The History of Mathematical Tables Martin Campbell-Kelly, Mary Croarken, Raymond Flood, Eleanor Robson, 2003-10-02 The oldest known mathematical table was found in the ancient Sumerian city of Shuruppak in southern Iraq Since then tables have been an important feature of mathematical activity table making and printed tabular matter are important precursors to modern computing and information processing This book contains a series of articles summarising the technical institutional and intellectual history of mathematical tables from earliest times until the late twentieth century It covers mathematical tables the most important computing aid for several hundred years until the 1960s data tables eg Census tables professional tables eg insurance tables and spreadsheets the most recent tabular innovation The book is presented in a scholarly yet accessible way making appropriate use of text boxes and illustrations Each chapter has a frontispiece featuring a table along with a small illustration of the source where the table was first displayed Most chapters have sidebars telling a short story or history relating to the chapter The aim of this edited volume is to capture the history of tables through eleven chapters written by subject specialists The contributors describe the various information processing techniques and artefacts whose unifying concept is the mathematical table *Mathematical Tables* James Mills Peirce, 1895

Handbook of Mathematical Functions with Formulas, Graphs, and Mathematical Tables Milton Abramowitz, Irene A. Stegun, 1968 **Mathematical Tables and Formulas** Percy Franklyn Smith, William Raymond Longley, 1929 This collection of tables and formulas is intended primarily as a handbook for solving numerical problems in connection with the courses in mathematics of the freshman and sophomore years in colleges and technical schools It will also be useful to workers in fields requiring applications of calculus The numerical tables in this book are those which have been found by experience to be most useful in solving the problems which arise in connection with college courses in trigonometry analytic geometry calculus and mechanics The collection of formulas is intended to save time and relieve the burden on the memory without reducing problem work to mere substitution of numbers in equations Preface *A Guide to Mathematical Tables* N. M. Burunova, A. V. Lebedev, R. M. Fedorova, 2014-05-09 A Guide to Mathematical Tables is a supplement to the Guide to Mathematical Tables published by the U S S R Academy of Sciences in 1956 The tables contain information on subjects such as powers rational and algebraic functions and trigonometric functions as well as logarithms and polynomials and Legendre functions An index listing all functions included in both the Guide and the Supplement is included Comprised of 15 chapters this supplement first describes mathematical tables in the following order the accuracy of the table that is the number of decimal places or significant figures the limits of variation of the argument and the interval of the table and the serial number of the book or journal in the reference material The second part gives the author title publishing house and date and place of publication for books and the name of the journal year of publication series volume and number page and author and title of the article cited for journals Topics range from exponential and hyperbolic functions

to factorials Euler integrals and related functions Sums and quantities related to finite differences are also tabulated This book will be of interest to mathematicians and mathematics students New Mathematical Tables Containing the Factors, Squares, Cubes, Square Roots, Cube Roots, Reciprocals, and Hyperbolic Logarithms Peter Barlow,1814 Mathematical Tables Consisting of Logarithms of Numbers 1 to 108000, Trigonometrical, Nautical and Other Tables James Pryde,1878
