*Models of Multiparty Electoral Competition* K. Shepsle, 2012-11-12 Kenneth A Shepsle surveys the formal literature on multiparty electoral competition      **Models of Multiparty Electoral Competition** Kenneth A. Shepsle, 1991      **Models of Multiparty Electoral Competition** K. Shepsle, 2012-11-12 Kenneth A Shepsle surveys the formal literature on multiparty electoral competition      The Oxford Handbook of American Political Parties and Interest Groups L. Sandy Maisel, Jeffrey M. Berry, 2012-01-12 The Oxford Handbooks of American Politics are the essential guide to the study of American political life in the 21st Century With engaging new contributions from the major figures in the field of political parties and interest groups this Handbook is a key point of reference for anyone working in American Politics today      *Ibss: Political Science: 1991* British Library of Political and Economic Science, 1993 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences      Journal of Economic Literature , 1993      **Rules, Choice and Strategy** Ram Mudambi, Pietro Navarra, Giuseppe Sobbrío, 2001-01-01 This topical book analyses the change of electoral rules in Italy from proportional representation toward plurality While Italy is used as the illustrative case the analysis has far ranging theoretical and practical implications and will therefore be of interest to academics and researchers of political economy constitutionalism and public choice      U.□□□, 2021-07-01      *Bibliographic Guide to Business and Economics* New York Public Library. Research Libraries, 1976      Bibliographie Internationale de Science Politique , 1991      **The British National Bibliography** Arthur James Wells, 2003      **Books in Print** , 1991      *Subject Guide to Books in Print* , 1991      Theory and Methods in Political Science Stein Ugelvik Larsen, 2005 Bringing together the most essential laws theories generalizations and basic structures of thinking in the field of political science Theory and Methods in Political Science serves as both an introduction into basic theory as well as an exploration of various sub disciplines The most well know laws such as Duverger's law are discussed demonstrating their durability and relevance across the last century Comprised of 31 chapters contributed by 17 authors this book seeks to inspire the world community of political scientists to begin rethinking the theoretical stand of their discipline      *Whitaker's Books in Print* , 1998      *Party Competition* Michael Laver, Ernest Sergenti, 2012 Party competition for votes in free and fair elections involves complex interactions by multiple actors in political landscapes that are continuously evolving yet classical theoretical approaches to the subject leave many important questions unanswered Here Michael Laver and Ernest Sergenti offer the first comprehensive treatment of party competition using the computational techniques of agent based modeling This exciting new technology enables researchers to model competition between several different political parties for the support of voters with widely varying preferences on many different issues Laver and Sergenti model party competition as a true dynamic process in which political parties rise and fall a process where different politicians attack the same political problem in very different ways and where today's

political actors lacking perfect information about the potential consequences of their choices must constantly adapt their behavior to yesterday's political outcomes Party Competition shows how agent based modeling can be used to accurately reflect how political systems really work It demonstrates that politicians who are satisfied with relatively modest vote shares often do better at winning votes than rivals who search ceaselessly for higher shares of the vote It reveals that politicians who pay close attention to their personal preferences when setting party policy often have more success than opponents who focus solely on the preferences of voters that some politicians have idiosyncratic valence advantages that enhance their electability and much more

**The Logic of Multiparty Systems** M.J. Holler,2012-12-06 What determines the number of political parties in a democracy Electoral rules certainly influence the incentives to create and maintain parties However a society's political culture can maintain parties despite electoral rules that give them poor prospects of success Thus comparing the number of parties and differences in electoral rules across countries cannot clearly test the effect of the electoral rules A better test would examine a society with a fairly continuous political culture but a change in electoral rules Postwar France is such a society While the basic social order has not changed there was a drastic change in the electoral system in 1958 which theory implies would reduce the number of parties Thus we can test the hypothesis that the number of parties fell with the change in electoral system We can also calculate an equivalent number of parties to see how closely France approached a two party system under the new regime The first section describes the electoral rules under the Fourth and Fifth Republics The second section develops a model that indicates how the change in electoral rules should have affected the incentives for multiple parties The third section tests the hypothesis that the number of parties fell from the Fourth to the Fifth Republic

1 Electoral Rules In the French Fourth Republic 1945 1958 political parties existed largely to serve the direct interests of their members

**A Model of Electoral Competition with Outside Options** Leonard M. Houantchekon,1994

An Overlapping Generations Model of Electoral Competition Alberto Alesina,Stephen E. Spear,1987 This paper presents a dynamic model of political competition between two parties with different policy preferences A party is explicitly modeled as a sequence of overlapping generations of candidates all of whom face finite decision horizons In general there is a conflict between the interests of the individual policymakers and those of the party which includes subsequent generations of candidates We characterize this conflict and suggest a scheme of intergenerational transfers within the party which can resolve or mitigate this conflict The paper shows how the overlapping generations model can be usefully applied to the political arena
