student achievement and AYP because they often involve out of classroom or school strategies Zero tolerance approaches also tend to increase discipline referrals to the Principal's Office and these referrals sometimes vary across the intensity of the infraction teachers and students In the end successful schools have explicit student accountability standards that identify expected student behavior and differentiated responses to inappropriate behavior These standards provide a blueprint for student and teacher behavior leading to more consistent outcomes for both This Electronic Book E Book describes the step by step process whereby schools develop school wide sets of behavioral standards Called the Behavioral Matrix this process has been used by hundreds of schools throughout the country as one component of the evidence based positive behavioral support PBS component of Project ACHIEVE a nationally known and evidence based school improvement program This E Book's objectives are to a sensitize readers as to the need for and benefits of a school wide accountability system b provide explicit instruction in how to develop the Behavioral Matrix and c discuss the how to use the Matrices effectively The E Book is intended for school based practitioners especially administrators who are implementing school wide PBS programs More specifically the Behavioral Matrix provides a behavioral blueprint that identifies expected student behaviors and associated positive responses incentives and rewards and intensity levels of inappropriate behavior and strategic responses to facilitate behavioral change Because these standards are agreed upon by all school staff and communicated and taught to all students students are evaluated against and thus become accountable to the Matrix's behavioral expectations The Matrix also increases consistency across teachers and staff eliminating the problems that occur when there are different sets of behavioral standards across settings staff students and circumstances Finally the Matrix facilitates a strategic response approach that helps to decrease or eliminate students inappropriate behavior while increasing their appropriate behavior The Behavioral Matrix is an essential element of the Skill Accountability Consistency PBS approach of Project ACHIEVE Its presence in a school is essential both to staff and student success

The Oxford

Handbook of World Englishes Markku Filppula, Juhani Klemola, Devyani Sharma, 2017-02-14 As the most widely documented language in human history English holds a unique key to unlocking some of the mysteries of the uniquely human endowment of language Yet the field of World Englishes has remained somewhat marginal in linguistic theory This collection heralds a more direct and mutually constructive engagement with current linguistic theories questions and methodologies It achieves this through areal overviews theoretical chapters and case studies The 36 articles are divided between four themes Foundations World Englishes and Linguistic Theory Areal Profiles and Case Studies Part I sets out the complex history of the global spread of English This is followed in Part II by chapters addressing the mutual relevance and importance of World Englishes and numerous theoretical subfields of Linguistics Part III offers detailed accounts of the structure and social

histories of specific varieties of English spoken across the globe highlighting points of theoretical interest The collection closes with a set of case studies that exemplify the type of analysis encouraged by the volume As attention is focused on innovative work at the interface of dialect description and theoretical explanation the book is more succinct in its treatment of applied themes which are given complementary coverage in other works On the Typology of Wh-questions Lisa Lai Shen Cheng, 1997 Offers an explanation for a long standing question in the typological distinction among languages with respect to formation of interrogatives which use question words such as who and what Proposes that the availability of question particles and the properties of question words contribute to the typological distinctions found and argues that the availability of question particles correlates with the lack of fronting of question words Of interest to scholars working on interrogatives syntactic theory comparative syntax Chinese syntax and typology Annotation copyrighted by Book News Inc Portland OR
