Modelling The City Performance Policy And Planning:

Modelling the City Cristoforo Sergio Bertuglia, G. P. Clarke, Alan Geoffrey Wilson, 1994 First published in 1994 Routledge is an imprint of Taylor Francis an informa company The City and Its Sciences Cristoforo S. Bertuglia, Giuliano. Bianchi, Alfredo Mela, 2012-12-06 Recent developments in the field of urban analysis and management are investigated in this book It is a wide ranging collection of essays on the subject drawn from a long term project and seminar held in Italy to review the state of the art and speculate on the future influence on the sciences of the city of the complexity concept Of particular interest is the variety of points of view often contrasting and the attempt to go beyond the conventional approaches to the analysis and the planning of the city While focussing mainly on the European and in particular Italian context the discussion is of general relevance and valuable to anyone concerned with the prospects for the city in the new millenium **Recent Developments in Spatial Analysis** Manfred M. Fischer, Arthur Getis, 2013-03-09 In recent years spatial analysis has become an increasingly active field as evidenced by the establishment of educational and research programs at many universities Its popularity is due mainly to new technologies and the development of spatial data infrastructures This book illustrates some recent developments in spatial analysis behavioural modelling and computational intelligence World renown spatial analysts explain and demonstrate their new and insightful models and methods The applications are in areas of societal interest such as the spread of infectious diseases migration behaviour and retail and agricultural location strategies In addition there is emphasis on the uses of new technoloigoies for the analysis of spatial data through the application of neural network concepts **Geographic Information Research** Massimo Craglia, H. Couclelis, 2020-10-28 The contributors to this edited collection demonstrate that geographic information research is truly global in character cutting across a wide range of disciplines and addressing conceptual methodological technical ethical and political issues alike Of the six themes two are broadly concerned with data integration geographic data infrastructures GIS diffusion and implementation two are more technical and conceptual in nature generalisation concepts and paradigms and two reflect to a larger extent the application driven nature of GIS technology spatial analysis and multimedia Each section is introduced by chapters highlighting the key research issues Further chapters explore these issues in greater depth and benefit from the international collaboration Through the comparison of results included in this book the prospects for advancing the field and addressing the challenges of GIS research are greatly improved Modelling with the Master Equation Günter Haag, 2017-07-31 This book presents the theory and practical applications of the Master equation approach which provides a powerful general framework for model building in a variety of disciplines The aim of the book is to not only highlight different mathematical solution methods but also reveal their potential by means of practical examples Part I of the book which can be used as a toolbox introduces selected statistical fundamentals and solution methods for the Master equation In Part II and Part III the Master equation approach is applied to important applications in the natural and social

sciences The case studies presented mainly hail from the social sciences including urban and regional dynamics population dynamics dynamic decision theory opinion formation and traffic dynamics however some applications from physics and chemistry are treated as well underlining the interdisciplinary modelling potential of the Master equation approach Drawing upon the author's extensive teaching and research experience and consulting work the book offers a valuable guide for researchers graduate students and professionals alike *Making Use of Deleuze in Planning* Gareth Abrahams, 2016-10-04 *Making Use of Deleuze in Planning* translates and re creates some of Gilles Deleuze's most abstract philosophical concepts to form a new practicable planning assessment tool It shows what his philosophy can do for planning theory as well as planning assessment practice and in doing so sets out a pragmatic approach to Deleuzian studies one that helps form bridges between ontological problems and the problems found in professional practice It also breaks new ground in assessment methodology by challenging the essentialist ideas underpinning assessment methods like BREEAM and setting out and testing a new form of non essentialist assessment named SIAM The book argues that Deleuze's philosophy can be made useful to planning as long as one is prepared to adapt and re create his key ontological concepts to respond to the specific demands of the field
