The Working Man's Friend, and Family Instructor , The Man Without a Face Masha Gessen, 2013-03-05 History of Eastern Europe Russia A Quite Remarkable Man John P. Evans, 2014-07-15 The first biography of this remarkable figure *Adventures of an Ordinary Man* William Goff, 2012-05-10 **The Art and Science of Making the New Man in Early 20th-Century Russia** Yvonne Howell, Nikolai Kremmentsov, 2021-12-02 The idea that morally mentally and physically superior new men might replace the currently existing mankind has periodically seized the imagination of intellectuals leaders and reformers throughout history This volume offers a multidisciplinary investigation into how the new man was made in Russia and the early Soviet Union in the first third of the 20th century The traditional narrative of the Soviet new man as a creature forged by propaganda is challenged by the strikingly new and varied case studies presented here The book focuses on the interplay between the rapidly developing experimental life sciences such as biology medicine and psychology and countless cultural products ranging from film and fiction dolls and museum exhibits to pedagogical projects sculptures and exemplary agricultural fairs With contributions from scholars based in the United States Canada the UK Germany and Russia the picture that emerges is emphatically more complex contradictory and suggestive of strong parallels with other new man visions in Europe and elsewhere In contrast to previous interpretations that focused largely on the apparent disconnect between utopian new man rhetoric and the harsh realities of everyday life in the Soviet Union this volume brings to light the surprising historical trajectories of new man visions their often obscure origins acclaimed and forgotten champions unexpected and complicated results and mutual interrelations In short the volume is a timely examination of a recurring theme in modern history when dramatic advancements in science and technology conjoin with anxieties about the future to fuel dreams of a new and improved mankind *The Man who Missed the War* Dennis Wheatley, 2014-01-23 When German submarines were sinking so much Allied shipping that Britain faced the danger of starvation Dennis Wheatley then a member of the War Cabinet s Joint Planning Staff suggested that a system of raft convoys moved by the Gulf Stream and prevailing winds should be used to float essential supplies across the Atlantic This story is

based on that idea Philip Vaudell leaves the United States on a solitary raft but when he comes across a ploy that would put him in danger he casts away from his crew and the raft is left in the lap of the gods But with Philip was the other real trouble in the enticing shape of red headed Gloria who had stowed away on his raft Instead of drifting into European waters they are carried down to the Antarctic where amidst its eternal snows he discovers a large area with a warm climate and populated by a lost race Will they be able to make contact and request rescue or will they be forced to find a way to integrate with these people Furthermore will they be welcomed or used as part of their ritual human sacrifice

The Races of Man: An Outline of Anthropology and Ethnography Joseph Deniker, 2020-09-28 The innumerable groups of mankind massed together or scattered according to the varying nature of the earth's surface are far from presenting a homogeneous picture Every country has its own variety of physical type language manners and customs Thus in order to exhibit a systematic view of all the peoples of the earth it is necessary to observe a certain order in the study of these varieties and to define carefully what is meant by such and such a descriptive term having reference either to the physical type or to the social life of men This we shall do in the subsequent chapters as we proceed to develop this slight sketch of the chief general facts of the physical and psychical life of man and of the most striking social phenomena of the groups of mankind But there are some general terms which are of more importance than others and their meaning should be clearly understood from the first I refer to expressions like people nation tribe race species in short all the designations of the different groupings real or theoretic of human beings Having defined them we shall by so doing define the object of our studies Since ethnography and anthropology began to exist as sciences an attempt has been made to determine and establish the great groups amongst which humanity might be divided A considerable diversity of opinion however exists among leading scientific men not only as to the number of these groups of these primordial divisions of the human race but above all as to the very nature of these groups Their significance most frequently is very vaguely indicated In zoology when we proceed to classify we have to do with beings which in spite of slight individual differences are easily grouped around a certain number of types with well defined characters called species An animal can always be found which will represent the type of its species In all the great zoological collections there exist these species types to which individuals may be compared in order to decide if they belong to the supposed species We have then in zoology a real substratum for the determination of species those primordial units which are grouped afterwards in genera families orders etc
