Jet Fighters Jim Winchester,2011-12-15 Presents illustrations historical notes facts and specifications for jet fighters ranging from the earliest designs of the mid twentieth century to some of the most modern fighters in use today Modern Military Aircraft Jim Winchester,2013-09-01 Modern Military Aircraft is a comprehensive guide to the world s fighting aircraft covering the period from the end of World War Two up to the present day *Big Wars* John Storey,2021-09-01 World War II was the biggest and most destructive war in history For two centuries wars had grown ever larger with the use of more terrible weapons and rising casualties culminating in the cataclysmic global events of 1939 45 And then quite suddenly large international wars have all but disappeared What caused wars to grow in size to such an extent and then shrink so precipitously Is this a permanent state of affairs or could big wars make a comeback Lawyer and historian John P Storey explores these questions by looking at the evolution of military technology and tactics over the long history of warfare From ancient bronze spears and chariots to World War II tanks and warplanes from the nuclear weapons of the Cold War to the drones and robotics of the future the changes in our methods of waging war has had and will continue to have a major impact on their size and destructiveness The sobering conclusion Storey makes is that based on past trends and the weapons in the pipeline for the future there is a much higher risk of there being much bigger wars in the coming decades **Air University Quarterly Review** ,1951 The National Defense Program--unification and Strategy United States. The Cutting Edge Mark A. Lorell,Hugh P. Levaux,Elizabeth Giddens,Jennifer Gross,Erik Moller,1998-10-20 The proposition that innovation is critical in the cost effective design and development of successful military aircraft is still subject to some debate RAND research indicates that innovation is promoted by intense competition among three or more industry competitors Given the critical policy importance of this issue in the current environment of drastic consolidation of the aerospace defense industry the authors here examine the history of the major prime contractors in developing jet fighters since World War II They make use of an extensive RAND database that includes nearly all jet fighters fighter attack aircraft and bombers developed and flown by U S industry since 1945 as well as all related prototypes modifications upgrades etc The report concludes that 1 experience matters because of the tendency to specialize and thus to develop system specific expertise 2 yet the most dramatic innovations and breakthroughs came from secondary or marginal players trying to compete

with the industry leaders and 3 dedicated military R D conducted or directly funded by the U S government has been critical in the development of new higher performance fighters and bombers
