersecting communities that remain in need of psychological models and interventions that support and promote both individual and collective mental health. We believe that utilizing unidimensional conceptual models e.g. focusing solely on race ethnicity or gender no longer adequately addresses psychological concerns that are dynamic complex and multi faceted. The proposed Handbook will focus on timely topics which historically have been under addressed for a number of diverse populations.

World Class William Gaudelli, 2014-04-04 Reports on and analyzes how teachers and students in three high schools have engaged in global education. Intended to help social studies educators reflect on their own thinking and practice. **Taboo**, 2003. *Surmounting All Odds - Vol. 1* Carol Camp Yeakey, Ronald D. Henderson, 2000-09-01 Volume 1 in the two volume set about overcoming the odds in African American Education. Adolescence and Education Tim Urdan, Frank Pajares, 2002-01-01 In this inaugural volume we solicited chapters from leading scholars in a variety of fields related to education. Our aim was to provide a broad overview of several of the most pressing concerns regarding the education of adolescent students. The volume begins with an historical perspective from Barbara Finklestein who provides background regarding America's changing perceptions of adolescence as a developmental period and how American society has approached the task of educating this age group over time. This is followed by chapters from Carol Midgley and from Sanford Dornbusch and Jeanne Kaufman regarding the organization purpose and function of schools designed to serve early and late adolescents. Midgley uses an achievement goal theory lens to analyze middle level schools. Dornbusch and Kaufman consider senior high schools adopting a more sociological perspective. **Educational Enactments in a Globalised World**
