Technology and Industrial Transformation of China Yanqing Jiang, Jiewei Gu, 2022-10-30. This book explores how China's industrial transformation and development depend on technology and innovation and how considerations about issues associated with technology and innovation may affect China's development strategies. Market-oriented reforms initiated four decades ago have constantly fueled a high speed of development in China. The country's industrial structure has experienced rapid evolution. In the meantime, especially in the general context of globalization, the country has also opened to foreign trade and foreign direct investment, transforming itself from a virtually completely closed economy into a major trading nation and the largest developing country destination for foreign direct investment in the world. Technology is thought to be one of the key driving forces that shape the transformation of the Chinese economy. Owing to different speeds of innovation and technology diffusion, uneven development is one major issue in the process of China's industrial transformation under new trends of globalization. Substantial disparities across different Chinese regions, e.g. the gaps in regional industrial development and those in incomes and living standards, have been one prominent feature of China and are needless to say closely related to different speeds of innovation and technology diffusion. The relationship between technology diffusion, innovation and industrial development is an important yet complicated issue that deserves careful study. Considerations related to technology and innovation play a crucial role in leading and shaping China's development strategies and routes. Sustainable development of China creates strong pressures for continuous transforming, upgrading and restructuring of the Chinese economy, and in all of these processes, innovation and technology diffusion play a fundamental role. The book presents to the interested reader facts, thoughts, models, empirical results and discussions that shed light on those issues.

Rationality, Nationalism and Post-Communist Market Transformations Andrew Savchenko, 2018-06-27 This title was first published in 2000 A comparative analysis of market transformation in Poland Belarus and the Baltic states with particular emphasis on cross national variations in speed and direction of post Communist economic reforms While many studies tend to concentrate on the economic aspects of market reforms analysis of the broader institutional framework is less common This book therefore focuses on the influence of

historical and cultural conditions on the formation of economic policy The findings presented indicate that far from being a purely rational process driven exclusively by considerations of economical efficiency post Communist market transformation is influenced by socio political and cultural factors which are able to account for cross national variations in speed and direction of reforms

The Mayan Calendar and the Transformation of Consciousness Carl Johan Calleman, 2004-03-25 Reveals the Mayan calendar to be a spiritual device that describes the evolution of human consciousness from ancient times into the future Shows the connection between cosmic evolution and actual human history Provides a new science of time that explains why time not only seems to be speeding up in the modern world but is actually getting faster Explains how the end of the Mayan calendar is not the end of the world but a path toward enlightenment The prophetic Mayan calendar is not keyed to the movement of planetary bodies Instead it functions as a metaphysical map of the evolution of consciousness and records how spiritual time flows providing a new science of time The calendar is associated with nine creation cycles which represent nine levels of consciousness or Underworlds on the Mayan cosmic pyramid Through empirical research Calleman shows how this pyramidal structure of the development of consciousness can explain things as disparate as the common origin of world religions and the modern complaint that time seems to be moving faster Time in fact is speeding up as we transition from the materialist Planetary Underworld of time that governs us today to a new and higher frequency of consciousness the Galactic Underworld in preparation for the final Universal level of conscious enlightenment Calleman reveals how the Mayan calendar is a spiritual device that enables a greater understanding of the nature of conscious evolution throughout human history and the concrete steps we can take to align ourselves with this growth toward enlightenment
