Mathematical Quickies Charles W. Trigg, 1985 For the mathematics enthusiast of any age or level of sophistication this stimulating treasury of unusual math problems offers unlimited opportunity for mind boggling recreation Charles W Trigg Dean Emeritus and Professor Emeritus at Los Angeles City College and one of the country's best known problemists has compiled nearly 300 mathematical brainteasers from the field of arithmetic algebra plane and solid geometry trigonometry number theory and such general recreational mathematics and dissections cryptarithms and magic squares The object of each problem is to find the quickest most elegant solution they are often unorthodox and there is usually an element of surprise in each Ranging from the simple to complex problems are both original with the author and the work of over 100 other qualified mathematicians Most are rarely seen or entirely new all challenge the reader to devise solutions more elegant than the ones provided

Impossible Folding Puzzles and Other Mathematical Paradoxes Gianni A. Sarcone, Marie-Jo Waeber, 2014-02-20 Do all problems have solutions Is complexity synonymous with difficulty This original collection of mathematical puzzles and paradoxes proves that things aren't always what they seem Readers will discover that nothing is as easy or as difficult as it looks and that puzzles can have one several or no solutions The fun filled puzzles begin with The Tricky Hole a challenge that involves pushing a large coin through a small hole in a sheet of paper without ripping or making any cuts in the paper Advance to the Elastic Playing Card in which it's possible to cut a hole into a playing card big enough for someone to climb through Other incredible puzzles include Elephants and Castles Trianglized Kangaroo Honest Dice and Logic Dice Mind reading Powers and dozens more Complete solutions explain the mathematical realities behind the fantastic sounding challenges

Ruler and the Round Nicholas D. Kazarinoff, 2012-09-11 An intriguing look at the impossible geometric constructions those that defy completion with just a ruler and a compass this book covers angle trisection and circle division 1970 edition *Masters of Mathematics* Robert A. Nowlan, 2017-05-13 The original title for this work was Mathematical Literacy What Is It and Why

You Need it The current title reflects that there can be no real learning in any subject unless questions of who what when where why and how are raised in the minds of the learners The book is not a mathematical text and there are no assigned exercises or exams It is written for reasonably intelligent and curious individuals both those who value mathematics aware of its many important applications and others who have been inappropriately exposed to mathematics leading to indifference to the subject fear and even loathing These feelings are all consequences of meaningless presentations drill rote learning and being lost as the purpose of what is being studied Mathematics education needs a radical reform There is more than one way to accomplish this Here the author presents his approach of wrapping mathematical ideas in a story To learn one first must develop an interest in a problem and the curiosity to find how masters of mathematics have solved them What is necessary to be mathematically literate It s not about solving algebraic equations or even making a geometric proof These are valuable skills but not evidence of literacy We often seek answers but learning to ask pertinent questions is the road to mathematical literacy Here is the good news new mathematical ideas have a way of finding applications This is known as the unreasonable effectiveness of mathematics

The Puzzle Instinct Marcel Danesi,2004-02-20 Humans are the only animals who create and solve puzzles for the sheer pleasure of it and there is no obvious genetic reason why we would do this Marcel Danesi explores the psychology of puzzles and puzzling with scores of classic examples His pioneering book is both entertaining and enlightening Will Shortz Crossword Editor The New York Times Puzzle fanatics will enjoy the many riddles illusions cryptograms and other mind benders offered for analysis Psychology Today a bristlingly clear always intriguing survey of the history and rationale of puzzles A splendid study Knight Ridder Newspapers

First Steps for Math Olympians: Using the American Mathematics Competitions J. Douglas Faires,2020-10-26 Any high school student preparing for the American Mathematics Competitions should get their hands on a copy of this book A major aspect of mathematical training and its benefit to society is the ability to use logic to solve problems The American Mathematics Competitions AMC have been given for more than fifty years to millions of high school students This book considers the basic ideas behind the solutions to the majority of these problems and presents examples and exercises from past exams to illustrate the concepts Anyone taking the AMC exams or helping students prepare for them will find many useful ideas here But people generally interested in logical problem solving should also find the problems and their solutions interesting This book will promote interest in mathematics by providing students with the tools to attack problems that occur on mathematical problem solving exams and specifically to level the playing field for those who do not

have access to the enrichment programs that are common at the top academic high schools The book can be used either for self study or to give people who want to help students prepare for mathematics exams easy access to topic oriented material and samples of problems based on that material This is useful for teachers who want to hold special sessions for students but it is equally valuable for parents who have children with mathematical interest and ability As students problem solving abilities improve they will be able to comprehend more difficult concepts requiring greater mathematical ingenuity They will be taking their first steps towards becoming math Olympians *CRC Concise Encyclopedia of Mathematics* Eric W.
