Modern Buildings in Britain Owen Hatherley, 2022-04-07 The definitive illustrated guide to modern British architecture from one of the most acclaimed critics at work today Modernism is now a century old and its consequences are all around us built into our everyday lived environments Its place in Britain's history is fiercely contested and its role in our future is the subject of ongoing controversy but modernist buildings have undoubtedly changed our cities politics and identity forever In *Modern Buildings in Britain* Owen Hatherley applauds the ambition and explores the significance of this most divisive of architectures travelling from Aberystwyth to Aberdeen from St Ives to Shetland in search of our most important and distinctive modern buildings Drawing on hundreds of examples we learn how the concrete of Brutalism embodies post war civic principles how corporate values were expressed in the glass facades of the International Style and why Ecomodernist experimentation is often consigned to the geographic fringes As Hatherley considers the social political and cultural value of these structures a number of which are threatened by demolition two linked questions emerge what happens to a building after it has been lived in and what becomes of an idea when its time has passed With more than six hundred pages of trenchantly opinionated often witty analysis and with three hundred photographs in duotone and colour *Modern Buildings in Britain* is a landmark contribution to the history of British architecture Great Buildings DK Publishing, 2012-08-20 *Great Buildings* is a fabulous photographic tour of more than 50 of the world's most magnificent buildings From monumental pyramids to the latest chrome and glass skyscrapers and sculptural looking museums the buildings are arranged chronologically providing an excellent introduction to the history of architecture **Mathematical Excursions to the World's Great Buildings** Alexander J. Hahn, 2012-07-22 How mathematics helped build the world's most important buildings from early Egypt to the present From the pyramids and the Parthenon to the Sydney Opera House and the Bilbao Guggenheim this book takes readers on an eye opening tour of the mathematics behind some of the world's most spectacular buildings Beautifully illustrated the book explores the milestones in elementary mathematics that enliven the understanding of these buildings and combines this with an in depth look at their aesthetics history and structure Whether using trigonometry and vectors to explain why Gothic arches are structurally superior to Roman arches or showing how simple ruler and compass constructions can produce sophisticated architectural details Alexander Hahn describes the points at which elementary mathematics and architecture intersect Beginning in prehistoric times Hahn proceeds to guide readers through the Greek Roman Islamic Romanesque Gothic Renaissance and modern styles He explores the unique features of the Pantheon the Hagia Sophia the Great Mosque of Cordoba the Duomo in Florence Palladio's villas and Saint Peter's Basilica as well as the U S Capitol Building Hahn celebrates the forms and structures of architecture made possible by mathematical achievements from Greek geometry the Hindu Arabic number system two and three dimensional coordinate geometry and calculus Along the way Hahn introduces groundbreaking architects including Brunelleschi Alberti da Vinci Bramante

Michelangelo della Porta Wren Gaud Saarinen Utzon and Gehry Rich in detail this book takes readers on an expedition around the globe providing a deeper understanding of the mathematical forces at play in the world's most elegant buildings

Great Building Designs 1900 - Today Ian Graham, 2015-08 Examines the development of architectural design from the Flatiron and Empire State Buildings to Burj Khalifa in Dubai and the Shard in London profiles noted architects and discusses the design process

Turrets, Towers, and Temples: The Great Buildings of the World, as Seen and Described by Famous Writers Esther Singleton, 2020-09-28 A yard or two farther we pass the hostelry of the Black Eagle and glancing as we pass through the square door of marble deeply moulded in the outer wall we see the shadows of its pergola of vines resting on an ancient well with a pointed shield carved on its side and so presently emerge on the bridge and Campo San Mois whence to the entrance into St Mark's Place called the Bocca di Piazza mouth of the square the Venetian character is nearly destroyed first by the frightful facade of San Mois which we will pause at another time to examine and then by the modernizing of the shops as they near the piazza and the mingling with the lower Venetian populace of lounging groups of English and Austrians We will push fast through them into the shadow of the pillars at the end of the Bocca di Piazza and then we forget them all for between those pillars there opens a great light and in the midst of it as we advance slowly the vast tower of St Mark seems to lift itself visibly forth from the level field of chequered stones and on each side the countless arches prolong themselves into ranged symmetry as if the rugged and irregular houses that pressed together above us in the dark alley had been struck back into sudden obedience and lovely order and all their rude casements and broken walls had been transformed into arches charged with goodly sculpture and fluted shafts of delicate stone And well may they fall back for beyond those troops of ordered arches there rises a vision out of the earth and all the great square seems to have opened from it in a kind of awe that we may see it far away a multitude of pillars and white domes clustered into a long low pyramid of coloured light a treasure heap it seems partly of gold and partly of opal and mother of pearl hollowed beneath into five great vaulted porches ceiled with fair mosaic and beset with sculpture of alabaster clear as amber and delicate as ivory sculpture fantastic and involved of palm leaves and lilies and grapes and pomegranates and birds clinging and fluttering among the branches all twined together into an endless network of buds and plumes and in the midst of it the solemn forms of angels sceptred and robed to the feet and leaning to each other across the gates their figures indistinct among the gleaming of the golden ground through the leaves beside them interrupted and dim like the morning light as it faded back among the branches of Eden when first its gates were angel guarded long ago And round the walls of the porches there are set pillars of variegated stones jasper and porphyry and deep green serpentine spotted with flakes of snow and marbles that half refuse and half yield to the sunshine Cleopatra like their bluest veins to kiss the shadow as it steals back from them revealing line after line of azure undulation as a receding tide leaves the waved sand their capitals rich with interwoven tracery rooted knots of herbage and drifting leaves of acanthus and vine and mystical signs all beginning and ending in the

Cross and above them in the broad archivolt a continuous chain of language and of life angels and the signs of heaven and the labours of men each in its appointed season upon the earth and above these another range of glittering pinnacles mixed with white arches edged with scarlet flowers a confusion of delight amidst which the breasts of the Greek horses are seen blazing in their breadth of golden strength and the St Mark's Lion lifted on a blue field covered with stars until at last as if in ecstasy the crests of the arches break into a marble foam and toss themselves far into the blue sky in flashes and wreaths of sculptured spray as if the breakers on the Lido shore had been frost bound before they fell and the sea nymphs had inlaid them with coral and amethyst *Modern Building* John Winter, 1969 **Building Images** Chicago Historical Society, 2000-09 Hedrich Blessing has taken over 500 000 photographs an archive so vast and historically valuable that it was donated to the Chicago Historical Society for preservation BOOK JACKET *Let us follow the Clyde* James Denham, 2013-10-27 This is a travelogue through the history of the communities on the flow of the River Clyde from the hills of South Lanarkshire through the historic town of Lanark the great industrial heartlands of Hamilton Motherwell Cambuslang and Rutherglen Discover the great city of Glasgow then visit Renfrew Clydebank Dumbarton Old Kilpatrick Paisley and Port Glasgow Learn of the greatest shipping river in the world The Architecture of Persistence David Fannon, Michelle Laboy, Peter Wiederspahn, 2021-08-24 The Architecture of Persistence argues that continued human use is the ultimate measure of sustainability in architecture and that expanding the discourse about adaptability to include continuity as well as change offers the architectural manifestation of resilience Why do some buildings last for generations as beloved and useful places while others do not How can designers today create buildings that remain useful into the future While architects and theorists have offered a wide range of ideas about building for change this book focuses on persistent architecture the material spatial and cultural processes that give rise to long lived buildings Organized in three parts this book examines material longevity in the face of constant physical and cultural change connects the dimensions of human use and contemporary program and discusses how time informs the design process Featuring dozens of interviews with people who design and use buildings and a close analysis of over a hundred historic and contemporary projects the principles of persistent architecture introduced here address urgent challenges for contemporary practice while pointing towards a more sustainable built environment in the future The Architecture of Persistence Designing for Future Use offers practitioners students and scholars a set of principles and illustrative precedents exploring architecture's unique ability to connect an instructive past a useful present and an unknown future **The American Architect and Building News**, 1893 The American Spirit in Architecture Talbot Hamlin, 1926 Journal of the Royal Institute of British Architects, 1928 *Sacred Architecture in a Secular Age* Marie Clausén, 2016-02-26 Having won more than one recent poll as Britain's best loved building the appeal of Durham Cathedral appears abiding which begs the question whether an iconic sacred building can retain meaning and affective pertinence for contemporary secular visitors Using the example of Durham Cathedral this book

sets out to explore wherein the appeal of historic churches lies today and considers questions of how and why their preservation into a post Christian era should be secured By including feedback from visitors to the cathedral and the author's own very personal account of the cathedral in the form of an ekphrasis this work seeks to privilege an interpretation of architecture that is based on the individual experience rather than on more conventional narratives of architecture history and cultural heritage policy Recognising the implication of our choice of narrative on the perceived value of historic churches is crucial when deliberating their future role This book puts forth a compelling case for historical sacred architecture suggesting that its loss through imperceptive conservation practices as much as through neglect or demolition would diminish us all secularists atheists and agnostics included *The Modern Urban Landscape (Routledge Revivals)* Edward Relph, 2016-04-06 First published in 1987 this book provides a wide ranging account of how modern cities have come to look as they do differing radically from their predecessors in their scale style details and meanings It uses many illustrations and examples to explore the origins and development of specific landscape features More generally it traces the interconnected changes which have occurred in architecture and aesthetic fashions in planning in economic and social conditions and which together have created the landscape that now prevails in most of the cities of the world This book will be of interest to students of architecture urban studies and geography **Journal of the American Institute of Architects** American Institute of Architects, 1923 **Encyclopedia of Twentieth Century Architecture** R. Stephen Sennott, 2004 A balance of sophistication and clarity in the writing authoritative entries and strong cross referencing that links architects and structures to entries on the history and theory of the profession make this an especially useful source on a century of the world's most notable architecture The contents feature major architects firms and professional issues buildings styles and sites the architecture of cities and countries critics and historians construction materials and planning topics schools movements and stylistic and theoretical terms Entries include well selected bibliographies and illustrations Reference that rocks American Libraries May 2005 **William Van Alen, Fred T. Ley and the Chrysler Building** George C. Kingston, 2017-05-23 The Chrysler Building was the result of a remarkable collaboration between William Van Alen a dreamer whose designs challenged orthodox architecture and Fred T Ley a practical builder who turned dreams into reality Together they realized Walter P Chrysler's vision of an iconic structure that would for 11 months be the tallest building in the world Van Alen is recognized as one of the most innovative architects of the 20th century Ley rose from rod man on a survey team to head one of the largest construction companies in the world Both men participated in the architectural revolution brought about by steel frame curtain wall construction This book chronicles how they designed and constructed the Chrysler Building and how the experience affected the rest of their lives *Museum Architecture* Suzanne MacLeod, 2013-04-12 Recent decades have witnessed an explosion of museum building around the world and the subsequent publication of multiple texts dedicated to the subject *Museum Architecture* A new biography focuses on the stories we tell of museum buildings in order to explore the

nature of museum architecture and the problems of architectural history when applied to the museum and gallery Starting from a discussion of the key issues in contemporary museum design the book explores the role of architectural history in the prioritisation of specific stories of museum building and museum architects and the exclusion of other actors from the history of museum making These omissions have contemporary relevance and impact directly on the ways in which the physical structures of museums are shaped Theoretically the book places a particular emphasis on the work of Pierre Bourdieu and Henri Lefebvre in order to establish an understanding of buildings as social relations the outcome of complex human interactions and relationships The book utilises a micro history an in depth case study of the National Gallery of the North the Walker Art Gallery in Liverpool to expose the myriad ways in which museum architecture is made Coupled with this detailed exploration is an emphasis on contemporary museum design which utilises the understanding of the social realities of museum making to explore ideas for a socially sustainable museum architecture fit for the twenty first century
