seldom if ever concern themselves with the intricate technical debates that all the journals devoted to modern analytic philosophy. Both sides are surely the poorer for this strange bifurcation. For philosophy like all parts of our intellectual culture did not come into existence out of nowhere but was shaped and nurtured by a long tradition in uncovering the roots of that tradition we begin to see current philosophical problems in a broader context and thereby enrich our understanding of their significance. This is surely part of the justification for the practice in almost every university of including elements from the history of philosophy as a basic part of the undergraduate curriculum. But understanding is enriched by looking forwards as well as backwards which is why a good historian of philosophy will not just be concerned with uncovering ancient ideas but will be constantly alert to how those ideas prefigure and anticipate later developments.
