Reproductive Citizens Nimisha Barton, 2020-09-15 In the familiar tale of mass migration to France from 1880 onward we know very little about the hundreds of thousands of women who formed a critical part of those migration waves In *Reproductive Citizens* Nimisha Barton argues that their relative absence in the historical record hints at a larger and more problematic oversight the role of sex and gender in shaping the experiences of migrants to France before the Second World War Barton's compelling history of social citizenship demonstrates how through the routine application of social policies state and social actors worked separately toward a shared goal repopulating France with immigrant families Filled with voices gleaned from census reports municipal statistics naturalization dossiers court cases police files and social worker registers *Reproductive Citizens* shows how France welcomed foreign born men and women mobilizing naturalization family law social policy and welfare assistance to ensure they would procreate bearing French assimilated children Immigrants often embraced these policies because they too stood to gain from pensions family allowances unemployment benefits and French nationality By striking this bargain they were also guaranteed safety and stability on a tumultuous continent Barton concludes that in return for generous social provisions and refuge in dark times immigrants joined the French nation through marriage and reproduction breadwinning and child rearing in short through families and family making which made them more French than even formal citizenship status could

**The History of Public Health and the Modern State**, 2020-06-22 Since George Rosen's comprehensive *History of Public Health* first published in 1956 there has been no internationally comparative survey of the subject Over the past three decades or so however research in this field has expanded rapidly especially with regard to the

history of disease and social order and public health politics and the state Most of these studies have been highly scholarly and specialised and often dealing with only one aspect of public health in any one national context The essays here examine the road history of public health in different national contexts in order to provide a work of comparative reference that could be used as a teaching aid The book focuses on whether the construction of a public health system is an inherent characteristic of the managerial function of modern political systems Thus each essay traces the steps leading to the growth of health government in various nations examining the specific conflicts and contradictions which each incurred As a result the volume highlights the need for further comparative analysis of public health systems as a highly fruitful topic for future study

*French Jewry and the Church-State Dilemma* Zvi Jonathan Kaplan, 2025-09-16 This book analyzes the development of Jewish positions on the relationship between Church and State from the Revolution until the Great War It is a comprehensive study of the complex interplay among different segments of the Jewish population and the community's attempt to come to terms with its social and religious status in the nineteenth and early twentieth centuries As this book demonstrates the organized French Jewish community strategically charted the political waters by steering clear of extremist political positions and by adopting a soft clerical approach to Church State issues This centrist approach subjected French Jews to criticism from both anticlerical and clerical forces but nonetheless the rabbinate consistorial officials and the Jewish press believed that French Judaism and French Jewry would thrive most in a climate of moderation

**The Transition to Capitalism in Modern France** Xavier Lafrance, Stephen Miller, 2023-11-03 Historians since the 1960s argue that the French economy performed as well as did any economy in Europe during the eighteenth and nineteenth centuries thanks to the opportunities for profit available on the market especially the large consumer market in Paris Whatever economic weaknesses existed did not stem from the social structure but from exogenous forces such as wars the lack of natural resources or slow demographic growth This book challenges the foregoing consensus by showing that the French economy performed poorly relative to its rivals because of noncapitalist social relations Specifically peasants and artisans controlled lands and workshops in autonomous communities and did not have to improve labor productivity to survive Merchants and manufacturers cornered markets instead of being subject to the market's competitive imperatives Thus distinctive features of capitalism primitive accumulation the dispossession of peasants and artisans and the competitive obligation faced by merchants and

manufacturers to reinvest profits in order to keep the profits did not prevail until the state imposed them in a process lasting for a century after the 1850s For this reason it was not until the 1960s that France caught up to and in some cases surpassed its economic rivals

*Desiring Whiteness* Caroline Séquin, 2024-10-15 *Desiring Whiteness* uncovers the intertwined histories of commercial sex and racial politics in France and the French Empire Since the French Revolution of 1789 the absence of laws banning interracial marriages has served to reinforce two myths about modern France first that it is a sexual democracy and second it is a color blind nation where all French citizens can freely marry whomever they wish regardless of their race Caroline S quin challenges the narrative of French exceptionalism by revealing the role of prostitution regulation in policing intimate relationships across racial and colonial boundaries in the century following the abolition of slavery *Desiring Whiteness* traces the rise and fall of the French model of prostitution policing in the contact zones of port cities and garrison towns across France and in Dakar Senegal the main maritime entry point of French West Africa S quin describes how the regulation of prostitution covertly policed racial relations and contributed to the making of white French identity in an imperial nation state that claimed to be race blind She also examines how sex industry workers exploited reinforced or transgressed the racial boundaries of colonial rule Brothels served as gatekeepers of whiteness in two arenas In colonial Senegal white only brothels helped deter French colonists from entering unions with African women and producing mixed race children thus consolidating white minority rule In the metropole brothels condoned interracial sex with white sex workers while dissuading colonial men from forming long term attachments with white French women Ultimately brothels followed a similar racial logic that contributed to upholding white supremacy
