framework have been incomplete and sometimes grounded on questionable assumptions To overcome these problems and aid the economic integration agenda that is essential for Africa s long term economic growth and development the author proposes radical reforms to community and national laws *International Dispute Settlement* J. Reconceptualizing International Investment Law from the Global South Fabio Morosini,Michelle Ratton Sanchez Badin,2017-10-26 This book shows how the current reform in investment regulation is part of a broader attempt to transform the international economic order Countries in the North and South are currently rethinking how economic order should be constituted in order to advance their national interests and preferred economic orientation While some countries in the North seek to create alternative institutional spaces in order to promote neoliberal policies more effectively some countries in the South are increasingly skeptical of this version of economic order and are experimenting with alternative versions of legal ordering that do not always sit well with mainstream versions promoted by the North While we recognize that there are differences in approaches to the investment regimes proposed by countries in the South we identify commonalities that could function as the founding pillars of an alternative economic order

The New Global Law Rafael Domingo, 2010-02-26 The dislocations of the worldwide economic crisis the necessity of a system of global justice to address crimes against humanity and the notorious democratic deficit of international institutions highlight the need for an innovative and truly global legal system one that permits humanity to re order itself according to acknowledged global needs and evolving consciousness A new global law will constitute by itself a genuine legal order and will not be limited to a handful of moral principles that attempt to guide the conduct of the world s peoples If the law of nations served the hegemonic interests of Ancient Rome and international law served those of the European nation state then a new global law will contribute to the common good of all humanity and ideally to the development of durable world peace This volume offers a historical juridical foundation for the development of this new global law

The Economics of Courts and Litigation Francisco Cabrillo, Sean Fitzpatrick, 2008-01-01 Dissatisfaction with the working of courts is ubiquitous Legal inertia and maladministration are the norm in many countries and have significant social and economic repercussions No longer a theme relegated to the peripheries of economic analysis the administration of justice is now recognised by most economists as being of fundamental importance for economic development a factor increasingly being acknowledged by policymakers at all levels The departure point for this book is the authors belief in the need for a systematic analysis of the incentive structures facing key players in the courts and litigation process They focus not only on structures pertaining to the common law tradition but offer analysis of issues not normally found in the North American literature such as the Latin notary and the selection and values of judges in civil law systems They further propose an ample list of considerations for a

reform agenda Offering a comprehensive look at the incentives facing many key players in the administration of justice this book should be of great interest to law and economics scholars civil law professors legal reformers international development institutions and law students mindful of the need to improve the functioning of courts **Managing and Negotiating**

Alternative Dispute Resolution in Energy Industries Mustafa Oğuz Tuna, 2022-04-03 The disputes that arise between host states and investors in the energy sector put a high number of valuable and vital projects in the countries at risk Investment treaty arbitration mechanisms as the traditional remedy have provided a solution to these problems for decades However as the number of disputes increases the sufficiency of arbitration in responding to disputes became questionable in addition to the long lasting and costly cases Accordingly ADR mechanisms outside the arbitration cannon have triggered growing interest among practitioners Despite the attraction and the apparent benefits of ADR such as being cheaper faster and with better outcomes compared to arbitration there are also hurdles in front that hinder the application of ADR This has lead to the underuse of ADR in appropriate contexts This study has been conducted to research the gap for the applicability of the ADR methods for investment disputes in the energy sector with the doctrinal analysis of the existing literature either promoting or opposing

ADR Its findings provide guidance for alternative dispute resolution practitioners on when to use ADR how to use ADR and on what disputes ADR to be used to resolve conflicts in International Energy Investment
