Traditional apologetics is either focused on obscure quasi Thomist philosophical arguments for God's existence or on 18th century style answers to alleged biblical contradictions But a new approach has recently entered the picture the juridical defence of historic Christian faith with its particular concern for demonstrating Jesus's deity and saving work for humankind The undisputed leader of this movement is John Warwick Montgomery emeritus professor of law and humanities University of

Bedfordshire England and director International Academy of Apologetics Evangelism and Human Rights Strasbourg France His latest book of more than sixty published during his career shows the strength of legal apologetics its arguments drawn from secular legal reasoning can be rejected only at the cost of jettisoning the legal system itself on which every civilised society depends for its very existence The present work also includes theological essays on vital topics of the day characterised by the author's well known humour and skill for lucid communication *Local Times and Excursion Theory for Brownian Motion* Ju-Yi Yen, Marc Yor, 2013-10-01 This monograph discusses the existence and regularity properties of local times associated to a continuous semimartingale as well as excursion theory for Brownian paths Realizations of Brownian excursion processes may be translated in terms of the realizations of a Wiener process under certain conditions With this aim in mind the monograph presents applications to topics which are not usually treated with the same tools e.g. arc sine law laws of functionals of Brownian motion and the Feynman-Kac formula **Geometry, Its Elements and Structure** Alfred S. Posamentier, Robert L. Bannister, 2014-08-11 Geared toward high school students as well as for independent study this text covers plane solid coordinate vector and non-Euclidean geometry More than 2 000 illustrations Electronic solutions manual available 1977 edition
