comprehensive effort by political scientists to gather and analyze empirical data about the causes of war In doing so Singer and his colleagues transformed the face of twentieth century political science Their work provoked some of the most important debates in modern international relations about the rules governing territory international intervention and the so called democratic peace Editor Paul F Diehl has now convened some of the world s foremost international conflict analysis specialists to reassess COW s contribution to our understanding of global conflict Each chapter takes one of COW s pathbreaking ideas and reevaluates it in light of subsequent world events and developments in the field The result is a critical retrospective that will reintroduce Singer s important and still provocative findings to a new generation of students and specialists Paul F Diehl is Professor of Political Science and University Distinguished Scholar at the University of Illinois Urbana Champaign

**R.J. Rummel: An Assessment of His Many Contributions** Nils Petter Gleditsch, 2017-05-30 This book is open access under a CC BY license The book provides a critical and constructive assessment of the many contributions to social science and politics made by Professor R J Rummel Rummel was a prolific writer and an important teacher and mentor to a number of people who in turn have made their mark on the profession His work has always been controversial But after the end of the Cold War his views on genocide and the democratic peace in particular have gained wide recognition in the profession He was also a pioneer in the use of statistical methods in international relations His work is not easily classified in the traditional categories of international relations research realism idealism and constructivism He was by no means a pacifist and his views on the US Soviet arms race led him to be classified as a hawk But his work on the democratic peace has become extremely influential among liberal IR scholars and peace researchers Above all he was a libertarian

The United Nations and Foreign Military Interventions Ramses Amer, 1994 The main purpose of this doctoral dissertation is to investigate whether the UN has reacted in a consistent manner to foreign military interventions In Part I foreign military intervention is defined and criteria for the selection of cases to be included in the study are formulated Part II examines the United Nations reactions to the six cases through an investigation of how the Security Council and the General Assembly responded to the interventions In Part III the basic hypothesis is tested with the purpose of evaluating whether it can explain the common features as well as the differences between the United Nations reactions to the six cases The testing shows that the basic hypothesis is untenable *The Legitimacy of International Regimes* Helmut Breitmeier, 2016-12-05 How legitimate are outcomes outputs and impacts of global environmental regimes

Can non state actors contribute to improve the output and input oriented legitimacy of global environmental governance  
 Helmut Breitmeier responds to these questions balancing the volume with both theoretical and empirical chapters The theoretical and conceptual chapters illustrate the relevance and meaning of legitimacy as well as the impact of non state actors on environmental governance They also describe various methodological issues involved with the coding of 23 environmental regimes The empirical chapters are based on the findings of the International Regimes Database IRD They explore whether problem solving in international regimes is effective and equitable and the influence of a regime's contribution to how states comply with international norms These chapters also analyze whether non state actors can improve the output and input oriented legitimacy of global governance systems      **Realist Constructivism** J. Samuel Barkin, 2010-03-25 Realism and constructivism two key contemporary theoretical approaches to the study of international relations are commonly taught as mutually exclusive ways of understanding the subject Realist Constructivism explores the common ground between the two and demonstrates that rather than being in simple opposition they have areas of both tension and overlap There is indeed space to engage in a realist constructivism But at the same time there are important distinctions between them and there remains a need for a constructivism that is not realist and a realism that is not constructivist Samuel Barkin argues more broadly for a different way of thinking about theories of international relations that focuses on the corresponding elements within various approaches rather than on a small set of mutually exclusive paradigms Realist Constructivism provides an interesting new way for scholars and students to think about international relations theory      **Waves, Formations and Values in the World System** Volker Bornschier, Peter Lengyel, 1992-01-01      *The United Nations As a Dispute Settlement System* Connie Peck, 1996-05-23 This text reviews the preventive diplomacy of the United Nations suggesting that the Security Council is not well suited to the task What is needed it argues is a less political and more professional approach namely a larger and more autonomous role for the Secretary General and the development of a greater specialist capacity within the Secretariat The work gives appropriate weight to the importance of peace building both before and after conflict as an integral part of conflict prevention and the United Nations role therein      *Choice* , 2009

Transatlantic Relations after the Russian-Ukrainian War Lorenzo Cladi, 2025-06-30 This book provides a neorealist explanation of transatlantic relations and explores key issues at the forefront of the relationship between the US and its European allies in the context of the Russia Ukraine war Transatlantic relations involving the relationship between the United States and its European counterparts are an essential feature and a cornerstone of the foreign policy of many states Whilst the transatlantic allies share a relationship that has been in place since 1945 the re election of Donald J Trump as US President the continuing war between Russia and Ukraine and unsettled issues around European strategic autonomy all pose questions on the state of the partnership This book utilises a neorealist theoretical framework to tackle these questions It argues that transatlantic relations continue to prosper and European states remain dependent on the US for their security

which is made viable and necessary by means of dealing with collective threats to the security of transatlantic allies of which the Russian invasion of Ukraine is the most obvious recent manifestation The book also deals with other notable case studies of transatlantic relations such as the French intervention in Mali and the US withdrawal from Afghanistan This book will be of interest to students of European security Foreign Policy and International Relations The Return of the State of War Dario Battistella, 2008-03-01 On 18 March 2003 the United States attacked Iraq during Operation Iraqi Freedom On 16 January 1991 the US had attacked Iraq during Operation Desert Storm The two wars were radically different Whereas Operation Desert Storm had been launched with the hope that a new world order might emerge Operation Iraqi Freedom signified the return of an imperial America unilaterally resorting to preventive warfare representative of a Hobbesian conception of international politics Why did the promise of a privileged resort to peaceful inter state conflict resolution implied during the first Gulf War give way to the explicit triumph of the might is right principle during the second Gulf War Is the shift in America's foreign behaviour but a mere parenthesis or potentially the first stage of a long term process likely to undermine the currently prevailing Lockean anarchy This book aims to answer some of these questions
