**The Will of Change** Eva-Maria Maggi, 2015-10-13 In this book Eva Maria Maggi argues that the European Union EU had an impact on institutional reform processes in North Africa in cases where major domestic actors agreed She analyzes how political actors in Morocco used EU neighborhood policies to shape economic and environmental policy between 1995 and 2008 Maggi argues that it was not the design of the EU s neighborhood policies but rather the will of change of domestic actors in Morocco that determined the pace direction of reform and the extent to which the EU continues to play a role in them While Moroccan politics were indeed europeanized Maggi highlights the role of domestic actors who so effectively managed to put forth their own policy priorities and essentially moroccanized the ENP

contents note 1 Introduction Part I Approach Method and Concepts 2 Explaining environmental performance 3 Preferences in environmental politics 4 The institutional settings in 21 OECD countries Part II Environmental Performance in 21 OECD Countries 5 Measuring environmental performance 6 Aggregating environmental performance data Part III Analysis 7 Domestic politics 8 International politics 9 The nexus of domestic and international politics 10 Conclusion      *Symbolic Power in the World Trade Organization* Matthew Eagleton-Pierce, 2013 Questions of power are central to understanding global trade politics and no account of the World Trade Organization WTO can afford to avoid at least an acknowledgment of the concept A closer examination of power can help us to explain why the structures and rules of international commerce take their existing forms how the actions of countries are either enabled or disabled and what distributional outcomes are achieved However within conventional accounts there has been a tendency to either view power according to a single reading namely the direct coercive sense or to overlook the concept entirely focusing instead on liberal cooperation and legalization In this book Matthew Eagleton Pierce shows that each of these approaches betray certain limitations which in turn have cut short or worked against more critical appraisals of power in transnational capitalism To expand the intellectual space the book investigates the complex relationship between power and legitimation by drawing upon Pierre Bourdieu's notion of symbolic power A focus on symbolic power aims to alert scholars to how the construction of certain knowledge claims are fundamental to and entwined within the material struggle for international trade Empirically the argument uncovers and plots the recent strategies adopted by Southern countries in their pursuit of a more equitable trading order By bringing together insights from political economy sociology and law *Symbolic Power in the WTO* not only enlivens and enriches the study of diplomatic practice within a major multilateral institution it also advances the broader understanding of power in world politics      Germany's Uncertain Power H. extensive archival research in depth interviews with involved negotiators and experts and process tracing method it reconstructs the making of the CMIM agreement The multi country analysis reveals the roles played by key actors namely China Japan South Korea Indonesia Malaysia and Thailand in shaping the agreement terms The book goes on to argue that preventing a stalemate or succeeding in concluding arrangements like the CMIM is a product of various strategies and tactics employed by negotiators These include employing bargaining strategies and tactics that help avoid a negotiation deadlock and assessing the conditions under which such strategies and tactics are likely or unlikely to achieve the objective of avoiding bargaining failure As a study of East Asian economic negotiation processes this book will be of huge interest to students and scholars of East Asian cooperation and regionalism as well as finance international business international relations and international political economy

**The Philosophy of Causality in Economics** Mariusz Maziarz,2020-05-13 Approximately one in six top economic research papers draws an explicitly causal conclusion But what do economists mean when they conclude that A causes B Does cause say that we can influence B by intervening on A or is it only a label for the correlation of variables Do quantitative analyses of observational data followed by such causal inferences constitute sufficient grounds for guiding economic policymaking The Philosophy of Causality in Economics addresses these questions by analyzing the meaning of causal claims made by economists and the philosophical presuppositions underlying the research methods used The book considers five key causal approaches the regularity approach probabilistic theories counterfactual theories mechanisms and interventions and manipulability Each chapter opens with a summary of literature on the relevant approach and discusses its reception among economists The text details case studies and goes on to examine papers which have adopted the approach in order to highlight the methods of causal inference used in contemporary economics It analyzes the meaning of the causal claim put forward and finally reconstructs the philosophical presuppositions accepted implicitly by economists The strengths and limitations of each method of causal inference are also considered in the context of using the results as evidence for policymaking This book is essential reading to those interested in literature on the philosophy of economics as well as the

philosophy of causality and economic methodology in general      **Reframing the Social** Poe Yu-ze Wan, 2011 Poe Yu ze Wan argues for a critical realist and systemist social ontology designed to shed light on current debates in social theory concerning the relationship of social ontology to practical social research and the nature of the social It explores the works of the systems theorist Mario Bunge in comparison with the approach of Niklas Luhmann and critical social systems theorists to challenge the commonly held view that the systems based approach is holistic in nature and necessarily downplays the role of human agency      Political Science Research in Practice Akan Malici, Elizabeth Sue Smith, 2013 Nothing rings truer to those teaching political science research methods students hate taking this course Tackle the challenge and turn the standard research methods teaching model on its head with Political Science Research in Practice Akan Malici and Elizabeth Smith engage students first with pressing political questions and then demonstrate how a researcher has gone about answering them walking through real political science research that contributors have conducted Through the exemplary use of survey research experiments field research case studies content analysis interviews document analysis statistical research and formal modeling each chapter introduces students to a method of empirical inquiry through a specific topic that will spark their interest and curiosity Each chapter shows the process of developing a research question how and why a particular method was used and the rewards and challenges discovered along the way Students can better appreciate why we need a science of politics why methods matter with these first hand issue based discussions The following features make this an ideal teaching tool An introductory chapter that succinctly introduces key terms in research methodology Key terms bolded throughout and defined in a glossary Broad coverage of the most important methods used in political science research and the major subfields of the discipline A companion website designed to foster online active learning An instructor s manual and testbank to help incorporate this innovative text into your syllabus and assessment      **Approaches and Methodologies in the Social Sciences** Donatella Della Porta, Michael Keating, 2008-08-28 A revolutionary textbook introducing masters and doctoral students to the major research approaches and methodologies in the social sciences Written by an outstanding set of scholars and derived from successful course teaching this volume will empower students to choose their own approach to research to justify this approach and to situate it within the discipline It addresses questions of ontology epistemology and philosophy of social science and proceeds to issues of methodology and research design essential for producing a good research proposal It also introduces researchers to the main issues of debate and contention in the methodology of social sciences identifying commonalities historic continuities and genuine differences      **Constrained Balancing: The EU's Security Policy** D. foreign policy through three significant empirical cases arms control migration and gender equality The subject is particularly relevant in the current context of increasing contestation of the liberal international order Drawing on norm research and European studies literature the book applies the concept of norm contestation to the broader study of EU foreign policy

**The Power of Deterrence** Amir Lupovici, 2016-09-01 Why do states persist in using force to enhance their deterrent posture even though it is not clear that it is effective This book develops an innovative framework to answer this question viewing deterrence as an idea This allows the author to explain how countries institutionalize deterrence strategy and how this internalization affects policy He argues that the US and Israel have both internalized deterrence ideas and become attached to these practices For them deterrence is not just a means to advance physical security but it constitutes their very selves as deterring actors As a result being unable to deter becomes a threat to their identity evoking strong emotional responses In recognizing these dynamics the book provides a fresh perspective on the US war in Iraq 2003 and the Israeli war in Lebanon 2006 both of which can be seen as attempts to repair each country's shaken sense of self
