Early Learning of Modern Foreign Languages Marianne Nikolov, 2009. Modern languages are offered to young learners at an increasingly early age in many countries yet few publications have focused on what is available to children in different contexts. This volume fills this gap by documenting the state of the art in researching young language learners using a variety of research methods. It demonstrates how young children progress and benefit from an early exposure to modern languages in different educational contexts and how affective, cognitive, social, linguistic and classroom related factors interact in the processes. A special strength is the range of languages although English is the most widely learnt language, chapters focus on various target languages: Croatian, French, English, German, Italian, Spanish and Ukrainian and the contexts include China, Croatia, Greece, Hungary, Ireland, Norway, Poland, the Ukraine and the United Kingdom.

Teaching Modern Languages Ann Swarbrick, 2002-03-11. Modern language classrooms are currently dominated by the communicative method of language teaching. This reader draws together recent and newly commissioned papers to show the origins of communicative methodology, how it has developed, what its research justification is and how it can most effectively be used in the classroom. Various chapters examine the particular challenges of differentiation, teaching grammar, encouraging pupils to use the target language together and teaching a foreign language to children with special educational needs. The final section discusses ways of developing creativity in the modern languages classroom through the use of drama, creative writing and role play. Anyone involved in teaching modern languages will find this reader a rich source for reflection and good practice.
