Loved Only Numbers Paul Hoffman, 2024-05-07 A funny marvelously readable portrait of one of the most brilliant and
eccentric men in history The Seattle Times Paul Erdos was an amazing and prolific mathematician whose life as a world
wandering numerical nomad was legendary He published almost 1500 scholarly papers before his death in 1996 and he
probably thought more about math problems than anyone in history Like a traveling salesman offering his thoughts as wares
Erdos would show up on the doorstep of one mathematician or another and announce My brain is open After working
through a problem he d move on to the next place the next solution Hoffman s book like Sylvia Nasar s biography of John
Nash A Beautiful Mind reveals a genius s life that transcended the merely quirky But Erdos s brand of madness was joyful
unlike Nash s despairing schizophrenia Erdos never tried to dilute his obsessive passion for numbers with ordinary emotional
interactions thus avoiding hurting the people around him as Nash did Oliver Sacks writes of Erdos A mathematical genius of
the first order Paul Erdos was totally obsessed with his subject he thought and wrote mathematics for nineteen hours a day
until the day he died He traveled constantly living out of a plastic bag and had no interest in food sex companionship art all
that is usually indispensable to a human life The Man Who Loved Only Numbers is easy to love despite his strangeness It s
hard not to have affection for someone who referred to children as epsilons from the Greek letter used to represent small
quantities in mathematics a man whose epitaph for himself read Finally I am becoming stupider no more and whose only
really necessary tool to do his work was a quiet and open mind Hoffman who followed and spoke with Erdos over the last 10
years of his life introduces us to an undeniably odd yet pure and joyful man who loved numbers more than he loved God
whom he referred to as SF for Supreme Fascist He was often misunderstood and he certainly annoyed people sometimes but
Paul Erdos is no doubt missed Therese Littleton *Popular Science Monthly and World's Advance* , 1918
