Fishing Brian Fagan, 2017-09-26 An archaeologist examines humanity's last major source of food from the wild and how it enabled and shaped the growth of civilization In this history of fishing not as sport but as sustenance archaeologist and best selling author Brian Fagan argues that fishing was an indispensable and often overlooked element in the growth of civilization It sustainably provided enough food to allow cities nations and empires to grow but it did so with a different emphasis Where agriculture encouraged stability fishing demanded movement It frequently required a search for new and

better fishing grounds its technologies centered on boats facilitated movement and discovery and fish themselves when dried and salted were the ideal food lightweight nutritious and long lasting for traders travelers and conquering armies This history of the long interaction of humans and seafood tours archaeological sites worldwide to show readers how fishing fed human settlement rising social complexity the development of cities and ultimately the modern world A tour de force Achieves its goal of putting fishing on par with hunter gathering and agriculture in the history of human civilization Leon Vlieger Natural History Book Service A valuable book as well as an interesting one Fagan succeeds in providing an admirable primer for the enthusiast and a welcome tool for the historian Economist A unique panoramic survey of the field Laurence A Marschall Natural History Gently scholarly elegant A compelling picture of how fishing was so integral in each society s development A multilayered nuanced tour of fishing societies throughout the world and across millennia Kirkus Reviews

Fighting Prosaic Messages Henry C Amoroso Jr, 2018-04-11 Part historical fiction part memoir part philosophy of education this book begins with a story about a womans immigration into the U S and how three of her generations struggled in the U S school system The book ends with an analysis of why many students fail in school and what we can do about it Through story and analysis this book offers a critique of the U S education system in 3 parts Part one imagines what the immigration experience was like in the past and reads like historical fiction Part two looks at the ensuing three generations in the present and reads like a memoir Part three gleans lessons from the story as a whole for what we can do better in the future In the historical fiction part a Sicilian woman named Rose emigrates to the U S at the turn of the twentieth century Knowing no English and illiterate but armed with a moral intelligence she struggles in this strange world of the free rubs shoulders with some of the great thinkers of her day and discusses the nature of education with them Shes one of the many prosaic heroes history books and schools sometimes forget In the memoir part Roses son Henry the authors father drops out of school in the eighth grade to help his single mom by selling newspapershe never thought he was smart enough for school anyway His son Henry Jr goes all the way in school to obtain a PhD but struggles to find a voice along the way Henry Jr s son Justin was seemingly born with an expressive voice but in his shuffle to conform to the school system almost lost it In these 3 cases we see 3 types of students who often fail in school in general In the final analysis part the book reflects on these prosaic cases to understand why so many U S students fail The theme that emerges parallels the traditions of Rousseau Dewey and Montessori students at heart are good and educators are most effective when they treat them as such students learn best by doing and this includes moral doing and students become intrinsically motivated to learn if allowed to think critically creatively and to find their voices If democracy depends on an informed citizenry the questions this book raises about school failure are critical to the future of our nation J A *Tuna* Richard Ellis, 2009-07-14 Famed marine researcher and illustrator Richard Ellis brings us a work of scientific achievement that will forever change the way we think about fish fishing and the dangers inherent in the seafood we eat The bluefin tuna is one of the world s biggest fastest and most highly

evolved marine animals as well as one of its most popular delicacies Now however it hovers on the brink of extinction Here Ellis explains how a fish that was once able to thrive has become a commodity and how the natural world and the global economy converge on our plates With updated information on mercury levels in tuna this is at once an astounding ode to one of nature s greatest marvels and a serious examination of a creature and world at risk **Harvesting the Sea** Annalisa Marzano,2013-08 Marzano explores the exploitation of marine resources in the Roman world and its role within the economy Bringing together literary epigraphic archaeological and legal sources she shows that these marine resources were an important feature of the Roman economy and paralleled phenomena taking place in the Roman agricultural economy on land

The Limits of Private Governance Florian Grisel,2021-09-09 Is there a future for the law In this book Florian Grisel addresses one of the most fascinating questions raised by social scientists in the past few decades Since the 1980s socio legal scholars have argued that governance based on social norms or private governance can offer an alternative to regulation by the law On this account private governance could be socially efficient and even optimal compared with other modes of governance The Limits of Private Governance supplements this optimistic analysis of private governance by assessing the long term evolution of a private order in the fishery of Marseille In the last eight centuries the fishers of Marseille have regulated their community without apparent means of legal support from the French state In the early 15th century they even created an organisation called the Prud homie de P che in order to regulate their fishery Based on archival evidence interviews and ethnographic data Grisel examines the evolution of the Prud homie de P che and argues that the strong social norms in which it is embedded are not only powerful tools of governance but also forces of inertia that have constrained its regulatory action The lessons drawn from this book will appeal to academics policy makers and members of the general public who have an interest in the governance of our modern societies **The Heart and the Island** Chiara

Mazzucchelli,2015-08-04 In The Heart and the Island Chiara Mazzucchelli explores the strong bond between Sicilian American writers and the island of Sicily Self contained yet connected to the mainland geographically separated from yet politically united to the rest of Italy Sicily occupies a unique position Throughout the twentieth century the sense of a distinct sicilianit or Sicilianness has manifested itself in a corpus of texts that although subsumed under the broader context of Italian literature have distinguished themselves as examples of an exquisitely Sicilian literary experience Mazzucchelli argues that a parallel phenomenon sicilianamericanit has emerged in the United States Focusing on the island s geography history and culture she examines how many American authors of Sicilian descent derive inspiration from their ethnic milieu and lay out a recognizable set of Sicilian culture markers in their works thereby producing a literature that is distinctly Sicilian American Drawing on both Italian and Italian American scholarship The Heart and the Island is the first full length study of Sicilian American literature and it opens a space for new interdisciplinary discussions on what it means to be Italian on both sides of the ocean Tuna Barbara Ann Block,Ernest Donald Stevens,2001 Annotation Tuna are biologically fascinating with many

specializations such as endothermy warm bloodedness aerobic capacity and migratory abilities The primary focus of this book is the physiology of tuna with respect to biomechanics thermoregulation and morphology An evolutionary and phylogenetic backdrop illustrates the importance of comparative perspectives Because of the economic importance of tuna a secondary focus of the book is tuna aquaculture and conservation **The Empty Ocean** Richard Ellis,2013-03-19 In *The Empty Ocean* acclaimed author and artist Richard Ellis tells the story of our continued plunder of life in the sea and weighs the chances for its recovery Through fascinating portraits of a wide array of creatures he introduces us to the many forms of sea life that humans have fished hunted and collected over the centuries from charismatic whales and dolphins to the lowly menhaden from sea turtles to cod tuna and coral Rich in history anecdote and surprising fact Richard Ellis's descriptions bring to life the natural history of the various species the threats they face and the losses they have suffered Killing has occurred on a truly stunning scale with extinction all too often the result leaving a once teeming ocean greatly depleted But the author also finds instances of hope and resilience of species that have begun to make remarkable comebacks when given the opportunity Written with passion and grace and illustrated with Richard Ellis's own drawings *The Empty Ocean* brings to a wide audience a compelling view of the damage we have caused to life in the sea and what we can do about it

Telesca, 2020-04-21 Illuminating the conditions for global governance to have precipitated the devastating decline of one of the ocean's most majestic creatures The International Commission for the Conservation of Atlantic Tunas ICCAT is the world's foremost organization for managing and conserving tunas seabirds turtles and sharks traversing international waters Founded by treaty in 1969 ICCAT stewards what has become under its tenure one of the planet's most prominent endangered fish the Atlantic bluefin tuna Called red gold by industry insiders for the exorbitant price her ruby colored flesh commands in the sushi economy the giant bluefin tuna has crashed in size and number under ICCAT's custodianship With regulations to conserve these sea creatures in place for half a century why have so many big bluefin tuna vanished from the Atlantic In Red Gold Jennifer E Telesca offers unparalleled access to ICCAT to show that the institution has faithfully executed the task assigned it by international law to fish as hard as possible to grow national economies ICCAT manages the bluefin not to protect them but to secure export markets for commodity empires and as a result has become complicit in their extermination The decades of regulating fish as commodities have had disastrous consequences Amid the mass extinction of all kinds of life today Red Gold reacquaints the reader with the splendors of the giant bluefin tuna through vignettes that defy technoscientific and market rationales Ultimately this book shows changing the way people value marine life must come not only from reforming ICCAT but from transforming the dominant culture that consents to this slaughter Personal Effects Nancy Caronia, Edvige Giunta, 2014-10-15 Celebrating one of the most important Italian American female authors of our time Personal Effects offers a lucid view of Louise DeSalvo as a writer who has produced a vast and provocative body of memoir writing a scholar who has enriched our understanding of Virginia Woolf and a teacher who has transformed countless lives More than an anthology Personal Effects represents an author case study and an example for modern Italian American interdisciplinary scholarship Personal Effects examines DeSalvo's memoirs as works that push the boundaries of the most controversial genre of the past few decades In these works the author fearlessly explores issues such as immigration domesticity war adultery illness mental

health sexuality the environment and trauma through the lens of gender ethnic and working class identity Alongside her groundbreaking scholarship DeSalvo s memoirs attest to the power and influence of this feminist Italian American writer
