

Fundamental Rule of Fractions

The Rule

When dealing with fractions, multiplying or dividing the numerator and denominator by the same number does not change the value of the fraction.

What is the missing value in the example shown?

In the example shown you would multiply the denominator by three to get the result. You must also multiply the numerator by 3.

The value of the fraction has not changed, however, just as 2 is $\frac{2}{3}$ of the whole number 3, the number 6 is $\frac{2}{3}$ of the whole number 9.

$$\frac{2}{3} = \frac{?}{9}$$

$$9 = 3 \times 3$$

$$\frac{2}{3} = \frac{2 \times 3}{3 \times 3} = \frac{6}{9}$$

Mathematics For Industrial Technicians
