Modern China 1840-1972 An Introduction To Sources And Research Aids:

Modern China, 1840-1972 Andrew Nathan, 2020-06-01 Graduate students have traditionally learned a good part of what they know about sources and research aids on modern China through hearsay and serendipity in unsystematic and unreliable bits and pieces. The field has now developed to the point where this need not and ought not to be so. It is now possible for beginning researchers to start with some shared basic knowledge of research aids and documentary resources. This research guide is meant to provide that knowledge. The user of this guide is envisaged as an American graduate student in history or the social sciences who is already familiar with the major English language secondary literature on modern China and is about to begin original research either for a seminar paper or for a dissertation. *China Bibliography* Harriet T. Zurndorfer, 2021-12-06 This volume serves as a guide to all facets of China study from advice on choosing an appropriate literary dictionary to finding the most recent yearbooks that offer statistical data about the contemporary economy. China Bibliography does not restrict itself to one particular discipline but considers the development of Chinese civilization as a whole from its imperial beginnings to the present and therefore demonstrates how one would find information about Chinese history, literature, religion, linguistics, collectanea as well as present day PRC economic and political policies. Because this book also explains how bibliographical data on China has accumulated over the last 300 years including within China itself, it also may help the reader understand the significance of a particular type of reference work. **State and Economy in Republican China** William C. Kirby, 2020-05-11 This manual for students focuses on archival research in the economic and business history of the Republican era, 1911-1949. Following a general discussion of archival research and research aids for the Republican period, the handbook introduces the collections of archives in the People's Republic of China and the Republic of China on Taiwan that contain materials in the areas of economics and business with data on the history of the archives, descriptions of their holdings, and publications on their collections. The second half of the work consists of guided readings in Republican era documents such as government decrees, regulations, and business letters with complete vocabulary lists and explanations of terms. Also included with the handbook are facsimile reproductions of these documents. **The History of Imperial China** Endymion Wilkinson, 2020-03-17 A comprehensive introduction in English to Sinological methods and traditional Chinese historical writing. The time span ranges from earliest times to 1911 with special emphasis on the years between the third century B.C. and the eighteenth century. The author includes introductions to major reference works and biographical information and explanations of such matters as converting traditional dates. In addition to standard histories, the survey covers biographical writing, historical and administrative geography, works on statecraft, archival sources, and Confucian, Buddhist, and Taoist writings. **A Research Guide to Central Party and Government Meetings in China** Kenneth Lieberthal, 2017-07-14 Originally published in 1976, Lieberthal collated notes from Central Party government and military meetings on a national level in China between 1949 and 1975 to create this guide to Chinese policymaking. This

guide provides insight into issues such as the representation of important meetings in the media how policies are made and how policy making in China has varied over time This title will be of interest to students of Asian Studies and International Politics Organizational Behavior 4 John B. Career Patterns in the Ch'ing Dynasty Raymond Chu,William Saywell,2020-08-06 The office of governor general tsung tu was the highest provincial post throughout the Ch ing dynasty As such it was a vital link in the control of a vast empire by a very small and alien ruling elite This is primarily a biographical and statistical analysis of the incumbents of that office By analyzing the biographical data of those who held the position of governor general much may be learned about the nature of the office itself However the main objective of the study is to provide information on career patterns that is the variety of different posts held from the first

official appointment to that of governor general of an important cross section of successful Chinese bureaucrats By plotting and analyzing the different patterns their official careers took we should be able to determine what kind of men reached the top of China's provincial and national administration during the final centuries of China's imperial history the qualifications that were required the factors which prompted rapid promotion or sudden disgrace We should also be able to determine the extent to which these and other factors varied markedly among Manchu Mongol Chinese Bannerman and Han incumbents and whether changes throughout the dynasty can be detected in policies concerning the office or in the career patterns of its personnel If such detection is possible this study may lend support to the view that late imperial China was not static but a society undergoing significant changes xi
