## **Matriarchs Of Englands Cooperative Movement A Study In Gender Politics And Female Leadership 1883 1921:**

*The Matriarchs of England's Cooperative Movement* Barbara J. Blaszak, 2000 Current thinking considers the Women's Cooperative Guild within the English Cooperative Movement to have been an independent and democratically run organization whose leaders built sisterhood across class lines and achieved many benefits for married working class women. This study of the dynamics of gender within the movement between 1883 and 1921 arrives at different conclusions. Blaszak examines what freedoms of speech and activity women were permitted within the movement as well as what resources they were given to accomplish their tasks. Ultimately the parameters set by the men would determine the type of female leadership that emerged and whether it was able to realize its feminist and utopian agendas. Setting the organization's activities within the context of gender relations in the Cooperative Movement, Blaszak finds that the Guild was much more dependent and much less democratically directed than has usually been supposed. Restrictions established by male cooperators and enhanced by the realities of working class life turned the Guild into a clique dominated by a few. Even the Guild's most revered leader, Margaret Llewelyn Davies, found it impossible to escape the gendered socio-economic circumstances in which she labored at her ministry to improve the lives of working class women. Consequently her leadership inadvertently assisted male cooperators in their attempts to limit possibilities for women.

*The Co-operative Movement and Communities in Britain, 1914-1960* Nicole Robertson, 2016-03-23 The co-operative movement has played a notable role in the retail, wholesale, productive, political, educational, and cultural life of Britain. As a movement, it has consciously represented consumer interests and has carried out work in the arena of consumer protection. However, its study has suffered relative neglect when compared to research into the Labour Party, trade unions, and the wider politics of retail and consumption. This book reassesses the impact of the co-operative movement on various communities in Britain during the period 1914-1960, providing a comprehensive account of the grass roots influence of co-operatives during both war and peace. This is a national study with a local dimension. It considers how national directives and perspectives were locally applied if indeed they were applicable within the context of individual societies. Each chapter focuses on a different aspect of the co-operative movement by examining various societies in England, Scotland, and Wales. Particular attention is paid to the Midlands due to the movement's expansion here during the interwar period, with consideration also given to comparative developments in Europe. The author explores the movement's relationship with other labour organizations, its cultural and social aspects, including the role sport played in co-operative societies, the politicization of the movement, and local response to the formation of the Co-operative Party, the education of co-operators, what co-operative membership entailed, and how co-operative ideology was expressed, the economic impact membership could have on families, including the provision of financial assistance and credit, and the co-operative movement's development alongside consumer activism. The book is a major national study of the growth of Co-operation during this crucial period of British social, economic, and consumer history. Given the few modern scholarly

works on Co operation it is a timely and much needed reassessment

Consumerism in Twentieth-Century Britain Matthew Hilton,2003-11-13 This book is the first comprehensive history of consumerism as an organised social and political movement Matthew Hilton offers a groundbreaking account of consumer movements ideologies and organisations in twentieth century Britain He argues that in organisations such as the Co operative movement and the Consumers Association individual concern with what and how we spend our wages led to forms of political engagement too often overlooked in existing accounts of twentieth century history He explores how the consumer and consumerism came to be regarded by many as a third force in society with the potential to free politics from the perceived stranglehold of the self interested actions of employers and trade unions Finally he recovers the visions of countless consumer activists who saw in consumption a genuine force for liberation for women the working class and new social movements as well as a set of ideas often deliberately excluded from more established political organisations

understood the importance of safe childbirth to the nation they also chose to allow economic crises and war preparation to take precedence. The interwar plans for a national maternal healthcare system met financial constraints and a lack of political will. As the outbreak of the Second World War appeared imminent, politicians planned for pregnant women and those with small children to evacuate from cities. The reception areas were less well planned and pregnant women returned to their homes rather than deliver among strangers. Wartime maternity provision didn't take into account the needs and desires of mothers and midwives. Reproductive laborers, mothers and midwives demonstrated agency throughout the period. Pregnant women chose to deliver at home with untrained or trained birth attendants; midwives entered and left the profession on their own terms, offering or withholding their skills when it suited individual need rather than at the behest of government. The

Making of Consumer Culture in Modern Britain Peter Gurney, 2017-05-18 CHOICE OUTSTANDING ACADEMIC TITLE AWARD WINNER 2018. It is commonly accepted that the consumer is now centre stage in modern Britain rather than the worker or producer. Consumer choice is widely regarded as the major source of self definition and identity rather than productive activity. Politicians vie with each other to fashion their appeal to citizen consumers. When and how did these profound changes occur? Which historical alternatives were pushed to the margins in the process? In what ways did the everyday consumer practices and forms of consumer organising adopted by both middle and working class men and women shape the outcomes? This study of the making of consumer culture in Britain since 1800 explores these questions, introduces students to major debates and cuts a distinctive path through this vibrant field. It suggests that the consumer culture that emerged during this period was shaped as much by political relationships as it was by economic and social factors. **The Politics of 1930s British Literature** Natasha Periyar, 2018-06-14 Winner of the 2018 International Standing Conference for the History of Education's First Book Award. Drawing on a rich array of archival sources and historical detail, *The Politics of 1930s British Literature* tells the story of a school minded decade and illuminates new readings of the politics and aesthetics of 1930s literature. In a period of shifting political claims, educational policy shaped writers' social and gender ideals. This book explores how a wide array of writers including Virginia Woolf, W. H. Auden, George Orwell, Winifred Holtby and Graham Greene were informed by their pedagogic work. It considers the ways in which education influenced writers' analysis of literary style and their conception of future literary forms. *The Politics of 1930s British Literature* argues that to those perennial symbols of the 1930s, the loudspeaker and the gramophone, should be added the textbook and the blackboard.

*Monthly Labor Review*, 2000. Publishes in depth articles on labor subjects, current labor statistics, information about current labor contracts and book reviews. **Building Co-operation** John F. Wilson, Anthony Webster, Rachael Vorberg-Rugh, 2013-10-10. *Building Co-operation* traces the development of The Co-operative Group and its predecessor, the Co-operative Wholesale Society (CWS), over the course of 150 years. Born from the efforts of the Rochdale Pioneers and others who established successful consumer co-operatives across Britain in the mid-nineteenth century, by the 1860s the proponents

of the CWS were ready to pioneer a new effort a federation democratically run and collectively owned that would enable co operatives to become their own suppliers From humble origins the CWS grew into one of Britain s largest businesses within a generation pioneering modern retailing and distribution on a national scale expanding into factory production and financial services and establishing an international supply network that stretched across Europe and beyond Throughout the late nineteenth century and well into the twentieth co operative societies provided essential services to millions of members across Britain ranging from food and clothing to banking insurance travel agency pharmacy and even funeral services However in the second half of the twentieth century co operatives experienced a protracted period of decline facing a series of internal structural challenges fierce competition amongst food retailers and a rapidly changing marketplace By the turn of the twenty first century when many commentators were ready to consign co operatives to the past The Co operative Group emerged with a revitalised business model that has helped to re invigorate the British co operative sector and bring new attention to the important role of co operative and mutual enterprises worldwide Based on extensive archival research including many records available to historians for the first time Building Co operation is the story of a distinctive business model as it evolved over time While since the inauguration of the CWS in 1863 the commercial landscape has changed nearly beyond recognition the values at the heart of The Co operative Group have remained relevant to succeeding generations focusing on member benefits and a commitment to ethical trading

A Workforce Divided Leslie A. Schuster, 2002-12-30 In this study of the life and work of Saint Nazaire s shipbuilding workers in the 30 years before World War I Schuster shows that the consequences of industrial production for workers differed sharply according to their resources and experiences She details the competing identities and divergent values maintained by shipbuilding workers demonstrating that they were fostered by the interaction between state programs industrial production and the traditions pursued in the local realm Third Republic economic policies for shipbuilding promoted unemployment and worker dependence on state officials over union leaders and the uneven application of capitalist methods of production meant multiple workplace experiences that further undercut association A workforce composed of industrial workers and agricultural producers brought markedly different priorities to the workplace Urban dwelling industrial workers proved dependent on shipbuilding while workers commuting from La Grande Bri D ere a nearby marshland were property owning producers mostly peat cutters with traditions of self government and a commanding community identity They turned to ship production precisely to maintain rural settlement and agricultural production These divergent values and responses to industrial work in conjunction with multiple barriers to association generated separate and even contrary labor concerns and protests

*Consumerism and the Co-operative Movement in Modern British History* Lawrence Black, Nicole Robertson, 2009-10-15 Despite the abundance and quality of recent historical writing on consumerism it cannot be said that the modern Co operative movement Co op has been well served It has also been by passed in studies that locate Britons identity in their consumption The reasons for this can be

found in the widely perceived decline of the Co op since the 1950s but also in various historiographical agendas that have resulted in its relative invisibility in modern British history This book by demonstrating the variety of broader issues that can be addressed through the Co op and the vibrancy of new historical research into consumption seeks to remedy this This book both of the Co op in a broader context and of new approaches to the history of consumption combines the work of leading authorities on the Co op with recent scholarly research It explores the Co op s distinctive interface between everyday issues and grander idealistic concerns The chapters intersect to examine a broad range of themes notably the politics of consumerism including consumer protection ethical and fair trading and alternatives to corporate commerce design and advertising the Co op s relations with other components of the labour movement and its ideology image and memory The collection looks at the Co operative movement locally through specific case studies nationally and also in comparison to the European movement This collection will appeal to academics researchers teachers and students of the economic cultural and political history of twentieth century Britain It will also be of interest to academics and students of business studies and co operative members themselves
