The parts of the book discuss and describe i the concepts of TENSE ASPECT and MOOD ii the Tibetan system of RELATIVE TENSE and aspectual values with main sections on Old and Classical Tibetan Lhasa Tibetan and East Tibetan Amdo and Kham and iii West Tibetan Ladakhi Purik Balti Part iv presents the comparative view Discussing the similarities and differences of temporal and aspectual concepts the study rejects the general claim that ASPECT is a linguistic universal A new linguistic concept FRAMING is introduced in order to account for the aspect like conceptualisations found in e g English The concept of RELATIVE TENSE or taxis may likewise not be universal Among the Tibetan varieties West Tibetan is unique in having fully grammaticalized the concept of ABSOLUTE TENSE West Tibetan is compared diachronically with Old and Classical Tibetan documented since the mid 8th century and synchronically with several contemporary Tibetan varieties The grammaticalized forms of each variety are described on the basis of their employment in discourse The underlying general function of the Tibetan verbal system is thus shown to be that of RELATIVE TENSE Secondary aspectual functions are described for restricted contexts A special focus on the pragmatic or metaphorical use of present tense constructions in Tibetan leads to a typology of narrative conventions The last part also offers some suggestions for the reconstruction of the Proto Tibetan verb system

**Issues in Mandarin Chinese Word Structure Analysis** Kylie Hsu,2002     Universal Quantification with Skolemization as Evidenced in Chinese and English Shi-Zhe Huang,2005 This book is concerned with the formal definition of universal quantification The central claim advanced here is that the formal definition of EVERY which stands for any distributive universal quantifier ought to incorporate a skolem function to capture the paired reading that for every x there is a y We claim that this paired reading is present in all universal quantifier sentences This definition of EVERY requires a variable in the scope of the universal quantifier word This is so because the skolem function facilitates the paired reading by linking the choice of the value for y with the choice of the value for x Under this view securing a variable in the scope of a universal quantifier word becomes a make or break requirement of universal quantification The issues dealt with in this book are highly theoretical and formal but we approach them almost entirely from an empirical perspective supporting the skolemized definition of EVERY with evidence drawn exclusively from natural language data mostly from Chinese but with some crucial data from English as well scoping properties of indefinites in Chinese semantic properties of the Chinese adverb dou and a number of conjunction and additive words and event semantics It also offers a novel way of explaining the interaction of dou with interrogative Wh phrases     *Subject Guide to Books in Print* ,2001     AMDO TIBETAN LANGUAGE DPAL IDAN BKRA.
