Modern Matters Principles Practice In Conserving Recent Architecture:

Conservation of Modern Architecture Susan Macdonald, Kyle C. Normandin, Bob Kindred, 2015-12-08 The importance of protecting significant buildings from decay and destruction would seem to be undeniable Yet whilst the majority of buildings of merit constructed before the Second World War have been highlighted as worthy of protection there is much indifference and in some cases hostility towards many important post war buildings These deserve to receive wider formal recognition but in many cases continue to be mistreated or even demolished This book examines many of the philosophical and practical issues surrounding the conservation of modern buildings and also the problems faced by building practitioners in dealing with buildings constructed in a wider range of styles and materials than at any other time Climate change in particular has forced change in the way in which we think about buildings with the pressures to address issues of energy efficiency becoming more urgent and likely to have consequences that may alter the perceived architectural and historic interest of modern and traditional buildings alike Modern Matters English Heritage, 1996 The contributions to this book consider recent developments in the protection and care of twentieth century buildings and examines the philosophical methodological and practical problems associated with conserving our recent past Part I discusses philosophy protection and management Part II investigates the progress that has been made in dealing with the practical issues of conserving modern buildings with special attention given to common materials such as concrete and metal windows A selection of international case studies provide useful examples of the problems that may be encountered *Concrete* Susan Macdonald, 2008-04-15 This book deals with the diagnosis prognosis and repair issues associated with concrete buildings Since the patenting and subsequent large scale manufacture of modern cement in the nineteenth century concrete has become one of the most widely used construction materials in the world Those concerned with building pathology now need to understand problems specifically related to concrete and to identify appropriate methods of repair and remediation This book brings together experts in the history defect diagnosis remediation and maintenance of concrete It includes case studies from around the world to illustrate the various repair methods available It will provide an invaluable guide for architects building surveyors structural engineers and specialist contractors as well as students of building pathology and conservation **Routledge**

Companion to Global Heritage Conservation Vinayak Bharne, Trudi Sandmeier, 2019-02-12 The act of identifying protecting restoring and reusing buildings districts and built landscapes of historic and cultural significance is at its best a reflective and consequential process of urban and socio economic reform It has the potential to reconcile conflicting memories meanings and cultural tensions bridging and expanding the perceived boundaries of multiple disciplines towards bigger aspirations of city making and social justice How and where do such aspirations overlap and differ across nations and societies across the world In places with different histories governance structures regulatory stringency and populist dispositions who are the specific players and what are the actual processes that bring about bigger and deeper change

beyond just the conservation of an architectural or urban entity of perceived value This collection of scholarly articles by theorists academics and practitioners explores the global complexity guises and potential of heritage conservation Going from Tokyo to Cairo Shenzhen to Rome and Delhi to Moscow this volume examines a vast range of topics indigenous habitats urban cores vernacular infrastructure colonial towns squatters burial sites war zones and modern landmarks It surfaces numerous inherent issues water stress deforestation social oppression poverty religion immigration and polity expanding the definitions of heritage conservation as both a professional discipline and socio cultural catalyst This book argues that the intellectual and praxis limits of heritage conservation as the agency of reading defining and intervening with built heritage can be expansive aimed at bigger positive change beyond a specific subject or object plural enmeshed with multiple fields and specializations and empathetic born from the actual socio political realities of a place

Building Conservation

Philosophy John Earl, Andrew Saint, 2015-12-08 This is a book about ideas rather than techniques Public thirst for visible evidence of the past is not as it is often represented a recent phenomenon It was already well developed when an overseer of ancient monuments was appointed in sixth century Rome But if the desire to preserve aspects of the past is to do more than respond to popular whims and fashions or represent the personal views of ivory towered scholars and specialists it needs to have some kind of solid logical basis Philosophical questions are raised at every turn On what basis can buildings be singled out as historic buildings demanding special protection On what authority can we justify interfering with private property rights in pursuing such protective processes And how should we judge what is acceptable and unacceptable in the treatment of the buildings we value In this third substantially revised edition the author examines the nature of monuments and the varied motives for preserving them He traces the history of movements to preserve old buildings and the furious conflicts that have frequently surrounded restoration campaigns Philosophical problems arising in modern conservation practice including such controversial issues as skin deep preservation and the use of substitute materials are considered in detail More space is devoted in this edition to contextual issues New sections deal with issues of sustainability and the relationship of buildings to the townscape and landscape The number of illustrations has also been greatly increased The book is designed especially for students approaching the subject for the first time but may well be found stimulating by practitioners No easy formulae are offered What conservators have to nurture the author insists is an inquiring and self critical frame of mind enabling them to proceed from comprehensive knowledge of the buildings for the time being in their care via logical argument to defensible if not inevitable solutions

Matter, Materiality and Modern Culture

Paul Graves-Brown, 2012-11-12 Matter Materiality and Modern Culture offers a new approach to the study of contemporary objects to give the reader a new understanding of the relationship between people and their material world It asks how the very stuff of our world has shaped our societies by addressing a broad array of questions including why do Berliners have such strange door keys should the Isle of Wight pop festival be preserved could aliens tell a snail shell from a waste paper

Architectural Conservation in Europe and the Americas John H. Stubbs, Emily G. Makaš, 2011-05-04 From such well known and long vexed sites as the Athenian Acropolis to more contemporary locales like the Space Age Modernist capital city of Brasília the conflicting and not always neatly resolvable forces that bear upon preservation are addressed as clearly and thoughtfully as the general reader could hope for New York Review of Books an astonishing feat of research compilation and synthesis Context The book delivers the first major survey concerning the conservation of cultural heritage in both Europe and the Americas Architectural Conservation in Europe and the Americas serves as a convenient resource for professionals students and anyone interested in the field Following the acclaimed Time Honored this book presents contemporary practice on a country by country and region by region basis facilitating comparative analysis of similarities and differences The book stresses solutions in architectural heritage protection and the contexts in which they were developed

Engaging with Heritage and Historic Environment Policy Hana Morel, Michael Dawson, 2021-06-17 A comprehensive review of policy and practice in the historic environment this book exposes the tensions challenges and difficulties faced by the heritage sector at a time of political volatility This collection comes at a key moment for planning policy in the historic environment of England The papers reflect a wide range of views and experience in the practical environment of policy and implementation Contributors give perspectives on both policy and practice from legal counsel to local authorities from the country's largest NGO to the museums sector Some conclusions are controversial providing an important insight into the operation of national and local government The thrust of the volume is the need to close the gap between research and policy production Written when the UK government's White Paper Planning for the Future August 2020 was in preparation the chapters explore the implementation of policy its unexpected and unanticipated outcomes and the enduring legacies of guidance and established practice It highlights tensions within the sector and the need for collaboration and partnership This book is the most recent and comprehensive review of how the heritage sector has evolved and draws special attention to the importance of the historic environment not just in planning policy but for the country as a whole The chapters in this book were originally published in The Historic Environment Policy Practice

Managing Historic Sites and Buildings David Baker, Gill Chitty, 2013-02-01 Managing Historic Sites and Buildings looks at the choices and the tensions that exist in conservation and interpretation of the heritage Preservation and presentation are central activities arguably means and ends in the conservation of the historic environment But are they self reinforcing or do they work against each other In a series of essays which span from prehistoric sacred site to Second World War military remains from medieval monastery to 1970s housing estate we look at contemporary concerns and debates about the way the past is shaped physically and metaphorically by these two aspects of heritage management Starting from the position that the fundamental purpose of the whole process is to communicate understanding about the human past these essays examine how far the ideologies strategies tactics and

techniques of preservation and presentation are mutually supportive the success of integrated approaches that are inclusive of social economic and green environmental concerns is understood but the value of developing truly sustainable management for individual historic places is only just becoming evident At the heart of such an approach lies a crucial relationship between the activity of preserving historic places and of promoting understanding of their significance **The**

Challenge of Change: Dealing with the Legacy of the Modern Movement D. van den Heuvel, M. Mesman, W. Quist, 2008-09-11 Conservation of architecture and the conversation of Modern architecture in particular has assumed new challenges Rather than attempting to return a Modern building to its resumed original state the challenge of these proceedings is to revalue the essence of the manifold manifestations of Modern architecture and redefine its meanings in a rapidly changing world of digital revolution worldwide mobility and environmental awareness This volume aims to provide a variety of platforms for the exchange of ideas and experience A large international group of architects historians scholars preservationists and other parties involved in the processes of preserving renovating and transforming Modern buildings has been invited to investigate the paradox of the Modern monument and to reflect on the manifold dilemmas of change and continuity The general theme is elaborated through five sub themes The sub theme Change and Continuity addresses the tensions between change and continuity from a historical theoretical perspective Restructuring Cities and Landscapes focuses on the larger scale of city and landscape while Shifts in Programme and Flexibility draws attention to the scale of the building or building complex and questions limits of re use and flexibility The fourth sub theme deals with education and the fifth sub theme Progress Technology and Sustainability considers specific issues of techniques and materials **Structural**

Urban Histories in Practice Jeffrey Kruth, Steven
Rugare, 2022-09-08 This volume brings together ideas about the material and social transformation of cities by asking what is the relationship between history memory and the contemporary city The urgency of this question grows in the contexts of rapid urbanization in the Global South and urban decline in the deindustrializing areas of the Global North Within these spaces multiple disciplines shape our capacity to know the contemporary city The work presented here invites the reader to undertake critical and creative approaches regarding how these disciplines might shape this process ultimately making it more equitable and just Using various methods the contributors engage in critical readings of specific built and discursive

legacies in numerous global contexts Differing forms of a social agenda permeate each piece but none is utopian or totalizing Rather the emphasis is on various forms of close reading The authors begin with the city as found and address each context in specific and precise terms The contributions here bring together histories in critical and creative ways while also catalyzing future possibilities In this way these writings frame urban history and morphology discourse not only as arenas for theoretical posturing but also as calls for action

The Recovery of Beauty: Arts, Culture, Medicine Corinne Saunders,David Fuller,2015-08-22 An interdisciplinary collection of essays exploring the complex and conflicted topic of beauty in cultural arts and medicine looking back through the long cultural history of beauty and asking whether it is possible to recover beauty

Building Adaptation James Douglas,2006-08-11 As existing buildings age nearly half of all construction activity in Britain is related to maintenance refurbishment and conversions Building adaptation is an activity that continues to make a significant contribution to the workload of the construction industry Given its importance to sustainable construction the proportion of adaptation works in relation to new build is likely to remain substantial for the foreseeable future especially in the developed parts of the world Building Adaptation Second Edition is intended as a primer on the physical changes that can affect older properties It demonstrates the general principles techniques and processes needed when existing buildings must undergo alteration conversion extension improvement or refurbishment The publication of the first edition of Building Adaptation reflected the upsurge in refurbishment work The book quickly established itself as one of the core texts for building surveying students and others on undergraduate and postgraduate built environment courses This new edition continues to provide a comprehensive introduction to all the key issues relating to the adaptation of buildings It deals with any work to a building over and above maintenance to change its capacity function or performance

Contemporary Issues in Housing Design Kutay Güler,2018-11-02 The word house has evolved throughout the millennia and infused itself into many languages however the basic reference to covering and sheltering has always been preserved Housing in the contemporary sense refers to a relatively complex structure comprising different shapes and sizes accommodating various functionalities evolving in accordance with cultural social technological and natural progresses A house provides more than basic protection but is the backdrop for the daily lives of occupants and even a reflection of an individual s character beliefs and socioeconomic status This book discusses an array of critical contemporary issues on housing design pertaining to sustainable practices emerging technologies heritage conservation humanitarian efforts fictional environments and their effects on occupants physical and psychological experience and well being As such it will serve to develop further understanding and to enrich the perspectives of any designer and educator invested in the subject

Analysing Buildings from Context to Detail in Time Hielkje Zijlstra,2009 Technology provided the author of this book with the inspiration to develop a more comprehensive research

method to assess buildings Analysing Buildings from Context to Detail in time ABCD Research Method Technology at academic level should be considered in the analysis of a building In this book the focus is on construction engineering the study of the requirements associated with constructing buildings Providing information on practice is a key element in construction engineering which is a learning process Changes are made during the life of a building and they might be made differently if the history and technical aspects of the building were studied in greater detail Both maintenance and changes require us to understand the building concerned

Authentic Reconstruction John Bold, Peter Larkham, Robert Pickard, 2017-12-14

Notions of authenticity lie at the heart of many questions about heritage and identity in the built environment These questions are most pertinent when buildings have been destroyed in disaster or war and the built fabric is being reconstructed to reinstate traditional or historic appearances in place of what was lost Authentic Reconstruction examines this idea of reconstruction using it as a prompt to examine a range of deeper issues on heritage and the built environment From post WWII reconstruction programmes through to the rebuilding of historic cultural landscapes lost in natural disasters this collection of essays by heritage specialists provides a wide range of case studies and discussions Each presents responses to crises and lessons learned in order to extrapolate general guidelines for future actions by politicians architects and planners in reconstructing buildings The book also looks beyond disaster and war noting how authenticity bears on political intentions and image building exploring how reconstruction is used to tell a political or historical story so conditioning the ways in which the built environment is perceived and appreciated by its users This is not just about the buildings as bricks and mortar but about perceptions of identity and the social and historical values which buildings and spaces embody for a richly diverse population This book will be valuable to all who are concerned with heritage as practitioners or consumers particularly those concerned with reconstruction and the creation of authentic places and experiences architects architectural historians town planners preservationists conservationists and those involved in heritage management and material culture
