Modern Gardens And The Landscape:

Modern Gardens and the Landscape Elizabeth Bauer Kassler, 1984 **MODERN GARDENS AND THE LANDSCAPE.**
BY ELIZABETH B. KASSLER. Elizabeth B. Kassler, 1964 Modern Gardens and the Landscape Elizabeth Bauer
Kassler, 1964 **The Modern Garden** Jane Brown, 2000-10 The Modern Garden is the first fully illustrated overview of the
great gardens of the twentieth century It examines hundreds of gardens created throughout the century and around the
world from the works of Geoffrey Jellicoe to Roberto Burle Marx Russell Page to Dan Kiley BOOKJACKET Gardens in the
Modern Landscape Christopher Tunnard, 2014-07-11 Between 1937 and 1938 garden designer Christopher Tunnard
published a series of articles in the British Architectural Review that rejected the prevailing English landscape style Inspired
by the principles of Modernist art and Japanese aesthetics Tunnard called for a new technique in garden design that
emphasized an integration of form and purpose The functional garden avoids the extremes both of the sentimental
expressionism of the wild garden and the intellectual classicism of the formal garden he wrote it embodies rather a spirit of
rationalism and through an aesthetic and practical ordering of its units provides a friendly and hospitable milieu for rest and
recreation Tunnard's magazine pieces were republished in book form as *Gardens in the Modern Landscape* in 1938 and a
revised second edition was issued a decade later Taken together these articles constituted a manifesto for the modern garden
its influence evident in the work of such figures as Lawrence Halprin Philip Johnson and Edward Larrabee Barnes Long out
of print the book is here reissued in a facsimile of the 1948 edition accompanied by a contextualizing foreword by John Dixon
Hunt *Gardens in the Modern Landscape* heralded a sea change in the evolution of twentieth century design and it also
anticipated questions of urban sprawl historic preservation and the dynamic between the natural and built environments
Available once more to students practitioners and connoisseurs it stands as a historical document and an invitation to
continued innovative thought about landscape architecture Modern Gardens and the Landscape Kassler, 1964

Making the Modern Garden Christopher Bradley-Hole, 2007 A book on the philosophy and practice of contemporary
garden design An opening chapter The Poetry explains how the modern garden has evolved The book is then split into a
series of thematic chapters such as The Grammar and The Narrative *The Making of Place* John Dixon Hunt, 2015-11-15
Gardening is rich in tradition and many gardens are explicitly designed to refer to or honor the past But garden design is also
rich in innovation and in *The Making of Place* John Dixon Hunt explores the wide varieties of approaches aesthetics and
achievements in garden design throughout the world today The gardens Hunt explores offer surprising new ideas about how
we can carve out a space for respite in nature Taking readers to gardens public and private busy and hidden away to
botanical gardens small parks university campuses and vernacular gardens Hunt showcases the differences between cultures
and countries around the globe including the United States United Kingdom France Germany China and Australia Richly
illustrated *The Making of Place* is sure to enchant and inspire even the most modest of home gardeners **Modern Garden**

The Modern Garden Pierluigi Serraino, 2024-10-01 Visionary landscape architecture and garden design at mid century in North America is captured by the greats of the era including Julius Shulman and Ezra Stoller in many previously unpublished photographs The treasures of mid century American architecture have long been celebrated Less appreciated has been the landscape design that provides the framing for these masterworks But more than frame landscape architecture is an art worthy of the spotlight particularly at mid century when the notion that gardens are outdoor spaces for people to live in was championed and brought to the fore now gardens and landscapes are not just external attributes to the house but a continuation of it and its living spaces in a relationship of symbiosis with its pools and terraces its winding lawns and its partly enclosed room like spaces flanked by brick or stone or plantings in a range of colors and forms Approximately seventy five mostly residential projects are thoroughly documented and recounted Landscape architects whose work is featured include Thomas Church Lawrence Halprin and Garrett Eckbo among others Highlights include the dramatic surrounds of Richard Neutra's Perkins House in its Pasadena hillside setting and Frank Lloyd Wright's Marin County Civic Center where environment and building come together in an extraordinary modernist vision of the future made real This book is both a wishful gesture toward a realignment of building with nature and a must have for anyone with a visceral appreciation for a designed environment understood as an integrated whole Ultimately the book underlines the fundamental importance of gardens and landscape design intended in the widest possible sense for the quality of living of all individuals
