A Companion to Modern Spanish American Fiction Donald Leslie Shaw,2002 With such figures as Jorge Luis Borges Miguel ngel Asturias and Gabriel Garc a M rquez both the latter Nobel Prizewinners Spanish American fiction is now unquestionably an integral part of the mainstream of Western literature This book draws on the most recent research in describing the origins and development of narrative in Spanish America during the nineteenth and twentieth centuries tracing the pattern from Romanticism and Realism through Modernismo Naturalism and Regionalism to the Boom and beyond It shows how while seldom moving completely away from satire social criticism and protest Spanish American fiction has evolved through successive phases in which both the conceptions of the writer s task and presumptions about narrative and reality have undergone radical alterations DONALD SHAW holds the Brown Forman Chair of Spanish American literature in the University of Virginia

Confronting the Present Gavin Smith, 2021-01-07 Anthropologists study other people and worry about it In the past this took the form of a professional desire to make our politics always somewhere else and to do with persons characterized as in some way different from ourselves Now distances shrink and old forms of difference melt as global forces give rise to new processes of differentiation and new possibilities for political collectivities How does this affect the way we might design a politically relevant anthropology This book examines these concerns in light of the author's shift from the study of rather distant people to people and places closer to home a trend to be found within the discipline as a whole How should anthropology respond to this change as it increasingly finds itself in stamping grounds where other disciplines are already well entrenched How will work being done in anthropology intersect with that in other disciplines Will anthropologists have anything to offer debates that have been ongoing in these other disciplines such as those relating to social citizenship and collective identity regionalism and the constitution of space and place hegemony and resistance political organization and cultural expression Conversely what can anthropologists learn from the way other disciplines formulate these issues and problems Written to provoke discussion this timely book aims to initiate a dialogue not only with anthropologists but also with those in related disciplines who share a concern with people politics and modernity As well as anthropologists the issues it tackles will be of interest to geographers economists political scientists social historians and sociologists Who's who in Interior Design, 2000 Latin America and Caribbean Contemporary Record, 1988 *Biennial Boom* Paloma Checa-Gismero, 2024-07-05 In *Biennial Boom* Paloma Checa Gismero traces an archeology of contemporary art biennials to uncover the processes that prompted these exhibitions to become the global art world's defining events at the end of the twentieth century Returning to the early post Cold War years Checa Gismero examines the early iterations of three well known biennials at the borders of North Atlantic liberalism the Bienal de La Habana inSITE and Manifesta She draws on archival and oral history fieldwork in Cuba Mexico the US Mexico borderlands and the Netherlands showing how these biennials reflected a post Cold War optimism for a pacified world by which artistic and knowledge production would help mend social political and cultural divisions Checa Gismero argues that in reflecting this optimism biennials facilitated the conversion of subaltern aesthetic genealogies into forms that were legible to a nascent cosmopolitan global elite all under the pretense of cultural exchange By outlining how early biennials set the basis for what is now recognized as global contemporary art Checa Gismero intervenes in previous accounts of the contemporary art world in order to better understand how it became the exclusionary rarified institution of today

Sacred Darkness Holley Moyes, 2012-04-15 Caves have been used in various ways across human society but despite the persistence within popular culture of the iconic caveman deep caves were never used primarily as habitation sites for early humans Rather in both ancient and contemporary contexts caves have served primarily as ritual spaces In *Sacred Darkness* contributors use archaeological evidence as well as ethnographic studies of modern ritual

practices to envision the cave as place of spiritual and ideological power that emerges as a potent venue for ritual practice. Covering the ritual use of caves in Europe, Asia, Australia, Africa, Mesoamerica, and the US Southwest and Eastern woodlands, this book brings together case studies by prominent scholars whose research spans from the Paleolithic period to the present day. These contributions demonstrate that cave sites are as fruitful as surface contexts in promoting the understanding of both ancient and modern religious beliefs and practices. This state-of-the-art survey of ritual cave use will be one of the most valuable resources for understanding the role of caves in studies of religion, sacred landscape, or cosmology and a must read for any archaeologist interested in caves.
