The Philosophical Foundations of Ecological Civilization Arran Gare,2016-08-05 The global ecological crisis is the greatest challenge humanity has ever had to confront and humanity is failing The triumph of the neo liberal agenda together with a debauched scientism has reduced nature and people to nothing but raw materials instruments and consumers to be efficiently managed in a global market dominated by corporate managers media moguls and technocrats The arts and the humanities have been devalued genuine science has been crippled and the quest for autonomy and democracy undermined The resultant trajectory towards global ecological destruction appears inexorable and neither governments nor environmental movements have significantly altered this or indeed seem able to

The Philosophical Foundations of Ecological Civilization is a wide ranging and scholarly analysis of this failure This book reframes the dynamics of the debate beyond the discourses of economics politics and techno science Reviving natural philosophy to align science with the humanities it offers the categories required to reform our modes of existence and our institutions so that we augment rather than undermine the life of the ecosystems of which we are part From this philosophical foundation the author puts forth a manifesto for transforming our culture into one which could provide an effective global environmental movement and provide the foundations for a global ecological civilization

China in the Global Political Economy Gordon C.K. Cheung,2018 Is the US losing its economic authority to China whose global economic identity is being determined more by entrepreneurial spirit than developmental principle Through the exercise of soft power and hard currency in some areas of the global economy China has clear national interest in the protection of intellectual property rights financial integration and sovereign wealth funds China s Belt and Road Initiative and the Asian Infrastructure Investment Bank will set new standard to global economic

fundamental aspects of human existence Economists environmentalists and development theorists have so far been unable to agree on the most successful prescriptions to address problems To understand contrast and compare alternative understandings of economic environmental and development issues we need to be aware why theorists conceptualise the process of social experience so differently Part 1 of Economy Environment Development Knowledge addresses the subjective preference cost of production and abstract labour theories of values in economics Part 2 explains egocentrism ecocentrism and socioecocentrism as competing theoretical perspectives in environmental theory Part 3 highlights modernisation theory structuralist theory and class struggle as ways to account for the process of development and Part 4 examines the generation of knowledge through positivism paradigms and praxis legitimating competing perspectives in economics environmentalist and development The book concludes by considering why different people find alternative explanations more or less plausible By addressing the disagreements between theorists Economy Environment Development Knowledge provides a unique basis to contrast and compare the plethora of theories of and policies for economic prosperity environmental sustainability and social progress The Journal of Australian Political Economy ,1996 **Aanwinsten van de Centrale Bibliotheek (Queteletfonds)** Bibliothèque centrale (Fonds Quetelet),1996
