Modern Nationalism and Religion Salo Wittmayer Baron, 1960 **Modern Nationalism and Religion** Salo Wittmayer Baron, 1947 **Criminal Law Amendment Bill**, 1922 **Nationalism** Carlton J. H. Hayes, 2016-03-16 This classic volume tells the story of nationalism the fusion of patriotism with ethnic consciousness It documents the emergence of nationalism in the modern world and the way that nationalism has become a substitute for religion over the past two centuries Nationalism for Hayes draws its power from cultural and social factors primarily language Second to language are historical forces that stem from an accumulation of a people s remembered or imagined experiences Hayes bases his observations on historic European examples He sees nationalism as a religion reacting against historic Christianity and the values of the Western tradition This combination of powerful forces stresses neither charity nor the brotherhood of man Historically it has rationalized selfishness intolerance and violence The growth of nationalism Hayes observed brings not peace but war As a testament to its timeless insight Nationalism remains an informative guide despite the failure of globalization the Internet and international communications and connectivity to move us beyond the bonds of nationalism Hayes s linking of the potent forces of nationalism and religion still rings true the insurgency in Ukraine the unrest in the Middle East and tribal conflicts in Africa are all undergirded by nationalist sentiments **Nationalism** Carlton J. H. Hayes, 2017-07-28 This classic volume tells the story of nationalism the fusion of patriotism with ethnic consciousness It documents the emergence of nationalism in the modern world and the way that nationalism has become a substitute for religion over the past two centuries Nationalism for Hayes draws its power from cultural and social factors primarily language Second to language are historical forces that stem from an accumulation of a people s remembered or imagined experiences Hayes bases his observations on historic European examples He sees nationalism as a religion reacting against historic Christianity and the values of the Western tradition This combination of powerful forces stresses neither charity nor the brotherhood of man Historically it has rationalized selfishness intolerance and violence The growth of nationalism Hayes observed brings not peace but war As a testament to its timeless insight Nationalism remains an informative guide despite the failure of globalization the Internet and international communications and connectivity to move us beyond the bonds of nationalism Hayes s linking of the potent forces of nationalism and religion still rings true the insurgency in Ukraine the unrest in the Middle East and tribal conflicts in Africa are all undergirded by nationalist sentiments The Crucified Nation Alan Davies, 2008 This book examines the nexus between religion and politics considered in one of its most controversial aspects The starting point is the 2001 attack on the United States which a Canadian commentator ingeniously described as the passion of America This designation suggested an interesting inquiry into other so called national passions the notion of the Christ nation crucified by evil powers because of its higher virtue This motif is explored by analysing five modern nationalisms that have employed Christian symbolism in this manner Poland France Germany Ireland and Palestine The author investigates the way in which

fundamental Christian concepts are distorted and corrupted in the process and points to the inherent dangers of this form of political self glorification Poets philosophers novelists and preachers have all played a major part in promoting the idea of the Christ nation at certain times mostly in the nineteenth century but also today Famous examples are Adam Mickiewicz in Poland Victor Hugo in France the patriotic Lutherans during the First World War in Germany Patrick Pearse in Ireland and certain Palestinian nationalist poets today The clash of cultures religions nationalism and civilisations in the world today is ever more strident The passion narratives of the five nations are interwoven with historical circumstance in order to cast light on the endurance and power of the narratives to arrive at a final critique and tract for the times *Ethnonationalism in the Contemporary World* Daniele Conversi,2004 Essential reading for anyone interested in problems associated with ethnicity and nationalism it offers a guide to understanding the ethnonational forces that underpin much of recent terrorist activity *Nation and Religion* Peter van der Veer,Hartmut Lehmann,2020-10-06 Does modernity make religion politically irrelevant Conventional scholarly and popular wisdom says that it does The prevailing view assumes that the onset of western modernity characterized by the rise of nationalism the dominance of capitalism and the emergence of powerful state institutions favors secularism and relegates religion to the purely private realm This collection of essays on nationalism and religion in Europe and Asia challenges that view Contributors show that religion and politics are mixed together in complex and vitally important ways not just in the East but in the West as well The book focuses on four societies India Japan Britain and the Netherlands It shows that religion and nationalism in these societies combined to produce such notions as the nation being chosen for a historical task imperialism for example the possibility of national revival and political leadership as a form of salvation The volume also examines the qualities of religious discourse and practice that can be used for nationalist purposes paying special attention to how religion can help to give meaning to sacrifice in national struggle The book s comparative approach underscores that developments in colonizing and colonized countries too often considered separately are subtly interrelated In addition to the editors the contributors are Benedict R Anderson Talal Asad Susan Bayly Partha Chatterjee Frans Groot Harry Harootunian Hugh McLeod Barbara Metcalf and Peter van Rooden *The Routledge Handbook of Religion and Security* Chris Seiple,Dennis Hoover,Pauletta Otis,2013 This Handbook offers analyses of how nine different world religions have related to issues of war and peace theologically and practically overviews of how scholars and practitioners in nine different topical areas of security studies have or have not dealt with the relationship between religion and security and five case studies of particular countries in which the religion security nexus is vividly illustrated Nigeria India Israel the former Yugoslavia and Iraq *Nationalism, Religion, and Ethics* Gregory Baum,2001 A look at the ethics of nationalism and the modern state In simple language Gregory Baum discusses the writings of four men whose nationalism was shaped by their religion and their time Martin Buber Mahatma Gandhi Paul Tillich and Jacques Grand Maison **The Routledge Handbook of Religion, Politics and Ideology** Jeffrey Haynes,2021-08-14 This comprehensive handbook

examines relationships between religion politics and ideology with a focus on several world religions Christianity Islam Buddhism Hinduism and Judaism in a variety of contexts regions and countries Relationships between religion politics and ideology help mould people s attitudes about the way that political systems both domestically and internationally are organised and operate While conceptually separate religion politics and ideology often become intertwined and as a result their relationships evolve over time This volume brings together a number of expert contributors who explore a wide range of topical and controversial issues including gender nationalism communism fascism populism and Islamism Such topics inform the overall aim of the handbook to provide a comprehensive summary of the relationships between religion politics and ideology including basic issues and new approaches This handbook is a major research resource for students researchers and professionals from various disciplinary backgrounds including religious studies political science international relations and sociology

Political Function of Religion in Nationalistic Confrontations in Greater Kurdistan Sabah Mofidi, 2022-01-21 This book shows how the state based and stateless ethno nationalist forces in the four countries overlapping Kurdistan i e Turkey Iran Syria and Iraq have politically deployed religion in their nationalistic confrontations in Kurdistan as the converging area between them The stances and actions of these different antagonistic forces are analyzed as well as the dynamics between them Unlike other studies on Kurdistan it focuses on Greater Kurdistan as the arena for nationalist conflicts instead of looking only at separate parts of Kurdistan The research presented in this book shows that both the religious state Iran and so called secular states Turkey Iraq and Syria make use of religious discourse and symbols in order to impose power over their part of Greater Kurdistan and as a way of countering Kurdish nationalist movements The dominant ethno nationalist groups of Fars Turk and Arab have politically used Islam during wars and elections to gain and maintain their power over Kurdish areas Conversely Kurdish nationalist groups have also tried to neutralize those states policies by evoking religious symbols and discourses Nevertheless as the book concludes the unequal political power balance between the four states on one side and the stateless Kurdish nationalist groups on the other has resulted in the latter being restricted in using religion as a means to gain power

Tse,2024-12-02 This international and interdisciplinary handbook offers a comprehensive and an in depth overview of contemporary research theory and practice in the geographies of religion in various parts of the world and with different populations The book showcases the major theoretical interventions in the field and the debates about the existential constitution of sacred space and what this means for secularization It outlines the most significant geographical themes related to these new developments with their implications for how to think about landscapes space bodies and worlds The book also discusses the future of the field especially in the realms of encounters and ethics economies and markets institutions and organisations movements and migrations and media and mediums It also offers views from disciplines outside of geography including from sociology anthropology religious studies and media and communications which demonstrates the contributions of geographers of religion to wider intellectual conversations and debates *The Universal God* James E. Will,1994-01-01 How can Christians bring about peace and justice in the world when Christianity seems either to claim the absolute truth about God or to dissolve into disempowering relativism James Will seeks an answer for this crucial question in the spiritual and intellectual life of the church He challenges the traditional western idea of God as omnipotent and unchanging instead offering the theory of the universal relationality of God Writing from the perspective of process theology Will says that just as God had an impact on the world so the world has an impact on God God is related and responsive to the world In the modern world where many cultures and belief systems are in contact and often conflict with one another Will s broadening of the conception of God offers an integration of many cultures and beliefs recognizing their relatedness without reducing any of them In this way Will believes the universal God may bring love and peace to a pluralistic and often divided world

Language, Religion and National Identity in Europe and the Middle East John Myhill, 2006-01-01 This book discusses the historical record of the idea that language is associated with national identity demonstrating that different applications of this idea have consistently produced certain types of results Nationalist movements aimed at unification based upon languages which vary greatly at the spoken level e g German Italian Pan Turkish and Arabic have been associated with aggression fascism and genocide while those based upon relatively homogeneous spoken languages e g Czech Norwegian and Ukrainian have resulted in national liberation and international stability It is also shown that religion can be more important to national identity than language but only for religious groups which were understood in premodern times to be national rather than universal or doctrinal e g Jews Armenians Maronites Serbs Dutch and English this is demonstrated with discussions of the Holocaust the Armenian Genocide the civil war in Lebanon and the breakup of Yugoslavia the United Netherlands and the United Kingdom
