Modeling Reserve Recruiting:

Modeling Reserve Recruiting Jeremy Arkes, M. Rebecca Kilburn, 2005 As reserve forces have become more important to military operations reserve recruiting has faced many of the same challenges that have confronted recruiting for the active forces These include more attractive civilian opportunities and a declining propensity among youth to join the ranks of military service An additional challenge for the reserves is the shrinking active duty force from which the reserves draw two thirds of their members Despite the growing importance of the reserves research on reserve recruiting has received much less attention than active duty recruiting For about two decades researchers estimated models of active duty recruiting variously referred to as enlistment supply models or aggregate recruiting models These models typically examine how labor market factors demographic factors and recruiting policies influence enlistment in the active duty Given the growing importance of reserve recruiting the Office of the Secretary of Defense asked RAND to assess the feasibility of this type of estimating model for reserve recruiting In the first portion of this effort we reviewed trends in reserve recruiting and the civilian factors that influence recruiting and we recommended updates to the active duty models of enlistment supply based on the reserve recruiting process and these trends These results are currently unpublished RAND research by M Rebecca Kilburn Sheila Nataraj Kirby C Christine Fair and Scott Nafrel In this monograph we describe available data and the strategies we used to create models to estimate reserve recruiting report the results from the models and discuss the policy implications of the estimates

Dynamic Modeling Bruce Hannon, Matthias Ruth, 2013-11-11 Computer models offer a means of interpreting and analyzing the dynamics of real world systems ranging from population growth to ozone depletion Dynamic Modeling introduces an approach to modeling that makes it a more practical intuitive endeavor The book enables readers to convert their understanding of a phenomenon to a computer model and then to run the model and let it yield the inevitable dynamic consequences built into the structure of the model Dynamic Modeling uses STELLA II software to develop simulation models Part I provides an introduction to modeling dynamic systems Part II offers general methods for modeling Parts III through VIII apply these methods to model real world phenomena from chemistry genetics ecology economics and engineering To develop and execute dynamic simulation models Dynamic Modeling comes with STELLA II run time software for Windows based computers as well as computer files of sample models used in the book Dynamic Modeling offers a clear approachable introduction to the modeling process and will be of interest in any field where real problems can be illuminated by computer simulation

Debris Recruitment for Small Streams of the Central Rocky Mountains Don C. Bragg, 2000 As our understanding of the importance of large woody debris LWD evolves planning for its production in riparian forest management is becoming more widely recognized This report details the development of a model CWD version 1.4 that predicts LWD inputs including descriptions of the field sampling used to parameterize parts of the model the theoretical and practical underpinnings of the model's structure and a case study of CWD's application to a stream in Wyoming's Bridger Teton National Forest

A Policy Analysis of Reserve Retirement Reform Beth J. Asch, James R. Hosek, Michael G. Mattock, 2013 As the burden of defense borne by reserve forces has increased more attention has been paid to differences between the compensation systems for the reserve and active components One particular emphasis is on the retirement systems a key difference being that reserve members who complete 20 years must wait until age 60 to draw benefits whereas active members can draw benefits immediately upon discharge This monograph compares the reserve and active retirement systems discusses the importance of structuring compensation to enable flexibility in managing active and reserve manpower describes how the debate over reserve retirement reform has differed from active component retirement reform debate and considers obstacles to reform and how they might be overcome It also provides a quantitative assessment of several past congressional proposals to change the reserve retirement system in terms of their effects on reserve participation and personnel costs concluding that proposals to reduce the age at which eligible members may begin receiving retirement benefits are not cost effective means of sustaining or increasing reserve component retention It also concludes that a menu of member options can be a powerful tool to maintain morale and overcome obstacles to reform Current members could be given the choice of staying in the current retirement system or joining the new one and the choice might be offered over a period of time say five years New entrants and reentrants with few years of service might be placed under the new system

Defense Catalog of Logistics Models, 1990 **Modeling Cost and Performance for Military Enlistment** National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on Military Enlistment Standards, 1994-02-01 This book describes a cost performance trade off model useful for illustrating the effects of budget decisions on the quality of expected performance in the military enlisted force The model links recruit quality to job performance on the one hand and personnel costs on the other Understanding these linkages provides a clear rationale based on performance and cost differences for choosing applicants for military service The book examines trends in the quality of military personnel from the beginning of the All Volunteer Force in 1974 to the year 2000 and beyond It discusses technical issues associated with the development of the various components of both cost and performance linkages and presents applications of the fully developed model *Department of Defense Appropriations for ...* United States. Congress. House. Committee on Appropriations, 1977 **Dynamical Modeling of Biological Systems** Stilianos Louca, 2023-06-07 This book introduces concepts and practical tools for dynamical mathematical modeling of biological systems Dynamical models describe the behavior of a system over time as a result of internal feedback loops and external forcing based on mathematically formulated dynamical laws similarly to how Newton's laws describe the movement of celestial bodies Dynamical models are increasingly popular in biology as they tend to be more powerful than static regression models This book is meant for undergraduate and graduate students in physics applied mathematics and data science with an interest in biology as well as students in biology with a strong interest in mathematical methods The book covers deterministic models for example differential equations stochastic models for example Markov chains and autoregressive models and model independent aspects of time series analysis Plenty of examples and exercises are included often taken or inspired from the scientific literature and covering a broad range of topics such as neuroscience cell biology genetics evolution ecology microbiology physiology epidemiology and conservation The book delivers generic modeling techniques used across a wide range of situations in biology and hence readers from other scientific disciplines will find that much of the material is also applicable in their own field Proofs of most mathematical statements are included for the interested reader but are not essential for a practical understanding of the material The book introduces the popular scientific programming language MATLAB as a tool for simulating models fitting models to data and visualizing data and model predictions The material taught is current as of MATLAB version 2022b The material is taught in a sufficiently general way that also permits the use of alternative programming languages **Department of Defense Appropriations** United States.
